Safety information

Conventions

Note: A *note* identifies information that could help you.

Warning: A *warning* identifies something that could damage the product hardware or software.

WARNING (in full capitals): A *WARNING* indicates a risk of death or serious injury if not avoided.

CAUTION: A *caution* indicates a potentially hazardous situation that could injure you.

Different types of caution statements include:

CAUTION—POTENTIAL INJURY: Indicates a risk of injury.

CAUTION—SHOCK HAZARD: Indicates a risk of electrical shock.

CAUTION—HOT SURFACE: Indicates a risk of burn if touched.

CAUTION—TIPPING HAZARD: Indicates a crush hazard.

CAUTION—PINCH HAZARD: Indicates a risk of being caught between moving parts.

Product statements

CAUTION—POTENTIAL INJURY: To avoid the risk of fire or electrical shock, connect the power cord to an appropriately rated and properly grounded electrical outlet that is near the product and easily accessible.

CAUTION—POTENTIAL INJURY: To avoid the risk of fire or electrical shock, use only the power cord provided with this product or the manufacturer's authorized replacement.

CAUTION—POTENTIAL INJURY: Do not use this product with extension cords, multioutlet power strips, multioutlet extenders, or UPS devices. The power capacity of these types of accessories can be easily overloaded by a laser printer and may result in a risk of fire, property damage, or poor printer performance.

CAUTION—POTENTIAL INJURY: Only a Lexmark Inline Surge Protector that is properly connected between the printer and the power cord provided with the printer may be used with this product. The use of non-Lexmark surge protection devices may result in a risk of fire, property damage, or poor printer performance.

CAUTION—SHOCK HAZARD: To avoid the risk of electrical shock, do not place or use this product near water or wet locations.

CAUTION—SHOCK HAZARD: To avoid the risk of electrical shock, do not set up this product or make any electrical or cabling connections, such as the power cord, fax feature, or telephone, during a lightning storm.

 **CAUTION—POTENTIAL INJURY:** Do not cut, twist, bind, crush, or place heavy objects on the power cord. Do not subject the power cord to abrasion or stress. Do not pinch the power cord between objects such as furniture and walls. If any of these things happen, a risk of fire or electrical shock results. Inspect the power cord regularly for signs of such problems. Remove the power cord from the electrical outlet before inspecting it.

 **CAUTION—SHOCK HAZARD:** To avoid the risk of electrical shock, make sure that all external connections (such as Ethernet and telephone system connections) are properly installed in their marked plug-in ports.

 **CAUTION—SHOCK HAZARD:** To avoid the risk of electrical shock, if you are accessing the controller board or installing optional hardware or memory devices sometime after setting up the printer, then turn the printer off, and unplug the power cord from the electrical outlet before continuing. If you have any other devices attached to the printer, then turn them off as well, and unplug any cables going into the printer.

 **CAUTION—SHOCK HAZARD:** To avoid the risk of electrical shock when cleaning the exterior of the printer, unplug the power cord from the electrical outlet and disconnect all cables from the printer before proceeding.

 **CAUTION—POTENTIAL INJURY:** If the printer weight is greater than 20 kg (44 lb), then it may require two or more people to lift it safely.

 **CAUTION—POTENTIAL INJURY:** When moving the printer, follow these guidelines to avoid personal injury or printer damage:

- Make sure that all doors and trays are closed.
- Turn off the printer, and then unplug the power cord from the electrical outlet.
- Disconnect all cords and cables from the printer.
- If the printer has separate floor-standing optional trays or output options attached to it, then disconnect them before moving the printer.
- If the printer has a caster base, then carefully roll it to the new location. Use caution when passing over thresholds and breaks in flooring.
- If the printer does not have a caster base but is configured with optional trays or output options, then remove the output options and lift the printer off the trays. Do not try to lift the printer and any options at the same time.
- Always use the handholds on the printer to lift it.
- Any cart used to move the printer must have a surface able to support the full footprint of the printer.
- Any cart used to move the hardware options must have a surface able to support the dimensions of the options.
- Keep the printer in an upright position.
- Avoid severe jarring movements.
- Make sure that your fingers are not under the printer when you set it down.
- Make sure that there is adequate clearance around the printer.

 **CAUTION—TIPPING HAZARD:** Installing one or more options on your printer or MFP may require a caster base, furniture, or other feature to prevent instability causing possible injury. For more information on supported configurations, see www.lexmark.com/multifunctionprinters.

 **CAUTION—TIPPING HAZARD:** To reduce the risk of equipment instability, load each tray separately. Keep all other trays closed until needed.

-  **CAUTION—HOT SURFACE:** The inside of the printer might be hot. To reduce the risk of injury from a hot component, allow the surface to cool before touching it.
-  **CAUTION—PINCH HAZARD:** To avoid the risk of a pinch injury, use caution in areas marked with this label. Pinch injuries may occur around moving parts, such as gears, doors, trays, and covers.
-  **CAUTION—POTENTIAL INJURY:** This product uses a laser. Use of controls or adjustments or performance of procedures other than those specified in the *User's Guide* may result in hazardous radiation exposure.
-  **CAUTION—POTENTIAL INJURY:** The lithium battery in this product is not intended to be replaced. There is a danger of explosion if a lithium battery is incorrectly replaced. Do not recharge, disassemble, or incinerate a lithium battery. Discard used lithium batteries according to the manufacturer's instructions and local regulations.

WARNING

- **INGESTION HAZARD:** This product contains a button cell or coin battery.
- **DEATH** or serious injury can occur if ingested.
- A swallowed button cell or coin battery can cause **Internal Chemical Burns** in as little as **2 hours**.
- **KEEP** new and used batteries **OUT OF REACH** of **CHILDREN**.
- **Seek immediate medical attention** if a battery is suspected to be swallowed or inserted inside any part of the body.

Remove and immediately recycle or dispose of used batteries according to local regulations and keep away from children. Do not dispose of batteries in household trash or incinerate. Even used batteries may cause severe injury or death. Call a local poison control center for treatment information.

Battery type: CR6821

Nominal battery voltage: 3V

Do not force discharge, recharge, disassemble, heat above 60°C (140°F), or incinerate. Doing so may result in injury due to venting, leakage, or explosion resulting in chemical burns.

This product is designed, tested, and approved to meet strict global safety standards with the use of specific manufacturer's components. The safety features of some parts may not always be obvious. The manufacturer is not responsible for the use of other replacement parts.

Refer service or repairs, other than those described in the user documentation, to a service representative.

Finding the printer serial number

- 1 Open the tray.

- 2** Locate the serial number at the right side of the printer.

Printer configurations

Note: Make sure to configure the printer on a flat, sturdy, and stable surface.

Basic model

1	Control panel
2	USB port
3	Multipurpose feeder
4	Standard 550-sheet tray
5	Standard bin

Configured model

CAUTION—TIPPING HAZARD: Installing one or more options on your printer or MFP may require a caster base, furniture, or other feature to prevent instability causing possible injury. For more information on supported configurations, see www.lexmark.com/multifunctionprinters.

CAUTION—TIPPING HAZARD: To reduce the risk of equipment instability, load each tray separately. Keep all other trays closed until needed.

#	Hardware option	Alternative hardware option
1	Staple finisher ¹	<ul style="list-style-type: none"> Offset stacker¹ Paper transport Paper transport with folding option
2	1500-sheet tray ²	None

¹ Cannot be installed together with a booklet finisher or staple, hole punch finisher.

² Must be always installed together with an optional 550-sheet tray and either of the following: 2 x 550-sheet tray or 2000-sheet tandem tray.

³ Must be always installed together with an optional 550-sheet tray.

⁴ Must be always installed together with an optional 550-sheet tray and one of the following: 2 x 550-sheet tray, 2000-sheet tandem tray, or cabinet.

#	Hardware option	Alternative hardware option
3	2000-sheet tandem tray ³	<ul style="list-style-type: none"> 2 x 550-sheet tray³ Cabinet³
4	Optional 550-sheet tray	None
5	Booklet finisher ⁴	Staple, hole punch finisher ⁴

¹ Cannot be installed together with a booklet finisher or staple, hole punch finisher.

² Must be always installed together with an optional 550-sheet tray and either of the following: 2 x 550-sheet tray or 2000-sheet tandem tray.

³ Must be always installed together with an optional 550-sheet tray.

⁴ Must be always installed together with an optional 550-sheet tray and one of the following: 2 x 550-sheet tray, 2000-sheet tandem tray, or cabinet.

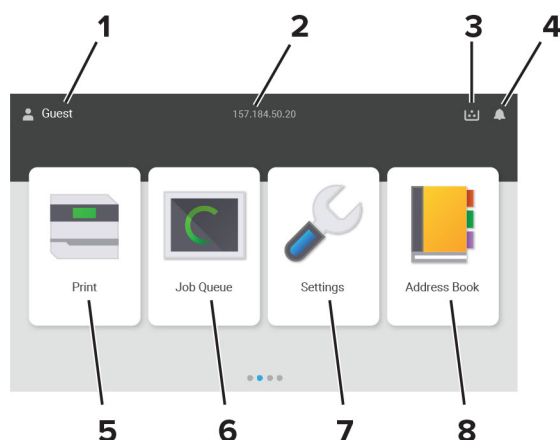

Using the control panel

	Control panel part	Function
1	Power button	<ul style="list-style-type: none"> Turn on or turn off the printer. <p>Note: To turn off the printer, press and hold the power button for five seconds.</p> <ul style="list-style-type: none"> Set the printer to Sleep mode. Wake the printer from Sleep or Hibernate mode.
2	Display	<ul style="list-style-type: none"> View the printer messages and supply status. Set up and operate the printer.
3	Indicator light	Check the status of the printer.

Home screen icons

Note: Your home screen may vary depending on your home screen customization settings, administrative setup, and active embedded solutions.

#	Icon name	Function
1	User	Show if a user is logged in to the printer.
2	Displayed information	Show a customized printer information such as the printer IP address or the date and time.
3	Supply	Show the status of supplies.
4	Notification	<ul style="list-style-type: none"> Show a printer warning or error message whenever the printer requires intervention to continue processing. View more information on the printer warning or message, and on how to clear it.
5	Print	Print photos and documents.
6	Job Queue	Show all the current print jobs.
7	Settings	Access the printer menus.
8	Address Book	Access, create, and organize contacts.

Colors of the indicator light

Color of the indicator light	Printer status
Off	The printer is off.
Solid blue	The printer is ready.
Blinking blue	The printer is printing or processing data.
Blinking red	The printer requires user intervention.
Solid amber	The printer is in Sleep mode.
Blinking amber	The printer is in Deep Sleep or Hibernate mode.

Locating the security slot

The printer is equipped with a security lock feature. Attach a security lock compatible with most laptop computers in the location shown to secure the printer in place.

Selecting paper

Paper guidelines

Use the appropriate paper to prevent jams and help ensure trouble-free printing.

- Always use new, undamaged paper.
- Before loading paper, know the recommended printable side of the paper. This information is usually indicated on the paper package.
- Do not use paper that has been cut or trimmed by hand.
- Do not mix paper sizes, types, or weights in the same tray; mixing results in jams.
- Do not use coated papers unless they are specifically designed for electrophotographic printing.

For more information, see the *Paper and Specialty Media Guide*.

Paper characteristics

The following paper characteristics affect print quality and reliability. Consider these factors before printing on them.

Weight

Trays can feed paper of varying weights. Paper lighter than 60 g/m² (16 lb) may not be stiff enough to feed properly, and may cause jams. For more information, see the “Supported paper weights” topic.

Curl

Curl is the tendency for paper to curl at its edges. Excessive curl can cause paper feeding problems. Curl can occur after the paper passes through the printer, where it is exposed to high temperatures. Storing paper unwrapped in hot, humid, cold, or dry conditions can contribute to paper curling before printing and can cause feeding problems.

Smoothness

Paper smoothness directly affects print quality. If paper is too rough, toner cannot fuse to it properly. If paper is too smooth, it can cause paper feeding or print quality issues. We recommend the use of paper with 50 Sheffield points.

Moisture content

The amount of moisture in paper affects both print quality and the printer ability to feed the paper correctly. Leave paper in its original wrapper until you use it. Exposure of paper to moisture changes can degrade its performance.

Before printing, store paper in its original wrapper for 24 to 48 hours. The environment in which the paper is stored must be the same as the printer. Extend the time several days if the storage or transportation environment is very different from the printer environment. Thick paper may also require a longer conditioning period.

Grain direction

Grain refers to the alignment of the paper fibers in a sheet of paper. Grain is either *grain long* which runs the length of the paper, or *grain short* which runs the width of the paper. For recommended grain direction, see the “Supported paper weights” topic.

Fiber content

Most high-quality xerographic paper is made from 100 percent chemically treated pulped wood. This content provides the paper with a high degree of stability, resulting in fewer paper feeding problems and better print quality. Paper containing fibers such as cotton can negatively affect paper handling.

Unacceptable paper

The following paper types are not recommended for use with the printer:

- Chemically treated papers that are used to make copies without carbon paper. They are also known as carbonless papers, carbonless copy paper (CCP), or no carbon required (NCR) paper.
- Preprinted papers with chemicals that may contaminate the printer.
- Preprinted papers that can be affected by the temperature in the printer fuser.
- Preprinted papers that require a registration (the precise print location on the page) greater than ± 2.3 mm (± 0.09 in.). For example, optical character recognition (OCR) forms.

Sometimes, registration can be adjusted with a software app to print successfully on these forms.

- Coated papers (erasable bond), synthetic papers, or thermal papers.
- Rough-edged, rough or heavily textured surface papers, or curled papers.
- Papers that fail EN12281:2002 (European).
- Paper weighing less than 60 g/m^2 (16 lb).
- Multiple-part forms or documents.

Using recycled paper

Lexmark works to reduce the environmental impact of paper by providing customers choices when it comes to printing. One way we achieve this is by testing products to ensure recycled paper may be used—specifically, papers made with 30%, 50%, and 100% post-consumer recycled content. Our expectation is that recycled

papers perform as well as virgin paper in our printers. While no official standard exists for office equipment use of paper, Lexmark uses European Standard EN 12281 as a minimum properties standard. To ensure breadth of testing, test paper includes 100% recycled papers from North America, Europe, and Asia, and tests are conducted at 8–80% relative humidity. Testing includes duplex printing. Office paper using renewable, recycled, or chlorine-free content may all be used.

Storing paper

Use these paper storage guidelines to help avoid jams and uneven print quality:

- Store paper in its original wrapper in the same environment as the printer for 24 to 48 hours before printing.
- Extend the time several days if the storage or transportation environment is very different from the printer environment. Thick paper may also require a longer conditioning period.
- For best results, store paper where the temperature is 21°C (70°F) and the relative humidity is 40 percent.
- Most label manufacturers recommend printing in a temperature range of 18–24°C (65–75°F) with relative humidity between 40 and 60 percent.
- Store paper in cartons, on a pallet or shelf, rather than on the floor.
- Store individual packages on a flat surface.
- Do not store anything on top of individual paper packages.
- Take paper out of the carton or wrapper only when you are ready to load it in the printer. The carton and wrapper help keep the paper clean, dry, and flat.

Selecting preprinted forms and letterhead

- Use grain long paper.
- Use only forms and letterhead printed using an offset lithographic or engraved printing process.
- Avoid paper with rough or heavily textured surfaces.
- Use inks that are not affected by the resin in toner. Inks that are oxidation-set or oil-based generally meet these requirements; latex inks might not.
- Print samples on preprinted forms and letterheads considered for use before buying large quantities. This action determines whether the ink in the preprinted form or letterhead affects print quality.
- When in doubt, contact your paper supplier.
- When printing on letterhead, load the paper in the proper orientation for your printer. For more information, see the *Paper and Specialty Media Guide*.

Supported paper sizes

Paper sizes supported by the basic configuration

Paper size	Orientation	Standard 550-sheet tray	Multipurpose feeder	Two-sided printing
4x6 Card	Short-edge feed	X	✓	X

Additional printer features and support

Supported applications

- Display Customization

Supported flash drives and file types

Flash drives

- Flash drives that support USB 2.0 or lower.
- Flash drives that support a New Technology File System (NTFS) or the File Allocation Table (FAT32) file system.

File types

Documents	Images
<ul style="list-style-type: none">• PDF (version 1.7 or earlier)• Microsoft file formats (DOC, DOCX, XLS, XLSX, PPT, PPTX)	<ul style="list-style-type: none">• JPEG or JPG• TIFF or TIF• GIF• BMP• PNG• PCX• DCX

Available internal options

- Intelligent storage drive (ISD)
 - Fonts
 - Simplified Chinese
 - Traditional Chinese
 - Japanese
 - Korean
 - Arabic
 - Mass storage
- Hard disk
- Licensed features
 - IPDS
 - Bar Code
- Lexmark™ Internal solutions port (ISP)
 - RS-232C Serial Card
 - MarkNet™ N8230 Fiber Ethernet 100BASE-FX(LC), 1000BASE-SX(LC)

Note: An ISD or a hard disk is required to activate Forms Merge and some IPDS features.

Set up, install, and configure

Selecting a location for the printer

- Leave enough room to open trays, covers, and doors and to install hardware options.
- Set up the printer near an electrical outlet.

CAUTION—POTENTIAL INJURY: To avoid the risk of fire or electrical shock, connect the power cord to an appropriately rated and properly grounded electrical outlet that is near the product and easily accessible.

CAUTION—SHOCK HAZARD: To avoid the risk of electrical shock, do not place or use this product near water or wet locations.

- Make sure that airflow in the room meets the latest revision of the ASHRAE 62 standard or the CEN Technical Committee 156 standard.
- Provide a flat, sturdy, and stable surface.
- Keep the printer:
 - Clean, dry, and free of dust.
 - Away from stray staples and paper clips.
 - Away from the direct airflow of air conditioners, heaters, or ventilators.
 - Free from direct sunlight and humidity extremes.
- Observe the recommended temperatures and avoid fluctuations:

Ambient temperature	10 to 32.2°C (50 to 90°F)
Storage temperature	15.6 to 32.2°C (60 to 90°F)

- Allow the following recommended amount of space around the printer for proper ventilation:

1	Top	305 mm (12 in.)
2	Rear	203 mm (8 in.)
3	Right side	574 mm (22.6 in)
4	Front	338 mm (13.3 in)
5	Left side	152 mm (6 in)

Printer ports

⚠ CAUTION—SHOCK HAZARD: To avoid the risk of electrical shock, do not set up this product or make any electrical or cabling connections, such as the power cord, fax feature, or telephone, during a lightning storm.

⚠ CAUTION—POTENTIAL INJURY: To avoid the risk of fire or electrical shock, connect the power cord to an appropriately rated and properly grounded electrical outlet that is near the product and easily accessible.

⚠ CAUTION—POTENTIAL INJURY: To avoid the risk of fire or electrical shock, use only the power cord provided with this product or the manufacturer's authorized replacement.

Warning—Potential Damage: To avoid loss of data or printer malfunction, do not touch the USB cable, any wireless network adapter, or the printer in the areas shown while actively printing.

	Printer port	Function
1	Finisher or option port	Connect the printer to a finisher or an option.
2	USB port	Attach a keyboard or any compatible option.
3	USB printer port	Connect the printer to a computer.
4	Ethernet port	Connect the printer to a network.
5	Power cord socket	Connect the printer to a properly grounded electrical outlet.

Configuring apps and solutions

Using Display Customization

Note: Make sure that the Screen Saver, Slideshow, and Wallpaper settings are enabled from the Embedded Web Server. Navigate to **Apps > Display Customization > Configure**.

Managing screen saver and slide show images

- 1 In the Screen Saver and Slideshow Images section, add, edit, or delete an image.

Notes:

- You can add up to 10 images.
- When enabled, the status icons appear on the screen saver only when there are errors, warnings, or cloud-based notifications.

- 2 Apply the changes.

Changing the wallpaper image

- 1 From the control panel, select **Change Wallpaper**.
- 2 Select an image to use.
- 3 Apply the changes.

Running a slide show from a flash drive

- 1 Insert a flash drive into the USB port.
- 2 From the control panel, select **Slideshow**.

Note: You can remove the flash drive after the slide show starts, but the images are not stored in the printer. If the slide show stops, then insert the flash drive again to view the images.

Configuring bookmarks

Creating bookmarks

- 1 Open a web browser, and then type the printer IP address in the address field.

Notes:

- View the printer IP address on the printer home screen. The IP address appears as four sets of numbers separated by periods, such as 123.123.123.123.
- If you are using a proxy server, then temporarily disable it to load the web page correctly.

- 2 Click **Bookmarks > Add Bookmark**, and then type a bookmark name.

- 3 Select an Address protocol type, and then do one of the following:

- For HTTP and HTTPS, type the URL that you want to bookmark.
- For HTTPS, make sure to use the host name instead of the IP address. For example, type **myWebsite.com/sample.pdf** instead of typing **123.123.123.123/sample.pdf**. Make sure that the host name also matches the Common Name (CN) value in the server certificate. For more information on obtaining the CN value in the server certificate, see the help information for your web browser.
- For FTP, type the FTP address. For example, **myServer/myDirectory**. Enter the FTP port number. Port 21 is the default port for sending commands.
- For SMB, type the network folder address. For example, **myServer/myShare/myFile.pdf**. Type the network domain name.
- If necessary, select the **Authentication** type for FTP and SMB.

To limit access to the bookmark, enter a PIN.

Note: The application supports the following file types: PDF, JPEG, and TIFF. Other file types such as DOCX and XLSX are supported in some printer models.

- 4 Click **Save**.

Creating folders

- 1 Open a web browser, and then type the printer IP address in the address field.

Notes:

- View the printer IP address on the printer home screen. The IP address appears as four sets of numbers separated by periods, such as 123.123.123.123.
- If you are using a proxy server, then temporarily disable it to load the web page correctly.

- 2 Click **Bookmarks > Add Folder**, and then type a folder name.

Note: To limit access to the folder, enter a PIN.

- 3 Click **Save**.

Configuring Address Book

Adding contacts

- 1 Open a web browser, and then type the printer IP address in the address field.

Notes:

- View the printer IP address on the printer home screen. The IP address appears as four sets of numbers separated by periods, such as 123.123.123.123.
- If you are using a proxy server, then temporarily disable it to load the web page correctly.

- 2 Click **Address Book**, and then click **Add Contact**.

- 3 If necessary, specify a login method to allow application access.

- 4 Click **Save**.

Adding groups

- 1 Open a web browser, and then type the printer IP address in the address field.

Notes:

- View the printer IP address on the printer home screen. The IP address appears as four sets of numbers separated by periods, such as 123.123.123.123.
- If you are using a proxy server, then temporarily disable it to load the web page correctly.

- 2 Click **Address Book**, and then click **Add Contact**.

Note: You can assign one or more contacts to the group.

- 3 Click **Save**.

Setting up and using the accessibility features

Activating Voice Guidance

From the home screen

- 1 In one motion and using one finger, slowly swipe left then up on the display until you hear a voice message.
- 2 Using two fingers, touch **OK**.

Note: If the gesture does not work, then apply more pressure.

From the keyboard

- 1 Press and hold the **5** key until you hear a voice message.
- 2 Press **Tab** to navigate the focus cursor to the OK button, and then press **Enter**.

Notes:

- When Voice Guidance is activated, always use two fingers to select any item on the display.
- Voice Guidance has limited language support.

Deactivating Voice Guidance

- 1 In one motion and using one finger, slowly swipe left then up on the display until you hear a voice message.
- 2 Using two fingers, do either of the following:
 - Select **Voice Guidance**, and then select **OK**.
 - Select **Cancel**.

Note: If the gesture does not work, then apply more pressure.

Pressing the power button or putting the printer in Sleep or Hibernate mode also deactivates Voice Guidance.

Navigating the screen using gestures

Notes:

- Most of the gestures are applicable only when Voice Guidance is activated.
- Use a physical keyboard to type characters and adjust certain settings.

Gesture	Function
<p>Swipe left then up using one finger</p> 	<p>Launch or exit Accessibility mode.</p> <p>Note: This gesture is also applicable when the printer is in normal mode.</p>
<p>Double-tap using one finger</p> 	<p>Select an option or item on the screen.</p>

Gesture	Function
<p data-bbox="142 275 578 338">Double-tap the home icon using two fingers</p> 	<p data-bbox="578 275 1481 306">Deactivate the Accessibility mode.</p>
<p data-bbox="142 701 578 732">Triple-tap using one finger</p> 	<p data-bbox="578 701 1481 732">Zoom in or zoom out text and images.</p> <p data-bbox="578 743 1481 774">Note: Enable Magnification mode to use the zoom feature.</p>
<p data-bbox="142 1121 578 1184">Swipe right or swipe down using one finger</p> 	<p data-bbox="578 1121 1481 1152">Move to the next item on the screen.</p>

Gesture	Function
<p data-bbox="149 277 535 336">Swipe left or swipe up using one finger</p> 	<p data-bbox="584 277 1063 304">Move to the previous item on the screen.</p>
<p data-bbox="149 1064 511 1123">Swipe up then down using one finger</p> 	<p data-bbox="584 1064 1006 1092">Move to the first item on the screen.</p>
<p data-bbox="149 1522 194 1549">Pan</p> 	<p data-bbox="584 1522 1453 1549">Access parts of the zoomed image that are beyond the limit of the screen.</p> <p data-bbox="584 1570 665 1598">Notes:</p> <ul data-bbox="609 1619 1226 1690" style="list-style-type: none"><li data-bbox="609 1619 1112 1646">• Use two fingers to drag a zoomed image.<li data-bbox="609 1661 1226 1690">• Enable Magnification mode to use the pan gesture.

Gesture	Function
<p>Swipe up then right using one finger</p> 	<p>Increase the volume.</p> <p>Note: This gesture is also applicable when the printer is in normal mode.</p>
<p>Swipe down then right using one finger</p> 	<p>Decrease the volume.</p> <p>Note: This gesture is also applicable when the printer is in normal mode.</p>
<p>Swipe up then left using one finger</p> 	<p>Exit an application and return to the home screen.</p>
<p>Swipe down then left using one finger</p> 	<p>Go back to the previous setting.</p>

Using the on-screen keyboard

When the on-screen keyboard appears, do one or more of the following:

- Touch a key to announce and type the character in the field.
- Drag a finger across different characters to announce and type the character in the field.
- Touch a text box using two fingers to announce the characters in the field.
- Touch **Backspace** to delete characters.

Enabling Magnification mode

- 1 In one motion and using one finger, slowly swipe left then up on the display until you hear a voice message.

Note: For printer models without built-in speakers, use headphones to hear the message.

- 2 Using two fingers, do the following:

- a Touch **Magnification mode**.
- b Touch **OK**.

Note: If the gesture does not work, then apply more pressure.

For more information on navigating a magnified screen, see [“Navigating the screen using gestures” on page 66](#).

Adjusting the Voice Guidance speech rate

- 1 From the control panel, navigate to **Settings > Device > Accessibility > Speech Rate**.
- 2 Select the speech rate.

Adjusting the default headphone volume

- 1 From the control panel, navigate to **Settings > Device > Accessibility**.
- 2 Adjust the headphone volume.

Note: The volume resets to the default value after the user exits Accessibility mode or when the printer wakes from Sleep or Hibernate mode.

Adjusting the default internal speaker volume

- 1 From the control panel, swipe right to the control center.
- 2 Adjust the volume.

Notes:

- If Quiet Mode is enabled, then the audible alerts are turned off. This setting also slows the printer performance.
- The volume resets to the default value after the user exits the Accessibility mode or when the printer wakes from Sleep or Hibernate mode.

Enabling spoken passwords or personal identification numbers

- 1 From the control panel, navigate to **Settings > Device > Accessibility > Speak Passwords/PINs**.
- 2 Enable the setting.

Loading paper and specialty media

Setting the size and type of the specialty media

For specialty media like labels, card stock, or envelopes, do the following:

- 1 From the control panel, navigate to **Settings > Paper > Tray Configuration > Paper Size/Type**.
- 2 Select a paper source, and then set the size and type of the specialty media.

Configuring Universal paper settings

The **Universal Setup** menu lets you set the width and height of a paper size that is not preset in the printer.

- 1 From the control panel, navigate to **Settings > Paper > Media Configuration > Universal Setup**.
- 2 Select **All Input Trays**, and then configure the settings for the paper size that you want to customize.

Loading the 550-sheet tray

 **CAUTION—TIPPING HAZARD:** To reduce the risk of equipment instability, load each tray separately. Keep all other trays closed until needed.

- 1 Open the tray.

Note: To avoid jams, do not open trays while the printer is busy.

- 2 Adjust the guides to match the size of the paper that you are loading.

Notes:

- Use the indicators on the bottom of the tray to position the guides.
- Prepunched paper is supported only in the standard 550-sheet tray.
- A3-size paper is supported only in the optional 550-sheet tray.

**3** Flex, fan, and align the paper edges before loading.**4** Load the paper stack with the printable side faceup.**Notes:**

- Do not slide paper into the tray.
- Make sure that the side guides fit snugly against the paper.
- Make sure that the stack height is below the maximum paper fill indicator. Overfilling may cause paper jams.

5 Insert the tray.

If necessary, set the paper size and paper type to match the paper loaded in the tray.

Note: When a finisher is installed, the pages are rotated to 180° when printed.

When loading letterhead, do any of the following:

Without a finisher	With a finisher
 <p>One-sided, long-edge printing</p>	 <p>One-sided, long-edge printing</p>
 <p>One-sided, short-edge printing</p>	 <p>One-sided, short-edge printing</p>
 <p>Two-sided, long-edge printing</p>	 <p>Two-sided, long-edge printing</p>

Without a finisher	With a finisher
	
Two-sided, short-edge printing	Two-sided, short-edge printing

When loading prepunched paper, do any of the following:

Without an optional finisher	With an optional finisher
	
One-sided, long-edge printing	One-sided, long-edge printing
	
One-sided, short-edge printing	One-sided, short-edge printing
	
Two-sided, long-edge printing	Two-sided, long-edge printing
	
Two-sided, short-edge printing	Two-sided, short-edge printing

Loading the 2000-sheet tandem tray

 **CAUTION—TIPPING HAZARD:** To reduce the risk of equipment instability, load each tray separately. Keep all other trays closed until needed.

1 Open the tray.

Note: To avoid jams, do not pull out trays while the printer is busy.

2 Flex, fan, and align the paper edges before loading.

3 Load the paper stack to the right tray insert with the printable side faceup.

Notes:

- Do not slide paper into the tray.
- Make sure that the stack height is below the maximum paper fill indicator. Overfilling may cause paper jams.

4 Insert the right tray insert into the printer.

- 5** Load the paper stack to the left tray insert with the printable side faceup.

- 6** Insert the tray.

If necessary, set the paper size and type to match the paper loaded in the tray.

Note: When a finisher is installed, the pages are rotated to 180° when printed.

When loading letterhead for one-sided printing, load it faceup with the header toward the front of the tray.

When loading letterhead for two-sided printing, load it facedown with the header toward the front of the tray.

Loading the 1500-sheet tray

 **CAUTION—TIPPING HAZARD:** To reduce the risk of equipment instability, load each tray separately. Keep all other trays closed until needed.

1 Open door K.

Note: To avoid jams, do not open trays while the printer is busy.

2 Flex, fan, and align the paper edges before loading.

3 Load the paper stack with the printable side facedown.

Notes:

- Do not slide paper into the tray.
- Make sure that the stack height is below the maximum paper fill indicator. Overfilling may cause paper jams.

4 Close door K.

If necessary, set the paper size and type to match the paper loaded in the tray.

When loading letterhead for one-sided printing, load it facedown with the header toward the rear of the printer.

When loading letterhead for two-sided printing, load it faceup with the header toward the rear of the printer.

When loading a different paper size, make sure to adjust the guides. Do the following:

- 1 Using a flat-headed screwdriver, remove the screws from the paper guides.

- 2 Remove the paper guides.

- 3** Align the paper guides to match the size of the paper that you are loading.

- 4** Install the screws on the paper guides.

Loading the multipurpose feeder

- 1 Open the multipurpose feeder.

- 2 Adjust the side guides to match the size of the paper that you are loading.

- 3 Flex, fan, and align the paper edges before loading.

- 4 Load the paper.

Note: Make sure that the side guides fit snugly against the paper.

- When loading letterhead, do either of the following:

Without a finisher	With a finisher
 One-sided, long-edge printing	 One-sided, long-edge printing
 Two-sided, long-edge printing	 Two-sided, long-edge printing

When loading prepunched paper, do either of the following:

Without a finisher	With a finisher
 One-sided, long-edge printing	 One-sided, long-edge printing
 Two-sided, long-edge printing	 Two-sided, long-edge printing

For envelopes

Load envelope with the flap faceup toward the rear of the printer. Load European envelope with the flap faceup entering the multipurpose feeder first.

Note: When a finisher is installed, the printer rotates the pages to 180°.

Linking trays

- 1 Open a web browser, and then type the printer IP address in the address field.

Notes:

- View the printer IP address on the printer home screen. The IP address appears as four sets of numbers separated by periods, such as 123.123.123.123.
- If you are using a proxy server, then temporarily disable it to load the web page correctly.

- 2 Click **Settings > Paper > Tray Configuration**.

- 3 Set the same paper size and paper type for the trays that you are linking.

Note: Make sure to load the linked trays with the same paper orientation.

- 4 Save the settings.

- 5 Click **Settings > Device > Maintenance > Configuration Menu > Tray Configuration**.

6 Set Tray Linking to Automatic.**7 Save the settings.**

To unlink the trays, make sure that no trays have the same paper size and paper type settings.

Warning—Potential Damage: The temperature of the fuser varies according to the specified paper type. To avoid printing issues, match the paper type setting in the printer with the paper loaded in the tray.

Installing and updating software, drivers, and firmware

Installing the printer software

Notes:

- The print driver is included in the software installer package.
- For Macintosh computers with macOS version 10.7 or later, you do not need to install the driver to print on an AirPrint-certified printer. If you want custom printing features, then download the print driver.

1 Obtain a copy of the software installer package.

- From the software CD that came with your printer.
- Go to www.lexmark.com/downloads.

2 Run the installer, and then follow the instructions on the computer screen.

Adding printers to a computer

Before you begin, do one of the following:

- Connect the printer and the computer to the same network. For more information on connecting the printer to a network, see [“Connecting the printer to a Wi-Fi network” on page 232](#).
- Connect the computer to the printer. For more information, see [“Connecting a computer to the printer” on page 234](#).
- Connect the printer to the computer using a USB cable. For more information, see [“Printer ports” on page 62](#).

Note: The USB cable is sold separately.

For Windows users**1** Install the print driver on the computer.

Note: For more information, see [“Installing the printer software” on page 84](#).

2 Open **Printers & scanners**, and then click **Add a printer or scanner**.**3** Depending on your printer connection, do one of the following:

- Select a printer from the list, and then click **Add device**.
- Click **Show Wi-Fi Direct printers**, select a printer, and then click **Add device**.
- Click **The printer that I want isn't listed**, and then from the **Add Printer** window, do the following:
 - a Select **Add a printer using an IP address or hostname**, and then click **Next**.
 - b In the Device type field, select **TCP/IP Device**.
 - c In the Hostname or IP address field, type the printer IP address, and then click **Next**.

Notes:

- View the printer IP address on the printer home screen. The IP address appears as four sets of numbers separated by periods, such as 123.123.123.123.
 - If you are using a proxy server, then temporarily disable it to load the web page correctly.
- d** Select a print driver, and then click **Next**.
 - e** Select **Use the driver that is currently installed (recommended)**, and then click **Next**.
 - f** Type a printer name, and then click **Next**.
 - g** Click **Finish**.

For Macintosh users

- 1** Open **Printers & Scanners**.
- 2** Click **Add Printer, Scanner, or Fax**, and then select a printer.
- 3** From the **Add Printer** menu, select a print driver.

Notes:

- To use the Macintosh print driver, select either **AirPrint** or **Secure AirPrint**.
- If you want custom printing features, then select the Lexmark print driver. To install the driver, see [“Installing the printer software” on page 84](#).

- 4** Add the printer.

Exporting a configuration file

- 1** Open a web browser, and then type the printer IP address in the address field.

Notes:

- View the printer IP address on the printer home screen. The IP address appears as four sets of numbers separated by periods, such as 123.123.123.123.
- If you are using a proxy server, then temporarily disable it to load the web page correctly.

- 2** From the Embedded Web Server, click **Export Configuration**.
- 3** Select a configuration to export.

Note: Depending on the configuration that you selected, the files are either exported in a ZIP or CSV format.

Importing a configuration file

- 1** Open a web browser, and then type the printer IP address in the address field.

Notes:

- View the printer IP address on the printer home screen. The IP address appears as four sets of numbers separated by periods, such as 123.123.123.123.
- If you are using a proxy server, then temporarily disable it to load the web page correctly.

- 2** From the Embedded Web Server, click **Import Configuration**.

- 3 Browse to the location that the file is saved.

Note: The files are either saved in a ZIP or CSV format.

- 4 Click **Import**.

Adding available options in the print driver

For Windows users

- 1 Open the printers folder.
- 2 Select the printer that you want to update, and then do either of the following:
 - For Windows 7 or later, select **Printer properties**.
 - For earlier versions, select **Properties**.
- 3 Navigate to the **Configuration** tab, and then select **Update Now - Ask Printer**.
- 4 Apply the changes.

For Macintosh users

- 1 Open **Printers & Scanners**.
- 2 Click **Add Printer, Scanner, or Fax**, and then select a printer.
- 3 Choose a print driver.
- 4 Apply the changes.

Updating firmware

Updating the firmware using the control panel

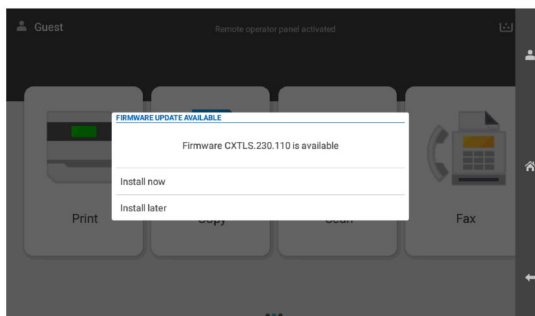

Using the notification center

This method is applicable only in some printer models.

- 1 From the control panel, navigate to the notification center, and then select **Firmware update available**.

2 Select **Install now**.

The printer reboots automatically after the update.

Using the Settings menu

- 1 From the control panel, navigate to **Settings > Device > Update Firmware**.
- 2 Depending on your printer model, select **Check for updates** or **Check for updates now**.
- 3 If a new update is available, then select **Install now**.

The printer reboots automatically after the update.

Updating the firmware using the Embedded Web Server

Before you begin, make sure that:

- You have downloaded the latest printer firmware from <https://support.lexmark.com> and saved it to your flash drive or computer.

Note: To deploy the printer firmware, extract the FLS firmware file from the ZIP package.

- You are not using a special code on your printer to avoid losing this functionality.

Warning—Potential Damage: Make sure that all printers receiving firmware updates are turned on during the entire firmware update process. Turning off a printer during a firmware update can severely damage it.

If the printer is connected to the network when checking for updates, then downloading the firmware is not required.

- 1 Open a web browser, and then type the printer IP address in the address field.

Notes:

- View the printer IP address on the printer home screen. The IP address appears as four sets of numbers separated by periods, such as 123.123.123.123.
- If you are using a proxy server, then temporarily disable it to load the web page correctly.

- 2 Click **Device**.

- 3 Scroll down, and then click **Update Firmware**.

- 4 Depending on your printer model, click **Check for updates** or **Check for updates now**.

If a new update is available, then click **I agree, start update**.

The printer reboots automatically after the update.

Installing hardware options

Installing the optional 550-sheet tray

CAUTION—SHOCK HAZARD: To avoid the risk of electrical shock, if you are accessing the controller board or installing optional hardware or memory devices sometime after setting up the printer, then turn the printer off, and unplug the power cord from the electrical outlet before continuing. If you have any other devices attached to the printer, then turn them off as well, and unplug any cables going into the printer.

Note: This task requires a flat-head screwdriver.

- 1 Turn off the printer.

- 2 Unplug the power cord from the electrical outlet, and then from the printer.

- 3 Unpack the optional 550-sheet tray.

Note: To avoid damaging the tray, make sure to hold the front and rear sides when lifting it.

- 4** Attach the right tray cover.

- 5** Pull out the 550-sheet tray insert.

- 6** Remove the upper tray cover.

- 7** Remove the screws.

8 Attach the lower tray cover.**9** Install the screws.**10** Attach the upper tray cover.**11** Insert the 550-sheet tray insert.

- 12** Remove the cover under the right side of the printer.

- 13** Align the printer with the 550-sheet tray, and then lower it into place.

⚠ CAUTION—POTENTIAL INJURY: If the printer weight is greater than 20 kg (44 lb), then it may require two or more people to lift it safely.

- 14** Pull out the standard tray insert.

- 15** Secure the 550-sheet tray to the printer.

- 16** Insert the standard tray insert.

- 17** Secure the rear part of the 550-sheet tray to the printer.

- 18** Connect one end of the power cord to the printer, and then the other end to the electrical outlet.

⚠ CAUTION—POTENTIAL INJURY: To avoid the risk of fire or electrical shock, connect the power cord to an appropriately rated and properly grounded electrical outlet that is near the product and easily accessible.

- 19** Turn on the printer.

Add the tray in the print driver to make it available for print jobs. For more information, see [“Adding available options in the print driver” on page 86](#).

Installing the 2 x 550-sheet tray

⚠ CAUTION—SHOCK HAZARD: To avoid the risk of electrical shock, if you are accessing the controller board or installing optional hardware or memory devices sometime after setting up the printer, then turn the printer off, and unplug the power cord from the electrical outlet before continuing. If you have any other devices attached to the printer, then turn them off as well, and unplug any cables going into the printer.

Notes:

- This option must be installed together with an optional 550-sheet tray. Place the option at the bottom of the configuration.
- If a 550-sheet tray is already installed, uninstall the tray, remove the tray side cover, remove the lower tray cover, and then place the tray on top of this option.
- This task requires a flat-head screwdriver.

1 Turn off the printer.

2 Unplug the power cord from the electrical outlet, and then from the printer.

3 Unpack the 2 x 550-sheet tray, and then remove all the packing material.

- 4 Lock the caster to keep the 2 x 550-sheet tray from moving.

- 5 Align the 550-sheet tray with the 2 x 550-sheet tray, and then lower it into place.

Note: To avoid damaging the tray, make sure to hold the front and rear sides when lifting the tray.

- 6** Pull out the 550-sheet tray insert.

- 7** Secure the 550-sheet tray to the 2 x 550-sheet tray.

8 Insert the 550-sheet tray insert.

9 Secure the rear part of the 550-sheet tray to the 2 x 550-sheet tray.

- 10** Remove the cover under the right side of the printer.

- 11** Align the printer with the optional trays, and then lower it into place.

⚠ CAUTION—POTENTIAL INJURY: If the printer weight is greater than 20 kg (44 lb), then it may require two or more people to lift it safely.

12 Pull out the standard tray insert.

13 Secure the 550-sheet tray to the printer.

14 Insert the standard tray insert.

- 15** Secure the rear part of the 550-sheet tray to the printer.

- 16** Connect one end of the power cord to the printer, and then the other end to the electrical outlet.

CAUTION—POTENTIAL INJURY: To avoid the risk of fire or electrical shock, connect the power cord to an appropriately rated and properly grounded electrical outlet that is near the product and easily accessible.

- 17** Turn on the printer.

Add the tray in the print driver to make it available for print jobs. For more information, see [“Adding available options in the print driver” on page 86](#).

Installing the 2000-sheet tandem tray

CAUTION—SHOCK HAZARD: To avoid the risk of electrical shock, if you are accessing the controller board or installing optional hardware or memory devices sometime after setting up the printer, then turn the printer off, and unplug the power cord from the electrical outlet before continuing. If you have any other devices attached to the printer, then turn them off as well, and unplug any cables going into the printer.

Notes:

- This option must be installed together with an optional 550-sheet tray. Place this option at the bottom of the configuration.
- If a 550-sheet tray is already installed, uninstall the tray, remove the tray side cover, remove the lower tray cover, and then place the tray on top of this option.

- This task requires a flat-head screwdriver.

1 Turn off the printer.

2 Unplug the power cord from the electrical outlet, and then from the printer.

3 Unpack the tandem tray, and then remove all the packing material.

- 4 Lock the caster to keep the tandem tray from moving.

D

- 5 Align the 550-sheet tray with the tandem tray, and then lower it into place.

Note: To avoid damaging the tray, make sure to hold the front and rear sides when lifting the tray.

6 Pull out the 550-sheet tray insert.

7 Secure the 550-sheet tray to the tandem tray.

8 Insert the tray insert.

- 9 Secure the rear part of the 550-sheet tray to the tandem tray.

- 10 Remove the cover under the right side of the printer.

- 11 Align the printer with the optional trays, and then lower it into place.

CAUTION—POTENTIAL INJURY: If the printer weight is greater than 20 kg (44 lb), then it may require two or more people to lift it safely.

12 Pull out the standard tray.

- 13** Secure the 550-sheet tray to the printer.

- 14** Insert the tray.

- 15** Secure the rear part of the 550-sheet tray to the printer.

- 16** Connect one end of the power cord to the printer, and then the other end to the electrical outlet.

⚠ CAUTION—POTENTIAL INJURY: To avoid the risk of fire or electrical shock, connect the power cord to an appropriately rated and properly grounded electrical outlet that is near the product and easily accessible.

- 17** Turn on the printer.

Add the tray in the print driver to make it available for print jobs. For more information, see [“Adding available options in the print driver” on page 86](#).

Installing the cabinet

⚠ CAUTION—SHOCK HAZARD: To avoid the risk of electrical shock, if you are accessing the controller board or installing optional hardware or memory devices sometime after setting up the printer, then turn the printer off, and unplug the power cord from the electrical outlet before continuing. If you have any other devices attached to the printer, then turn them off as well, and unplug any cables going into the printer.

Notes:

- This option must be installed together with a 550-sheet tray. Place this option at the bottom of the configuration.
- If a 550-sheet tray is already installed, then uninstall the tray, remove the lower tray cover and place it on top of this option.
- This task requires a flat-head screwdriver.

1 Unpack, and then assemble the cabinet.

2 Turn off the printer.

3 Unplug the power cord from the electrical outlet, and then from the printer.

- 4 Lock the caster to keep the cabinet from moving.

- 5 Attach the side cover of the 550-sheet tray.

- 6 Align the tray with the cabinet, and then lower it into place.

Note: To avoid damaging the tray, make sure to hold the front and rear sides when lifting it.

7 Pull out the tray insert.

8 Secure the tray to the cabinet.

9 Insert the tray insert.

10 Secure the rear part of the tray to the cabinet.

- 11** Remove the cover under the right side of the printer.

- 12** Align the printer with the cabinet and the tray, and then lower it into place.

⚠ CAUTION—POTENTIAL INJURY: If the printer weight is greater than 20 kg (44 lb), then it may require two or more people to lift it safely.

- 13** Pull out the standard tray insert.

- 14** Secure the 550-sheet tray to the printer.

- 15** Insert the standard tray insert.

- 16** Secure the rear part of the 550-sheet tray to the printer.

- 17** Connect one end of the power cord to the printer, and then the other end to the electrical outlet.

⚠ CAUTION—POTENTIAL INJURY: To avoid the risk of fire or electrical shock, connect the power cord to an appropriately rated and properly grounded electrical outlet that is near the product and easily accessible.

- 18** Turn on the printer.

Installing the 1500-sheet tray

⚠ CAUTION—SHOCK HAZARD: To avoid the risk of electrical shock, if you are accessing the controller board or installing optional hardware or memory devices sometime after setting up the printer, then turn the printer off, and unplug the power cord from the electrical outlet before continuing. If you have any other devices attached to the printer, then turn them off as well, and unplug any cables going into the printer.

Notes:

- Before installing this option, make sure that an optional 550-sheet tray and either of the 2 x 500-sheet tray or 2000-sheet tray are already installed.
- This task requires a flat-head screwdriver.

Note:

- 1** Turn off the printer.

- 2** Unplug the power cord from the electrical outlet, and then from the printer.

- 3** Remove the connection cover.

Note: Do not throw away the cover.

- 4** Remove the port cover.

Note: Do not throw away the cover.

- 5** Remove the screw caps from the printer.

Note: Do not throw away the screw caps.

6 Unpack the 1500-sheet tray, and then remove all the packing material.

7 Install the screws for the mounting bracket.

8 Attach the mounting bracket to the printer.

Note: Use the mounting bracket and screws that came with the 1500-sheet tray.

9 Install the remaining screws.

10 Install the 1500-sheet tray.

11 Connect the tray cable to the printer.

12 Attach the tray cable cover.**13** Slide the 1500-sheet tray toward the printer.

- 14 Connect one end of the printer power cord to the printer, and then the other end to the electrical outlet.

CAUTION—POTENTIAL INJURY: To avoid the risk of fire or electrical shock, connect the power cord to an appropriately rated and properly grounded electrical outlet that is near the product and easily accessible.

- 15 Turn on the printer.

Add the tray in the print driver to make it available for print jobs. For more information, see [“Adding available options in the print driver” on page 86](#).

Installing the staple finisher

CAUTION—SHOCK HAZARD: To avoid the risk of electrical shock, if you are accessing the controller board or installing optional hardware or memory devices sometime after setting up the printer, then turn the printer off, and unplug the power cord from the electrical outlet before continuing. If you have any other devices attached to the printer, then turn them off as well, and unplug any cables going into the printer.

Note: This task requires a flat-head screwdriver.

- 1 Turn off the printer.

- 2 Unplug the power cord from the electrical outlet, and then from the printer.

- 3 Unpack the staple finisher, and then remove all the packing material.
- 4 Install the feed guide.

- 5 Remove the standard bin.
- Note:** Do not throw away the bin.

- 6 Before installing the option, place the exit bin flag into the closed position.
- Note:** When the option is removed, place the exit bin flag into the open position.

7 Remove the backup roller.

Note: Do not throw away the roller.

- 8** Insert the feed roller that came with the staple finisher until it *clicks* into place.

Note: Make sure that the metal spring is in front of the feed roller.

- 9** Attach the roller cover until it *clicks* into place.

- 10** Open the front door, and then remove the cover on the left side of the printer.

Note: Do not throw away the screw and cover.

- 11** Remove the left rear cover.

Note: Do not throw away the screw and cover.

- 12** Remove the inner bin cover.

Note: Do not throw away the cover.

13 Align, and then insert the inner bin cover that came with the staple finisher.

14 Install the screws to the inner bin cover.

15 Attach the staple finisher slider.**16** Insert the staple finisher.**17** Install the mounting bracket to secure the finisher to the printer.

Note: Use the screw that came with the finisher.

18 Attach the left rear cover, and then slide the staple finisher to the left.

19 Attach the left upper trim cover that came with the finisher.

- 20** Insert the staple cartridge into the finisher until it *clicks* into place.

- 21** Close the front door, and then slide the finisher toward the printer.

- 22** Connect the option cable to the printer.

- 23** Connect one end of the printer power cord to the printer, and then the other end to the electrical outlet.

⚠ CAUTION—POTENTIAL INJURY: To avoid the risk of fire or electrical shock, connect the power cord to an appropriately rated and properly grounded electrical outlet that is near the product and easily accessible.

- 24** Turn on the printer.

Add the finisher in the print driver to make it available for print jobs. For more information, see [“Adding available options in the print driver” on page 86](#).

Installing the offset stacker

⚠ CAUTION—SHOCK HAZARD: To avoid the risk of electrical shock, if you are accessing the controller board or installing optional hardware or memory devices sometime after setting up the printer, then turn the printer off, and unplug the power cord from the electrical outlet before continuing. If you have any other devices attached to the printer, then turn them off as well, and unplug any cables going into the printer.

- 1** Turn off the printer.

- 2** Unplug the power cord from the electrical outlet, and then from the printer.

- 3** Unpack the offset stacker, and then remove all the packing material.

4 Attach the inner rear cover to the offset stacker.**5** Remove the standard bin.

Note: Do not throw away the bin.

6 Remove the paper transport connector cover.

Note: Do not throw away the cover.

- 7** Before installing the option, place the exit bin flag into the closed position.

- 8** Align, and then install the offset stacker to the printer.

Note: Make sure that the parts are securely attached and aligned to the printer.

9 Attach the protective strips of the offset stacker to the printer.

10 Place the exit bin flag into the open position.

- 11** Attach the bin flag cover until it *clicks* into place.

- 12** Connect one end of the printer power cord to the printer, and then the other end to the electrical outlet.

CAUTION—POTENTIAL INJURY: To avoid the risk of fire or electrical shock, connect the power cord to an appropriately rated and properly grounded electrical outlet that is near the product and easily accessible.

- 13** Turn on the printer.

Add the offset stacker in the print driver to make it available for print jobs. For more information, see [“Adding available options in the print driver” on page 86](#).

Installing the paper transport with folding option

CAUTION—SHOCK HAZARD: To avoid the risk of electrical shock, if you are accessing the controller board or installing optional hardware or memory devices sometime after setting up the printer, then turn the printer off, and unplug the power cord from the electrical outlet before continuing. If you have any other devices attached to the printer, then turn them off as well, and unplug any cables going into the printer.

Notes:

- This option can also be installed together with a staple, hole punch finisher or booklet finisher.

- This task requires a flat-head screwdriver.

1 Turn off the printer.

2 Unplug the power cord from the electrical outlet, and then from the printer.

3 Unpack the paper transport with folding option, and then remove all the packing material.

4 Remove the standard bin.

Note: Do not throw away the bin.

- 5** Before installing the option, place the exit bin flag into the closed position.

Note: When the option is removed, place the exit bin flag into the open position.

- 6** Remove the backup roller.

Note: Do not throw away the roller.

7 Insert the feed roller that came with the option until it *clicks* into place.

Note: Make sure that the metal spring is in front of the feed roller.

- 8** Attach the roller cover until it *clicks* into place.

- 9** Open the front door, and then remove the cover on the left side of the printer.

Note: Do not throw away the screw and cover.

- 10** Close the front door.

- 11** Remove the paper transport connector cover.

Note: Do not throw away the cover.

12 Remove the left rear cover.

Note: Do not throw away the screw and cover.

13 Remove the inner bin cover.

Note: Do not throw away the screw and cover.

- 14** Align, and then insert the inner bin cover that came with the option.

- 15** Install the screws to the inner bin cover.

16 Attach the pieces of foam tape to the option.

- 17** Open door F, and then tighten the screws.

- 18** Close door F.

- 19** Attach the metal bracket to the option.

- 20** Insert the option.

Note: Make sure that the metal bracket is in front of the printer.

21 Open door F, and then using the screwdriver that came with the option, install the screw.

22 Close door F.

23 Install the screws into the option.

24 Attach the left rear cover.

25 Open the front door, and then attach the cover to the left side of the printer.

26 Close the front door.

27 Raise the bin flap, and then align and attach the option bin.

28 Install the screws to the option bin.

29 Attach the trim cover.**30** Connect the option cable to the printer.**31** Connect one end of the power cord to the printer, and then the other end to the electrical outlet.

⚠ CAUTION—POTENTIAL INJURY: To avoid the risk of fire or electrical shock, connect the power cord to an appropriately rated and properly grounded electrical outlet that is near the product and easily accessible.

32 Turn on the printer.

Installing the staple, hole punch finisher and paper transport option

⚠ CAUTION—SHOCK HAZARD: To avoid the risk of electrical shock, if you are accessing the controller board or installing optional hardware or memory devices sometime after setting up the printer, then turn the printer off, and unplug the power cord from the electrical outlet before continuing. If you have any other devices attached to the printer, then turn them off as well, and unplug any cables going into the printer.

Note: This task requires a flat-head screwdriver.

- 1 Turn off the printer.

- 2 Unplug the power cord from the electrical outlet, and then from the printer.

- 3 Unpack the paper transport.
- 4 Remove the standard bin.

Note: Do not throw away the bin.

- 5** Before installing the option, place the exit bin flag into the closed position.

Note: When the option is removed, place the exit bin flag into the open position.

- 6** Remove the backup roller.

Note: Do not throw away the roller.

7 Insert the feed roller that came with the paper transport until it *clicks* into place.

Note: Make sure that the metal spring is in front of the feed roller.

- 8** Attach the cover until it *clicks* into place.

- 9** Open the front door, and then remove the cover on the left side of the printer.

Note: Do not throw away the screw and cover.

- 10** Close the front door.
- 11** Remove the paper transport connector cover.

Note: Do not throw away the cover.

12 Remove the cover.

Note: Do not throw away the cover.

13 Attach the metal bracket.

14 Insert the paper transport.

- 15** Open handle G, and then install the screw into the front of the paper transport.

- 16** Close handle G.

- 17** Install the screw into the rear of the paper transport.

- 18** Open the front door, and then attach the cover that came with the paper transport to the left side of the printer.

- 19** Close the front door.
- 20** Unpack the staple, hole punch finisher.
- 21** Install the stabilizer.

- 22** Remove the pieces of tape around the finisher.

23 Attach the bracket to the finisher.

24 Attach the foam tape to the finisher.

25 Attach the feed guide to the finisher.

26 Attach the bin to the finisher.

27 Open the finisher door, and then insert the hole punch box.

28 Place the bin extender into the finisher bin.

Notes:

- The bin extender is used for A3-size paper or longer and in high humidity conditions to help in stacking the paper.
- The bin capacity is reduced when the bin extender is used.

29 Close the finisher door.

30 Attach the mounting bracket to the printer.

Note: Make sure that the screws are aligned to the markers on the mounting bracket.

31 Attach the metal bracket that came with the paper transport to the printer.

32 Open the finisher door, remove the screw, and then pull the finisher lock.

33 Attach the finisher to the printer.

- 34** Lock the finisher to the printer, and then install the screw.

- 35** Connect the finisher cable to the printer.

- 36** Connect one end of the power cord to the printer, and then the other end to the electrical outlet.

CAUTION—POTENTIAL INJURY: To avoid the risk of fire or electrical shock, connect the power cord to an appropriately rated and properly grounded electrical outlet that is near the product and easily accessible.

- 37** Turn on the printer.

Installing the staple, hole punch finisher and paper transport with folding option

CAUTION—SHOCK HAZARD: To avoid the risk of electrical shock, if you are accessing the controller board or installing optional hardware or memory devices sometime after setting up the printer, then turn the printer off, and unplug the power cord from the electrical outlet before continuing. If you have any other devices attached to the printer, then turn them off as well, and unplug any cables going into the printer.

Note: This task requires a flat-head screwdriver.

- 1 Turn off the printer.

- 2 Unplug the power cord from the electrical outlet, and then from the printer.

- 3 Unpack the paper transport with folding option, and then remove all the packing material.

- 4 Remove the standard bin.

Note: Do not throw away the bin.

- 5** Before installing the option, place the exit bin flag into the closed position.

Note: When the option is removed, place the exit bin flag into the open position.

- 6** Remove the backup roller.

Note: Do not throw away the roller.

7 Insert the feed roller that came with the option until it *clicks* into place.

Note: Make sure that the metal spring is in front of the feed roller.

- 8** Attach the cover until it *clicks* into place.

- 9** Open the front door, and then remove the cover on the left side of the printer.

Note: Do not throw away the screw and cover.

- 10** Close the front door.
- 11** Remove the paper transport connector cover.

Note: Do not throw away the cover.

12 Remove the left rear cover.

Note: Do not throw away the screw and cover.

13 Remove the inner bin cover.

Note: Do not throw away the screw and cover.

- 14** Align, and then insert the inner bin cover that came with the paper transport with folding option.

- 15** Install the screws to the inner bin cover.

16 Attach the pieces of foam tape to the option.

17 Open door F, and then tighten the screws.

18 Close door F.

19 Attach the bracket to the option.

20 Insert the option.

Note: Make sure that the metal bracket is in front of the printer.

21 Open door F, and then using the screwdriver that came with the option, install the screw.

22 Close door F.

23 Install the screws into the option.

24 Attach the left rear cover.

25 Unpack the staple, hole punch finisher.

26 Install the stabilizer.

27 Remove the pieces of tape around the finisher.

28 Attach the bracket to the finisher.

29 Attach the foam tape to the finisher.

Note: Remove the small portion of foam on the right side of the finisher.

30 Attach the feed guide to the finisher.

31 Attach the bin to the finisher.

32 Open the finisher door, and then insert the hole punch box.

33 Place the bin extender into the finisher bin.

Notes:

- The bin extender is used for A3-size paper or longer and in high humidity conditions to help in stacking the paper.
- The bin capacity is reduced when the bin extender is used.

34 Close the finisher door.

35 Raise the bin flap, and then align and attach the cover to the option.

36 Install the screws.**37** Open the front door, and then attach the trim cover that came with the option.**38** Attach the mounting bracket to the printer.

Note: Make sure that the screws are aligned to the markers on the mounting bracket.

39 Open the finisher door, remove the screw, and then pull the finisher lock.

- 40** Connect the option cable to the printer.

- 41** Connect the finisher cable to the option.

- 42** Attach the finisher to the printer.

- 43** Lock the finisher to the printer, and then install the screw.

- 44** Close the finisher door.
- 45** Connect one end of the power cord to the printer, and then the other end to the electrical outlet.

 **CAUTION—POTENTIAL INJURY:** To avoid the risk of fire or electrical shock, connect the power cord to an appropriately rated and properly grounded electrical outlet that is near the product and easily accessible.

- 46** Turn on the printer.

Installing the booklet finisher and paper transport option

⚠ CAUTION—SHOCK HAZARD: To avoid the risk of electrical shock, if you are accessing the controller board or installing optional hardware or memory devices sometime after setting up the printer, then turn the printer off, and unplug the power cord from the electrical outlet before continuing. If you have any other devices attached to the printer, then turn them off as well, and unplug any cables going into the printer.

Note: This task requires a flat-head screwdriver.

- 1 Turn off the printer.

- 2 Unplug the power cord from the electrical outlet, and then from the printer.

- 3 Unpack the paper transport.
- 4 Remove the standard bin.

Note: Do not throw away the bin.

- 5** Before installing the option, place the exit bin flag into the closed position.

Note: When the option is removed, place the exit bin flag into the open position.

- 6** Remove the backup roller.

Note: Do not throw away the roller.

7 Insert the feed roller that came with the paper transport until it *clicks* into place.

Note: Make sure that the metal spring is in front of the feed roller.

- 8** Attach the roller cover until it *clicks* into place.

- 9** Open the front door, and then remove the cover on the left side of the printer.

Note: Do not throw away the screw and cover.

- 10** Close the front door.

- 11** Remove the paper transport connector cover.

Note: Do not throw away the cover.

12 Remove the cover.

Note: Do not throw away the cover.

13 Attach the metal bracket.

14 Insert the paper transport.

- 15** Open handle G, and then install the screw into the front of the paper transport.

- 16** Close handle G.

- 17** Install the screw into the rear of the paper transport.

- 18** Open the front door, and then attach the cover that came with the paper transport to the left side of the printer.

- 19** Close the front door.

- 20** Unpack the booklet finisher, and then remove all the packing material.

- 21** Attach the bracket to the finisher.

22 Attach the foam tape to the finisher.

23 Attach the feed guide to the finisher.

24 Attach the upper bin to the finisher.

25 Raise the bin flap, and then attach the lower bin to the finisher.

26 Open the finisher door.

27 Remove the packing material from the hole punch box, and then insert it into the finisher.

28 Place the bin extender on the finisher bin.

Notes:

- The bin extender is used for A3-size paper or longer and in high humidity conditions to help in stacking the paper.
- The bin capacity is reduced when the bin extender is used.

29 Attach the basket to the rear of the finisher.

30 Close the finisher door.

31 Attach the mounting bracket to the printer.

Note: Make sure that the screws are aligned to the markers on the mounting bracket.

32 Attach the bracket that came with the paper transport to the printer.

33 Open the finisher door, remove the screw, and then pull the finisher lock.

34 Attach the finisher to the printer.

- 35** Lock the finisher to the printer, and then install the screw.

- 36** Close the finisher door.

- 37** Connect the finisher cable to the printer.

- 38** Connect one end of the power cord to the printer, and then the other end to the electrical outlet.

CAUTION—POTENTIAL INJURY: To avoid the risk of fire or electrical shock, connect the power cord to an appropriately rated and properly grounded electrical outlet that is near the product and easily accessible.

- 39** Turn on the printer.

Installing the booklet finisher and paper transport with folding option

CAUTION—SHOCK HAZARD: To avoid the risk of electrical shock, if you are accessing the controller board or installing optional hardware or memory devices sometime after setting up the printer, then turn the printer off, and unplug the power cord from the electrical outlet before continuing. If you have any other devices attached to the printer, then turn them off as well, and unplug any cables going into the printer.

Note: This task requires a flat-head screwdriver.

- 1 Turn off the printer.

- 2 Unplug the power cord from the electrical outlet, and then from the printer.

- 3 Unpack the paper transport with folding option.

- 4 Remove the standard bin.

Note: Do not throw away the bin.

- 5** Before installing the option, place the exit bin flag into the closed position.

Note: When the option is removed, place the exit bin flag into the open position.

- 6** Remove the backup roller.

Note: Do not throw away the roller.

7 Insert the feed roller that came with the option until it *clicks* into place.

Note: Make sure that the metal spring is in front of the feed roller.

- 8** Attach the roller cover until it *clicks* into place.

- 9** Open the front door, and then remove the cover on the left side of the printer.

Note: Do not throw away the screw and cover.

- 10** Close the front door.

- 11** Remove the paper transport connector cover.

Note: Do not throw away the cover.

12 Remove the left rear cover.

Note: Do not throw away the screw and cover.

13 Remove the inner bin cover.

Note: Do not throw away the screw and cover.

- 14** Align, and then insert the inner bin cover that came with the option.

- 15** Install the screws to the inner bin cover.

16 Attach the pieces of foam tape to the option.

17 Open door F, and then tighten the screws.

18 Close door F.

19 Attach the bracket to the option.

20 Insert the option.

Note: Make sure that the metal bracket is in front of the printer.

21 Open door F, and then using the screwdriver that came with the option, install the screw.

22 Close door F.

23 Install the screws into the option.

24 Attach the left rear cover.

25 Unpack the booklet finisher, and then remove all the packing material.

26 Attach the bracket to the finisher.

27 Attach the foam tape to the finisher.

28 Attach the feed guide to the finisher.

29 Attach the upper bin to the finisher.

30 Raise the bin flap, and then attach the lower bin to the finisher.

31 Open the finisher door.

32 Remove the packing material from the hole punch box, and then insert it into the finisher.

33 Place the bin extender on the finisher bin.

Notes:

- The bin extender is used for A3-size paper or longer and in high humidity conditions to help in stacking the paper.
- The bin capacity is reduced when the bin extender is used.

34 Attach the basket to the rear of the finisher.

35 Close the finisher door.

36 Raise the bin flap, and then align and attach the cover to the option.

37 Install the screws.

- 38** Open the front door, and then attach the trim cover that came with the option.

- 39** Attach the mounting bracket to the printer.

Note: Make sure that the screws are aligned to the markers on the mounting bracket.

- 40** Open the finisher door, remove the screw, and then pull the finisher lock.

- 41** Connect the option cable to the printer.

42 Connect the finisher cable to the option.

43 Attach the finisher to the printer.

- 44** Lock the finisher to the printer, and then install the screw.

- 45** Close the finisher door.
- 46** Connect one end of the power cord to the printer, and then the other end to the electrical outlet.

 **CAUTION—POTENTIAL INJURY:** To avoid the risk of fire or electrical shock, connect the power cord to an appropriately rated and properly grounded electrical outlet that is near the product and easily accessible.

- 47** Turn on the printer.

Installing the intelligent storage drive

⚠ CAUTION—SHOCK HAZARD: To avoid the risk of electrical shock, if you are accessing the controller board or installing optional hardware or memory devices sometime after setting up the printer, then turn the printer off, and unplug the power cord from the electrical outlet before continuing. If you have any other devices attached to the printer, then turn them off as well, and unplug any cables going into the printer.

Note: This task requires a flat-head screwdriver.

- 1 Turn off the printer.

- 2 Unplug the power cord from the electrical outlet, and then from the printer.

- 3 Open the controller board access cover.

Warning—Potential Damage: Controller board electronic components are easily damaged by static electricity. Touch a metal surface on the printer before touching any controller board components or connectors.

- 4 Unpack the intelligent storage drive (ISD).

Warning—Potential Damage: Avoid touching the connection points along the edge of the storage drive.

- 5 Locate the ISD connector.

6 Insert the ISD to its connector.

- 7 Close the controller board access cover.

- 8 Connect one end of the power cord to the printer, and then the other end to the electrical outlet.

⚠ CAUTION—POTENTIAL INJURY: To avoid the risk of fire or electrical shock, connect the power cord to an appropriately rated and properly grounded electrical outlet that is near the product and easily accessible.

- 9 Turn on the printer.

Installing an internal solutions port

⚠ CAUTION—SHOCK HAZARD: To avoid the risk of electrical shock, if you are accessing the controller board or installing optional hardware or memory devices sometime after setting up the printer, then turn the printer off, and unplug the power cord from the electrical outlet before continuing. If you have any other devices attached to the printer, then turn them off as well, and unplug any cables going into the printer.

Note: This task requires a flat-head screwdriver.

- 1 Turn off the printer.

- 2 Unplug the power cord from the electrical outlet, and then from the printer.

- 3 Open the controller board access cover.

Warning—Potential Damage: Controller board electronic components are easily damaged by static electricity. Touch a metal surface on the printer before touching any controller board electronic components or connectors.

4 Remove the internal solutions port (ISP) cover.

Note: Do not throw away the screw and cover.

5 Unpack the ISP kit.

1	ISP
2	ISP extended cable
3	Mounting bracket
4	Thumbscrews

6 Attach the mounting bracket to the controller board until it *clicks* into place.

- 7** Attach the ISP to the mounting bracket, and then connect the ISP extended cable to its connector on the controller board.

8 Secure the ISP to the printer.

- 9 Close the controller board access cover.

- 10 Connect one end of the power cord to the printer, and then the other end to the electrical outlet.

 **CAUTION—POTENTIAL INJURY:** To avoid the risk of fire or electrical shock, connect the power cord to an appropriately rated and properly grounded electrical outlet that is near the product and easily accessible.

- 11 Turn on the printer.

Installing the card reader

⚠ CAUTION—SHOCK HAZARD: To avoid the risk of electrical shock, if you are accessing the controller board or installing optional hardware or memory devices sometime after setting up the printer, then turn the printer off, and unplug the power cord from the electrical outlet before continuing. If you have any other devices attached to the printer, then turn them off as well, and unplug any cables going into the printer.

- 1 Turn off the printer.

- 2 Open door B.

- 3** Open the front USB port cover.

- 4** Remove the lower USB port cover.

Note: If your printer does not have this part, then proceed to the next step.

- 5** Remove the protective cover from the card reader.

6 Insert the card reader.**7** Attach the lower port cover until it *clicks* into place.

8 Attach the sticker guide.**9** Attach the front USB port cover until it *clicks* into place.

- 10** Close door B until it *clicks* into place.

- 11** Turn on the printer.

Changing the printer port settings after installing an internal solutions port

Notes:

- If the printer has a static IP address, then do not change the configuration.
- If the computers are configured to use the network name instead of an IP address, then do not change the configuration.
- If you are adding a wireless internal solutions port (ISP) to a printer previously configured for an Ethernet connection, then disconnect the printer from the Ethernet network.

For Windows users

- 1** Open the printers folder.
- 2** From the shortcut menu of the printer with the new ISP, open the printer properties.
- 3** Configure the port from the list.
- 4** Update the IP address.
- 5** Apply the changes.

For Macintosh users

- 1 From System Preferences in the Apple menu, navigate to the list of printers, and then select + > **IP**.
- 2 Type the IP address in the address field.
- 3 Apply the changes.

Networking

Connecting the printer to a Wi-Fi network

Before you begin, make sure that:

- Active Adapter is set to Auto. From the control panel, navigate to **Settings > Network/Ports > Network Overview > Active Adapter**.
- The Ethernet cable is not connected to the printer.

Using the control panel

- 1 From the control panel, navigate to **Settings > Network/Ports > Wireless > Setup On Printer Panel > Choose Network**.
- 2 Select a Wi-Fi network, and then type the network password.

Note: For printers with built-in Wi-Fi capability, a prompt for setting up the Wi-Fi network appears during initial setup.

Connecting the printer to a wireless network using Wi-Fi Protected Setup (WPS)

Before you begin, make sure that:

- The access point (wireless router) is WPS-certified or WPS-compatible. For more information, see the documentation that came with your access point.
- A wireless network adapter is installed in your printer. For more information, see the instructions that came with the adapter.
- Active Adapter is set to Auto. From the control panel, navigate to **Settings > Network/Ports > Network Overview > Active Adapter**.

Using the Push Button method

- 1 From the control panel, navigate to **Settings > Network/Ports > Wireless > Wi-Fi Protected Setup > Start Push Button Method**.
- 2 Follow the instructions on the display.

Using the personal identification number (PIN) method

- 1 From the control panel, navigate to **Settings > Network/Ports > Wireless > Wi-Fi Protected Setup > Start PIN Method**.
- 2 Copy the eight-digit WPS PIN.

3 Open a web browser, and then type the IP address of your access point in the address field.

Notes:

- To know the IP address, see the documentation that came with your access point.
- If you are using a proxy server, then temporarily disable it to load the web page correctly.

4 Access the WPS settings. For more information, see the documentation that came with your access point.

5 Enter the eight-digit PIN, and then save the changes.

Configuring Wi-Fi Direct

Wi-Fi Direct® enables Wi-Fi devices to connect directly to each other without using an access point (wireless router).

1 From the control panel, navigate to **Settings > Network/Ports > Wi-Fi Direct**.

2 Configure the settings.

- **Enable Wi-Fi Direct**—Enables the printer to broadcast its own Wi-Fi Direct network.
- **Wi-Fi Direct Name**—Assigns a name for the Wi-Fi Direct network.
- **Wi-Fi Direct Password**—Assigns the password for negotiating the wireless security when using the peer-to-peer connection.
- **Show Password on Setup Page**—Shows the password on the Network Setup Page.
- **Preferred Channel Number**—Assigns the preferred channel of the Wi-Fi Direct network.
- **Group Owner IP Address**—Assigns the IP address of the group owner.
- **Auto-Accept Push Button Requests**—Lets the printer accept connection requests automatically.

Note: Accepting push-button requests automatically is not secured.

Notes:

- By default, the Wi-Fi Direct network password is not visible on the printer display. To show the password, enable the password peek icon. From the control panel, navigate to **Settings > Security > Miscellaneous > Enable Password/PIN Reveal**.
- To know the password of the Wi-Fi Direct network without showing it on the printer display, print the **Network Setup Page**. From the control panel, navigate to **Settings > Reports > Network > Network Setup Page**.

Connecting a mobile device to the printer

Before connecting your mobile device, make sure that Wi-Fi Direct has been configured. For more information, see [“Configuring Wi-Fi Direct” on page 233](#).

Using Wi-Fi Direct

Note: These instructions apply only to mobile devices running on the Android™ platform.

1 From the mobile device, go to the **Settings** menu.

2 Enable **Wi-Fi**, and then tap  > **Wi-Fi Direct**.

- 3 Select the printer Wi-Fi Direct name.
- 4 Confirm the connection on the printer control panel.

Using Wi-Fi

- 1 From the mobile device, go to the **Settings** menu.
- 2 Tap **Wi-Fi**, and then select the printer Wi-Fi Direct name.
Note: The string DIRECT-xy (where x and y are two random characters) is added before the Wi-Fi Direct name.
- 3 Enter the Wi-Fi Direct password.

Connecting a computer to the printer

Before connecting your computer, make sure that Wi-Fi Direct has been configured. For more information, see [“Configuring Wi-Fi Direct” on page 233](#).

For Windows users

- 1 Open **Printers & scanners**, and then click **Add a printer or scanner**.
- 2 Click **Show Wi-Fi Direct printers**, and then select the printer Wi-Fi Direct name.
- 3 From the printer display, take note of the eight-digit PIN of the printer.
- 4 Enter the PIN on the computer.

Note: If the print driver is not already installed, then Windows downloads the appropriate driver.

For Macintosh users

- 1 Click the wireless icon, and then select the printer Wi-Fi Direct name.
Note: The string DIRECT-xy (where x and y are two random characters) is added before the Wi-Fi Direct name.
- 2 Type the Wi-Fi Direct password.

Note: Switch your computer back to its previous network after disconnecting from the Wi-Fi Direct network.

Deactivating the Wi-Fi network

- 1 From the control panel, navigate to **Settings > Network/Ports > Network Overview > Active Adapter > Standard Network**.
- 2 Select **Yes** to restart the printer.

Checking the printer connectivity

- 1 From the control panel, navigate to **Settings > Reports > Network > Network Setup Page**.
- 2 Check the first section of the page, and confirm that the status is connected.
If the status is not connected, then the LAN drop may be inactive or the network cable may be malfunctioning. Contact your administrator for assistance.

Setting up serial printing (Windows only)

- 1** Set the parameters in the printer.
 - a** From the control panel, navigate to the menu for the port settings.
 - b** Locate the menu for the serial port settings, and then adjust the settings, if necessary.
 - c** Apply the changes.
- 2** From your computer, open the printers folder, and then select your printer.
- 3** Open the printer properties, and then select the COM port from the list.
- 4** Set the COM port parameters in Device Manager.

Notes:

- Serial printing reduces printing speed.
- Make sure that the serial cable is connected to the serial port on your printer.

Secure the printer

Erasing printer memory

To erase volatile memory or buffered data in your printer, turn off the printer.

To erase nonvolatile memory, device and network settings, security settings, and embedded solutions, do the following:

- 1 From the control panel, navigate to **Settings > Device > Maintenance > Out of Service Erase**.
- 2 Select **Sanitize all information on nonvolatile memory**, and then select **ERASE**.
- 3 Select **Start initial setup wizard** or **Leave printer offline**, and then select **Next**.
- 4 Start the process.

Note: This process also destroys the encryption key that is used to protect user data. Destroying the encryption key makes the data irrecoverable.

Erasing printer storage drive

- 1 From the control panel, navigate to **Settings > Device > Maintenance > Out of Service Erase**.
- 2 Depending on the storage drive that is installed on your printer, do either of the following:
 - For hard disk, select **Sanitize all information on hard disk**, select **ERASE**, and then select a method to erase data.

Note: The process to sanitize the hard disk can take from several minutes to more than an hour, making the printer unavailable for other tasks.
 - For intelligent storage drive, select **Cryptographically erase all user data on ISD**, and then select **ERASE**.

Restoring factory default settings

- 1 From the control panel, navigate to **Settings > Device > Restore Factory Defaults**.
- 2 Select **Restore Settings**.
- 3 Select the settings that you want to restore, and then select **RESTORE**.

Statement of Volatility

Type of memory	Description
Volatile memory	The printer uses standard random access memory (RAM) to buffer temporarily user data during simple print and copy jobs.
Nonvolatile memory	The printer may use two forms of nonvolatile memory: EEPROM and NAND (flash memory). Both types store the operating system, printer settings, and network information. They also store scanner and bookmark settings and embedded solutions.
Hard disk storage drive	Some printers may have a hard disk drive installed. The printer hard disk is designed for printer-specific functionality. The hard disk lets the printer retain buffered user data from complex print jobs, form data, and font data.
Intelligent storage drive (ISD)	Some printers may have an ISD installed. ISD uses nonvolatile flash memory to store user data from complex print jobs, form data, and font data.

Erase the content of any installed printer memory in the following circumstances:

- The printer is decommissioned.
- The printer hard disk or ISD is replaced.
- The printer is moved to a different department or location.
- The printer is serviced by someone from outside your organization.
- The printer is removed from your premises for service.
- The printer is sold to another organization.

Note: To dispose a storage drive, follow the policies and procedures of your organization.

Print

Printing from a computer

For Windows users

- 1 With a document open, click **File > Print**.
- 2 Select a printer, and then click **Properties, Preferences, Options, or Setup**.
If necessary, adjust the settings.
- 3 Click **OK**, and then click **Print**.

For Macintosh users

- 1 With a document open, choose **File > Print**.
- 2 Select a printer, and then select a setting from **Presets**.
If necessary, adjust the settings.
- 3 Click **Print**.

Printing from a mobile device

Printing from a mobile device using Lexmark Print

Lexmark Print is a mobile printing solution for mobile devices running on Android platform version 6.0 or later. It lets you send documents and images to network-connected printers and print management servers.

Notes:

- Make sure that you download the Lexmark Print app from the Google Play™ store and enable it in the mobile device.
 - Make sure that the printer and mobile device are connected to the same network.
- 1 From your mobile device, select a document from the file manager.
 - 2 Send or share the document to Lexmark Print.
Note: Some third-party apps may not support the send or share feature. For more information, see the documentation that came with the app.
 - 3 Select a printer.
If necessary, adjust the settings.
 - 4 Print the document.

Printing from a mobile device using Mopria™ Print Service

Mopria Print Service is a mobile printing solution for mobile devices running on Android version 5.0 or later. It lets you print directly to any Mopria™ certified printer.

Note: Make sure that you download Mopria Print Service from the Google Play store and enable it on your mobile device.

- 1 From your mobile device, launch a compatible app or select a document from the file manager.
- 2 Tap  > **Print**.
- 3 Select a printer, and then adjust the settings, if necessary.
- 4 Tap .

Printing from a mobile device using AirPrint

The AirPrint software feature is a mobile printing solution that lets you print directly from Apple devices to an AirPrint-certified printer.

Notes:

- Make sure that the Apple device and the printer are connected to the same network. If the network has multiple wireless hubs, then make sure that both devices are connected to the same subnet.
 - This application is supported only in some Apple devices.
- 1 From your mobile device, select a document from your file manager or launch a compatible application.
 - 2 Tap  > **Print**.
 - 3 Select a printer, and then adjust the settings, if necessary.
 - 4 Print the document.

Printing from a mobile device using Wi-Fi Direct®

Wi-Fi Direct® is a printing service that lets you print to any Wi-Fi Direct-ready printer.

Note: Make sure that the mobile device is connected to the printer wireless network. For more information, see [“Connecting a mobile device to the printer” on page 233](#).

- 1 From your mobile device, launch a compatible application or select a document from your file manager.
- 2 Depending on your mobile device, do one of the following:
 - Tap  > **Print**.
 - Tap  > **Print**.
 - Tap ... > **Print**.
- 3 Select a printer, and then adjust the settings, if necessary.
- 4 Print the document.

Printing from a flash drive

- 1 Insert the flash drive.

For more information on supported flash drives, see [“Supported flash drives and file types” on page 59](#).

Notes:

- If you insert the flash drive when an error message appears, then the printer ignores the flash drive.
- If you insert the flash drive while the printer is processing other print jobs, then **Busy** appears on the display.

2 From the control panel, select **Print** .

3 Select **USB Drive**, and then select the document that you want to print.

If necessary, configure the settings.

4 Print the document.

Warning—Potential Damage: To avoid loss of data or printer malfunction, do not touch the flash drive or the printer in the area shown while actively printing, reading, or writing from the memory device.

Configuring confidential jobs

1 From the control panel, navigate to **Settings > Security > Confidential Print Setup**.

2 Configure the settings.

Setting	Description
Max Invalid PIN	Set the limit for entering an invalid PIN. Note: When the limit is reached, the print jobs for that username are deleted.
Confidential Job Expiration	Set an individual expiration time for each held job before it is automatically deleted from the printer memory, hard disk, or intelligent storage drive. Note: A held job is either Confidential , Repeat , Reserve , or Verify .
Repeat Job Expiration	Set the expiration time for print jobs that you want to repeat.
Verify Job Expiration	Set the expiration time for printing a copy of a job for you to check its quality before printing the remaining copies.
Reserve Job Expiration	Set the expiration time for jobs that you want to store in the printer for printing later.
Require All Jobs to be Held	Set the printer to hold all print jobs.
Keep duplicate documents	Set the printer to keep all documents with the same file name.

Printing confidential and other held jobs

For Windows users

- 1 With a document open, click **File > Print**.
- 2 Select a printer, and then click **Properties, Preferences, Options**, or **Setup**.
- 3 Click **Print and Hold**.
- 4 Click **Use Print and Hold**, and then assign a username.
- 5 Select from any of the following print job types:
 - **Confidential print**—The printer asks for a personal identification number before letting you print the job.
Note: If you select this job type, then enter a four-digit personal identification number (PIN).
 - **Verify print**—The printer prints one copy and holds the remaining copies that you requested from the driver in printer memory.
 - **Reserve print**—The printer stores the job in memory so that you can print the job later.
 - **Repeat print**—The printer prints all requested copies of the job and stores the job in memory so you can print additional copies later.
- 6 Click **OK**.
- 7 Click **Print**.
- 8 From the printer control panel, release the print job.
 - a Select **Print**.
 - b Select **Held jobs**, and then select your username.
Note: For confidential print jobs, select **Confidential**, enter the PIN, and then select **OK**.
 - c Select the print job, and then select **Print**.

For Macintosh users

- 1 With a document open, choose **File > Print**.
- 2 Select a printer.
- 3 From the **Print Job Security** drop-down menu, enable **Print with PIN**, and then enter a four-digit PIN.
- 4 Click **Print**.
- 5 From the printer control panel, release the print job.
 - a Select **Held jobs**, and then select the computer name.
 - b Select **Confidential**, and then enter the PIN.
 - c Select the print job, and then select **Print**.

Printing a font sample list

- 1 From the control panel, navigate to **Settings > Reports > Print > Print Fonts**.
- 2 Select the type of font.

Printing a directory list

- 1 From the control panel, navigate to **Settings > Reports > Print**.
- 2 Select **Print Directory**.

Placing separator sheets in print jobs

- 1 With a document open, click **File > Print**.
- 2 Select a printer, and then click **Properties, Preferences, Options**, or **Setup**.
- 3 Click **Paper/Finishing**.
- 4 In the **Separator sheets** menu, select a setting.
- 5 Click **OK**, and then click **Print**.

Canceling a print job

- 1 From the control panel, select **Job Queue**.
- 2 Select **Print**, and then select a job to cancel.

Note: If a document is already printing, then select **Cancel job** in the lower-right corner of the display to stop printing.

Adjusting toner darkness

- 1 From the control panel, navigate to **Settings > Print > Quality**.
- 2 Adjust the setting for **Toner Darkness**.

Preferences

Menu item	Submenu item	Settings	Description
Display Language	N/A	[List of languages]	Set the language of the text that appears on the display.
Country/Region	N/A	[List of countries or regions]	Identify the country or region where the printer is configured to operate.
Run initial setup	N/A	Off* On	Run the setup wizard.
Keyboard	Keyboard Type	[List of languages]	Select a language as a keyboard type. Note: All the Keyboard Type values may not appear or may require special hardware to appear.
Date and Time	Configure	Current Date and Time Manually Set Date and Time Date Format (MM-DD-YYYY*) Time Format (12 hour A.M./P.M.*) Time Zone DST (GMT) Offset DST Start DST End DST Offset	Configure the printer date and time and network time protocol. Notes: <ul style="list-style-type: none">• MM-DD-YYYY is the U.S. factory default setting. DD-MM-YYYY is the international factory default setting.• UTC (GMT) Offset, DST Start, DST End, and DST Offset appear only when Time Zone is set to (UTC +user) Custom.• Key ID and Password appear only when Enable Authentication is set to MD5 key.
	Network Time Protocol	Enable NTP (On*) NTP Server Enable Authentication (None*) Key ID Password	
Paper Sizes	N/A	U.S.* Metric	Specify the unit of measurement for paper sizes. Note: The country or region selected in the initial setup wizard determines the initial paper size setting.

Note: An asterisk (*) next to a value indicates the factory default setting.

Menu item	Submenu item	Settings	Description
Screen Brightness	N/A	20–100% (100*)	Adjust the brightness of the display.
Flash Drive Access	N/A	Disabled Enabled*	Enable access to the flash drive function of the printer.
Allow Background Removal	N/A	Off On*	Specify whether background removal is allowed.
Device Sounds	Mute All Sounds	Off* On	Configure the sound settings of the printer.
	Button Feedback	Off On*	
	Volume	0–10 (5*)	
	Alarm Control	Off Single* Continuous	
	Cartridge Alarm	Off Single* Continuous	
Screen Timeout	N/A	5–300 seconds (60*)	Set the idle time in seconds before the display shows the home screen, or before the printer logs out a user account automatically.
Note: An asterisk (*) next to a value indicates the factory default setting.			

Eco-Mode

Menu item	Submenu item	Settings	Description
Print	Sides	1-Sided 2-Sided*	Specify whether to print on one side or both sides of the paper.
	Pages per Side	Off* 2 pages per side 3 pages per side 4 pages per side 6 pages per side 9 pages per side 12 pages per side 16 pages per side	Specify the number of pages to print on one side of a sheet of paper.
	Toner Darkness	1–5 (4*)	Determine the lightness or darkness of text images.
	Color Saver	Off* On	Set the printer to reduce the amount of toner that it uses when printing graphics and images.

Note: An asterisk (*) next to a value indicates the factory default setting.

Remote Operator Panel

Menu item	Settings	Description
External VNC Connection	Don't Allow* Allow	Connect an external Virtual Network Computing (VNC) client to the remote control panel.
Authentication Type	None* Standard Authentication	Set the authentication type when accessing the VNC client server.
VNC Password	The setting is user-defined.	Specify the password to connect to the VNC client server. Note: This menu item appears only if Authentication Type is set to Standard Authentication .

Note: An asterisk (*) next to a value indicates the factory default setting.

Notifications

Menu item	Submenu item	Settings	Description
Alarm Control	N/A	Off Single* Continuous	Set the number of times that the alarm sounds when the printer requires user intervention.
Supplies	Show Supply Estimates	Show estimates* Do not show estimates	Show the estimated status of the supplies.
	Cartridge Alarm	Off Single* Continuous	Set the number of times that the alarm sounds when the toner cartridge is low.
	Staple Alarm	Off* Single Continuous	Set the number of times that the alarm sounds when the staple cartridge is empty. Note: This menu item appears only when a staple finisher is installed.
	Hole Punch Alarm	Off* Single Continuous	Set the number of times that the alarm sounds when the hole punch container is full or missing. Note: This menu item appears only when a staple, hole punch finisher is installed.
Note: An asterisk (*) next to a value indicates the factory default setting.			

Menu item	Submenu item	Settings	Description
Email Alerts Setup	Primary SMTP Gateway	The setting is user-defined.	Type the IP address or host name of the primary SMTP server.
	Primary SMTP Gateway Port	1–65535 (25*)	Enter the port number of the primary SMTP server.
	Secondary SMTP Gateway	The setting is user-defined.	Type the IP address or host name of the secondary SMTP server.
	Secondary SMTP Gateway Port	1–65535 (25*)	Enter the server port number of the secondary SMTP server.
	SMTP Timeout	5–30 seconds (30*)	Specify the time that the SMTP server waits before it stops trying to send an email.
	Reply Address	The setting is user-defined.	Specify a reply address in the email.
	Always use SMTP default Reply Address	On Off*	Always use the default reply address in the SMTP server.
	Use SSL/TLS	Disabled* Negotiate Required	Send an email using an encrypted link.
	Require Trusted Certificate	On* Off	Require a trusted certificate when accessing the SMTP server.
Note: An asterisk (*) next to a value indicates the factory default setting.			

Menu item	Submenu item	Settings	Description
Email Alerts Setup	SMTP Server Authentication	No authentication required* Login/Plain NTLM CRAM-MD5 Digest-MD5 Kerberos 5	Set the authentication type for the SMTP server.
	Device-Initiated Email	None* Use Device SMTP Credentials	Set whether credentials are required for device-initiated emails.
	User-Initiated Email	None* Use Device SMTP Credentials Use Session User ID & Password Use Session Email address and Password Prompt user	Set whether credentials are required for user-initiated emails.
	Use Active Directory Device Credentials	On Off*	Enable user credentials and group designations to connect to the SMTP server.
	Device Userid	The setting is user-defined.	Specify the user ID to log in to the SMTP server.
	Device Password	The setting is user-defined.	Specify the password to log in to the SMTP server.
	Kerberos 5 REALM	The setting is user-defined.	Specify the realm for the Kerberos 5 authentication protocol.
	NTLM Domain	The setting is user-defined.	Specify the domain name for the NTLM security protocol.
	Disable "SMTP server not set up" error	On Off*	Disable an error message about the SMTP server setup.
	Setup Email Lists and Alerts	The setting is user-defined.	Specify the email addresses and enable the email alert. Note: This menu item appears only in the Embedded Web Server.
Note: An asterisk (*) next to a value indicates the factory default setting.			

Menu item	Submenu item	Settings	Description
Error Prevention	Auto Continue	Off On* Auto Continue Time	Let the printer continue processing or printing a job automatically after clearing certain attendance conditions. Note: When set to On , the default setting is 5 seconds.
	Auto Reboot	Reboot when idle Reboot always* Reboot never	Set the printer to restart when an error occurs.
	Max Auto Reboots	1–20 (2*)	Set the number of automatic reboots that the printer can perform.
	Auto Reboot Window	1–525600 (720*)	Set the number of seconds before the printer performs an automatic reboot.
	Auto Reboot Counter	The setting is a read-only information.	Show the number of automatic reboots that the printer has performed.
	Display Short Paper Error	On Auto-clear*	Set the printer to show a message when a short paper error occurs. Note: Short paper refers to the size of the paper loaded.
	Page Protect	Off* On	Set the printer to process the entire page into the memory before printing it.
Jam Content Recovery	Jam Recovery	Off On Auto*	Set the printer to reprint jammed pages.
Note: An asterisk (*) next to a value indicates the factory default setting.			

Power Management

Menu item	Submenu item	Settings	Description
Sleep Mode Profile	Print from Sleep Mode	Stay awake after printing Enter Sleep Mode after printing*	Set the printer to stay awake or enter Sleep Mode after printing.
	Touch to Wake from Deep Sleep	Off On*	Wake the printer from Deep Sleep Mode .
Note: An asterisk (*) next to a value indicates the factory default setting.			

Menu item	Submenu item	Settings	Description
Timeouts	Sleep Mode	1–114 minutes (15*)	Set the idle time before the printer begins operating in Sleep Mode .
	Hibernate Timeout	Disabled 1 hour 2 hours 3 hours 6 hours 1 day 2 days 3 days* 1 week 2 weeks 1 month	Set the time before the printer turns off.
	Hibernate Timeout on Connection	Hibernate Do Not Hibernate*	Set Hibernate Timeout to turn off the printer while an active Ethernet connection exists.
Schedule Power Modes	Schedules	Add New Schedule	Schedule the printer when to enter Sleep Mode or Hibernate mode .
Note: An asterisk (*) next to a value indicates the factory default setting.			

Share Data with Lexmark

Menu item	Settings	Description
Share Data with Lexmark	Yes No*	Send printer usage and performance information to Lexmark.
Share Data Send Time	Start Time Stop Time	Select the time window for data collection and transmission. Note: Share Data Send Time appears only when you select Yes in Share Data with Lexmark .
Note: An asterisk (*) next to a value indicates the factory default setting.		

Accessibility

Menu item	Settings	Description
Duplicate Key Strike Interval	0.00–5.00 (0.00*)	Set the interval in seconds during which the printer ignores duplicate key presses on an attached keyboard.
Key Repeat Initial Delay	0.25–5.00 (1.00*)	Set the initial length of delay in seconds before a repeating key starts repeating.
Key Repeat Rate	0.5–30.0 (30.0*)	Set the number of presses per second for a repeating key.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Menu item	Settings	Description
Prolong Screen Timeout	Off* On	Let the user remain in the same location and reset the Screen Timeout timer when it expires instead of returning to the home screen.
Headphone Volume	1–10 (5*)	Adjust the headphone volume.
Enable Voice Guidance When Headphone is Attached	Off* On	Enable Voice Guidance when headphones are inserted into the headphone jack.
Speak Passwords/PINs	Off* On	Set the printer to read out loud passwords or personal identification numbers.
Speech Rate	Very Slow Slow Normal* Fast Faster Very Fast Rapid Very Rapid Fastest	Set the Voice Guidance speech rate.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Restore Factory Defaults

Menu item	Settings	Description
Restore Settings	Restore all settings Restore printer settings Restore network settings Restore app settings	Restore the printer factory default settings.

Maintenance

Configuration Menu

Menu item	Submenu item	Settings	Description
USB Configuration	USB PnP	1* 2	Change the USB driver mode of the printer to improve its compatibility with a personal computer.
	USB Speed	Full Auto*	Set the USB port to run at full speed and disable its high-speed capabilities.
Note: An asterisk (*) next to a value indicates the factory default setting.			

Menu item	Submenu item	Settings	Description
Tray Configuration	Size Sensing	Tray [x] Sensing (On*)	Set the tray to sense automatically the paper size loaded into it.
	Tray Linking	Automatic* Off	Set the printer to link the trays that have the same paper type and paper size settings.
	Show Tray Insert Message	Off Only for unknown sizes* Always	Display a message that lets the user change the paper size and paper type settings after inserting the tray.
	Paper Prompts	Auto* Multipurpose Feeder Manual Paper	Set the paper source that the user fills when a prompt to load paper appears. Note: For Multipurpose Feeder to appear, in the Paper menu, set Configure MP to Cassette .
	Envelope Prompts	Auto* Multipurpose Feeder Manual Envelope	Set the paper source that the user fills when a prompt to load envelope appears. Note: For Multipurpose Feeder to appear, in the Paper menu, set Configure MP to Cassette .
	Action for Prompts	Prompt user* Continue Use current	Set the printer to resolve paper- or envelope-related change prompts.
	Multiple Universal Sizes	Off* On	Set the tray to support multiple universal paper sizes.
Reports	N/A	Menu Settings Page Event Log Event Log Summary	Print reports about printer menu settings, status, and event logs.
Note: An asterisk (*) next to a value indicates the factory default setting.			

Menu item	Submenu item	Settings	Description

	Reset Roller Kit Counter	Start	
	Tiered Coverage Ranges	Tiered Coverage Metrics (Show*)	Show the Tiered Coverage Billing section on the Device Statistics report.
		Tiered Coverage Ranges	
	Large Media Adjustments	Off* On	Allow adjustments when printing for large or thick paper.
Note: An asterisk (*) next to a value indicates the factory default setting.			

Menu item	Submenu item	Settings	Description
Printer Emulations	PPDS Emulation	Off* On	Set the printer to recognize and use the PPDS data stream.
	PS Emulation	Off On*	Set the printer to recognize and use the PS data stream.
	Enable Formsmerge	Off* On	Activate Forms Merge. Notes: <ul style="list-style-type: none">• The Formsmerge license must be installed.• A user flash memory must be installed.
	Enable Prescribe	Off* On	Activate the PRESCRIBE printer language. Note: The PRESCRIBE license must be installed.
	Emulator Security	Page Timeout (60*)	Set the page timeout during emulation.
		Reset Emulator After Job (Off*)	Reset the emulator after a print job.
		Disable Printer Message Access (On*)	Determine whether the emulator can access the initial printer setup or not.

Note: An asterisk (*) next to a value indicates the factory default setting.

Menu item	Submenu item	Settings	Description
Print Configuration	Black Only Mode	Off* On	Print non-copy jobs in grayscale.
	Color Trapping	Off 1 2* 3 4 5	Enhance the printed output to compensate for misregistration in the printer.
	Font Sharpening	0–150 (24*)	Set a text point-size value below which the high-frequency screens are used when printing font data. For example, if the value is 24, then all fonts sized 24 points or less use the high-frequency screens.
	Use Native ISD Fonts	On* Off	Let the user choose whether to use the free fonts that are in the intelligent storage drive (ISD). Note: This menu item appears only when an ISD is installed.
Note: An asterisk (*) next to a value indicates the factory default setting.			

Menu item	Submenu item	Settings	Description
Device Operations	Quiet Mode	Off* On	Adjust the amount of noise that the printer produces. Note: Enabling this setting slows down the overall performance of the printer.
	Safe Mode	Off* On	Set the printer to operate in a special mode where it offers as much functionality as possible despite known issues. For example, when set to On and the duplex motor is nonfunctional, one-sided printing is performed even if a job is set to two-sided printing. Note: Enabling this setting allows printing only from the multipurpose feeder.
	Clear Custom Status	Start	Erase user-defined strings for the Default or Alternate custom messages.
	Clear all remotely-installed messages	Start	Erase messages that were remotely installed.
	Automatically Display Error Screens	Off On*	Show existing error messages on the display after the printer remains inactive on the home screen for a length of time.
	Service Nonvolatile Memory	Encryption Status	Show the encryption status of the storage drive.
		Encrypt Service Nonvolatile Memory	Enable mirror encryption manually.
Toner patch sensor setup	Calibration frequency preference	Disabled Fewest color adjustments Fewer color adjustments Normal* Better color accuracy Best color accuracy	Set the printer to put down the correct amount of toner to maintain color consistency.
	Full calibration	Start	Run the full color calibration.
	Print TPS information page	Start	Print a diagnostic page that contains information on toner patch sensor calibration.

Note: An asterisk (*) next to a value indicates the factory default setting.

Menu item	Submenu item	Settings	Description
App Configuration	LES Applications	Off On*	Enable Lexmark Embedded Solutions (LES) applications.
Note: An asterisk (*) next to a value indicates the factory default setting.			

Out of Service Erase

Menu item	Submenu item	Settings	Description
Out of Service Erase	Memory Last Sanitized	The setting is a read-only information.	Show when the printer memory was last erased.
	Hard Disk Last Sanitized	The setting is a read-only information.	Show when hard disk was last erased. Note: This menu item appears only when a hard disk is installed.
	ISD last erased	The setting is a read-only information.	Show when the intelligent storage drive (ISD) was last erased. Note: This menu item appears only when an ISD is installed.
	Sanitize all information on nonvolatile memory	Erase all printer and network settings Erase all apps and app settings	Clear all information on nonvolatile memory.
	Sanitize all information on hard disk	Erase downloads (Erases all macros, fonts, PFOs, etc.) Erase buffered jobs Erase Held Jobs	Clear all information on the hard disk. Note: This menu item appears only when a hard disk is installed.
	Erase Intelligent Storage Drive	Cryptographically erase all user data on ISD	Clear all information on the ISD. Note: This menu item appears only when an ISD is installed.

Update firmware

Menu item	Settings	Description
Current Version	The setting is a read-only information.	Show the current firmware version installed on the printer.
Check for updates now	Install now Install later	Check for firmware updates.

Menu item	Settings	Description
Auto check for updates	On Off*	Set the printer to check for firmware updates automatically.

About this Printer

Menu item	Description
Asset Tag	Specify the identity of the printer.
Printer's Location	Specify the printer location.
Contact	Specify the contact information for the printer.
Firmware Version	Show the firmware version installed on the printer.
Engine	Show the engine number of the printer.
Serial Number	Show the serial number of the printer.
Export Configuration File to USB	Export the configuration file to a flash drive.
Export Compressed Logs to USB	Export the compressed log files to a flash drive.
Send Logs	Send printer log information to Lexmark.

Print

Layout

Menu item	Settings	Description
Sides	1-Sided 2-Sided*	Specify whether to print on one side or both sides of the paper.
Flip Style	Long Edge* Short Edge	Determine which side of the paper is bound when performing two-sided printing.
Blank Pages	Print Do Not Print*	Print blank pages that are included in a print job.
Collate	Off (1,1,1,2,2,2) On (1,2,1,2,1,2)*	Keep the pages of a print job stacked in sequence, particularly when printing multiple copies of the job.
Separator Sheets	None* Between Copies Between Jobs Between Pages	Insert blank separator sheets when printing.
Separator Sheet Source	Tray [x] (1*) Multipurpose Feeder	Specify the paper source for the separator sheet.

Note: An asterisk (*) next to a value indicates the factory default setting.

Menu item	Settings	Description
Pages per Side	Off* 2 pages per side 3 pages per side 4 pages per side 6 pages per side 9 pages per side 12 pages per side 16 pages per side	Print multiple page images on one side of a sheet of paper.
Pages per Side Ordering	Horizontal* Reverse Horizontal Vertical Reverse Vertical	Specify the positioning of multiple page images when using the Pages per Side menu.
Pages per Side Orientation	Auto* Landscape Portrait	Specify the orientation of multiple page images when using the Pages per Side menu.
Pages per Side Border	None* Solid	Print a border around each page image when using the Pages per Side menu.
Copies	1–9999 (1*)	Specify the number of copies for each print job.
Print Area	Normal* Fit to page Whole Page	Set the printable area on a sheet of paper.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Finishing

Menu item	Settings	Description
Staple Job	Off* 1 staple, top left corner 2 staples, left 1 staple, top right corner 2 staples, top 1 staple, bottom left corner 2 staples, bottom 1 staple, bottom right corner 2 staples, right	Specify the staple position for all print jobs. Note: This menu item appears only when a staple finisher is installed.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Menu item	Settings	Description
Staple Test	Start	Determine whether the staple finisher is functioning properly. Note: This menu item appears only when a staple finisher is installed.
Hole Punch	Off* On	Punch holes along the edge of the printed output. Note: This menu item appears only when a staple, hole punch finisher is installed.
Hole Punch Mode	2 holes 3 holes 4 holes	Set the hole punch mode for the printed output. Notes: <ul style="list-style-type: none"> • 3 holes is the U.S. factory default setting. 4 holes is the international factory default setting. • This menu item appears only when a staple, hole punch, or booklet finisher is installed.
Offset Pages	None* Between Copies Between Jobs	Offset the output of each print job or each copy of a print job. Notes: <ul style="list-style-type: none"> • Between Copies offsets each copy of a print job if Collate is set to On [1,2,1,2,1,2]. If Collate is set to Off [1,1,1,2,2,2], then each set of printed pages is offset, such as all pages designated as 1 and all pages designated as 2. • Between Jobs sets the same offset position for the entire print job regardless of the number of copies printed.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Setup

Menu item	Settings	Description
Printer Language	PCL Emulation PS Emulation*	Set the printer language. Note: Setting a printer language default does not prevent a software program from sending print jobs that use another printer language.
Job Waiting	Off* On	Preserve print jobs requiring supplies so that jobs not requiring the missing supplies can print. Note: This menu item appears only when a storage drive is installed.
Job Hold Timeout	0–255 (30*)	Set the time in seconds that the printer waits for user intervention before it holds jobs that require unavailable resources. Note: This menu item appears only when a storage drive is installed.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Menu item	Settings	Description
Download Target	RAM* Flash Disk	Specify where to save all permanent resources that have been downloaded to the printer. Note: This menu item appears only when a storage drive is installed.
Printer Usage	Max Speed Max Yield*	Determine if the retraction hardware disengages or engages the color developer units during printing. Notes: <ul style="list-style-type: none"> When set to Max Yield, the hardware remains engaged with the color developer units when the printer is idle. When set to Max Speed, the hardware remains engaged with the color developer units regardless of whether a job contains mono or color content.
Low-Speed Printer Usage	Max Yield* Max Speed	Let the printer switch between high-yield (black only mode) and high-speed (color mode) when running at low speed. Note: This setting only changes printer behavior when the print engine is running at a 25 pages-per-minute process speed. It has no effect when the print engine is running at faster process speeds.
Resource Save	Off* On	Determine what the printer does with downloaded resources when it receives a job that requires more than the available memory. Notes: <ul style="list-style-type: none"> When set to Off, the printer retains downloaded resources only until memory is needed. Resources associated with the inactive printer language are deleted. When set to On, the printer preserves all the permanent downloaded resources across all language switches. When necessary, the printer shows memory full messages instead of deleting permanent resources.
Print All Order	Alphabetical* Newest First Oldest First	Specify the order when you choose to print all held and confidential jobs.
Automatic Deletion of Suspended Print Jobs	Off* On	Set the printer to cancel automatically the queued print jobs that are interrupted by errors such as paper jams and missing supplies.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Quality

Menu item	Submenu item	Settings	Description
Print Mode	N/A	Black and White Color*	Set how the printer generates color content.
Print Resolution	N/A	4800 CQ* 1200 dpi	Set the resolution for the printed output. Note: 4800 CQ provides high-quality output at maximum speed.
Toner Darkness	N/A	1 to 5 (4*)	Determine the lightness or darkness of text images.
Halftone	N/A	Normal* Detail	Enhance the printed output to have smoother lines with sharper edges.
Color Saver	N/A	Off* On	Reduce the amount of toner used to print graphics and images. Note: When set to On , this setting overrides the value of the Toner Darkness setting.
RGB Brightness	N/A	-6 to 6 (0*)	Adjust the brightness of every RGB and gray object on the page. Note: This setting does not affect files where CMYK color specifications are used.
RGB Contrast	N/A	0 to 5 (0*)	Adjust the contrast of every RGB and gray object on a page. Note: This setting does not affect files where CMYK color specifications are used.
RGB Saturation	N/A	0 to 5 (0*)	Preserve the black and white values while adjusting the color values of every object on the page. Note: This setting does not affect files where CMYK color specifications are used.
Note: An asterisk (*) next to a value indicates the factory default setting.			

Menu item	Submenu item	Settings	Description
Advanced Imaging	Color Balance	Cyan (0*) Magenta (0*) Yellow (0*) Black (0*)	Adjust the amount of toner that is used for each color.
		Reset Defaults	Reset all color settings to their default values.
	Color Correction	Off Auto* Manual	Modify the color settings that are used to print documents. Notes: <ul style="list-style-type: none"> • Off—sets the printer to receive the color correction from the software. • Auto—sets the printer to apply different color profiles to each object on the printed page. • Manual—allows the customization of the RGB or CMYK color conversions applied to each object on the printed page.
		Color Samples	Print Color Samples
	Color Adjust	Color Adjust	Print sample pages for each of the RGB and CMYK color conversion tables that are used in the printer.
	Spot Color Replacement	Set Custom CMYK	Calibrate the printer to adjust color variations in the printed output. Assign specific CMYK values to 20 named spot colors.
Note: An asterisk (*) next to a value indicates the factory default setting.			

Job Accounting

Menu item	Settings	Description
Job Accounting	Off* On	Set the printer to create a log of the print jobs that it receives.
Accounting Log Frequency	Daily Weekly Monthly*	Specify how often the printer creates a log file.
Log Action at End of Frequency	None* E-mail Current Log E-mail & Delete Current Log Post Current Log Post & Delete Current Log	Specify how the printer responds when the frequency threshold expires. Note: The value defined in Accounting Log Frequency determines when this action is triggered.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Menu item	Settings	Description
Log Near Full Level	On* (5MB) Off	Specify the maximum size of the log file before the printer executes the Log Action at Near Full . Note: This menu item appears only when a storage drive is installed.
Log Action at Near Full	None* E-mail Current Log E-mail & Delete Current Log E-mail & Delete Oldest Log Post Current Log Post & Delete Current Log Post & Delete Oldest Log Delete Current Log Delete Oldest Log Delete All But Current Delete All Logs	Specify how the printer responds when a storage drive is nearly full. Note: The value defined in Log Near Full Level determines when this action is triggered.
Log Action at Full	None* E-mail & Delete Current Log E-mail & Delete Oldest Log Post & Delete Current Log Post & Delete Oldest Log Delete Current Log Delete Oldest Log Delete All But Current Delete All Logs	Specify how the printer responds when a storage drive usage reaches the maximum limit (100MB).
URL to Post Log	The setting is user-defined.	Specify where the printer posts job accounting logs.
E-mail Address to Send Logs	The setting is user-defined.	Specify the email address to which the printer sends job accounting logs.
Log File Prefix	The setting is user-defined.	Specify the prefix for the log files. Note: The current host name defined in the TCP/IP menu is used as the default log file prefix.
Note: An asterisk (*) next to a value indicates the factory default setting.		

PDF

Menu item	Settings	Description
Scale To Fit	Off* On	Scale the page content to fit the selected paper size.
Annotations	Print Do Not Print*	Specify whether to print annotations in the PDF.
Print PDF Error	Off On*	Enable the printing of PDF error.

Note: An asterisk (*) next to a value indicates the factory default setting.

PostScript

Menu item	Settings	Description
Print PS Error	Off* On	Print a page that describes the PostScript® emulation error. Note: When an error occurs, processing of the job stops, the printer prints an error message, and the rest of the print job is flushed.
Minimum Line Width	1–30 (2*)	Set the minimum stroke width. Note: Jobs printed in 1200 dpi use the value directly.
Lock PS Startup Mode	Off On*	Disable the SysStart file. Note: Enabling the SysStart file exposes your printer or network to a security risk.
Image Smoothing	Off* On	Enhance the contrast and sharpness of low-resolution images. Note: This setting has no effect on images with a resolution of 300 dpi or higher.
Font Priority	Resident* Flash/Disk	Establish the font search order. Notes: <ul style="list-style-type: none"> • Resident—sets the printer to search its memory for the requested font before searching the storage drive. • Flash/Disk—sets the printer to search the storage drive for the requested font before searching the printer memory. • This menu item appears only when a storage drive is installed.
Wait Timeout	Off On*	Enable the printer to wait for more data before canceling a print job. Note: When set to On , 40 seconds is the factory default setting.

Note: An asterisk (*) next to a value indicates the factory default setting.

PCL

Menu item	Settings	Description
Font Source	Resident* Disk Download Flash Font Card All	Select the source which contains the default font selection. Notes: <ul style="list-style-type: none">• Disk—appears only and if a non-defective, non-read/write protected hard disk that contains fonts is installed.• Download—appears only if downloaded fonts exist in the printer memory.• Flash—appears only if a non-defective, non-read/write protected flash memory that contains fonts is installed.• Font Card—appears only if a valid font card is installed or an intelligent storage drive is configured.
Font Name	[List of available fonts] (Courier*)	Select a font from the specified font source.
Symbol Set	[List of available symbol sets] (10U PC-8*)	Specify the symbol set for each font name. Note: A symbol set is a set of alphabetic and numeric characters, punctuation, and special symbols. Symbol sets support the different languages or specific programs such as math symbols for scientific text.
Pitch	0.08–100.00 (10.00*)	Specify the pitch for fixed or monospaced fonts. Note: This menu item refers to the number of fixed-space characters in a horizontal inch of type.
Orientation	Portrait* Landscape Reverse Portrait Reverse Landscape	Specify the orientation of text and graphics on the page.
Lines per Page	1–255	Specify the number of lines of text for each page printed through the PCL® data stream. Notes: <ul style="list-style-type: none">• This menu item activates vertical escapement that causes the selected number of requested lines to print between the default margins of the page.• 60 is the U.S. factory default setting. 64 is the international factory default setting.
PCL5 Minimum Line Width	1–30 (2*)	Set the initial minimum stroke width value of any job printed in 1200 dpi through the applicable emulator.
PCLXL Minimum Line Width	1–30 (2*)	
Note: An asterisk (*) next to a value indicates the factory default setting.		

Menu item	Settings	Description
A4 Width	198 mm* 203 mm	Set the width of the logical page on A4-size paper. Note: Logical page is the space on the physical page where data is printed.
Auto CR after LF	On Off*	Set the printer to perform a carriage return after a line feed control command. Note: Carriage return is a mechanism that commands the printer to move the position of the cursor to the first position on the same line.
Auto LF after CR	On Off*	Set the printer to perform a line feed after a carriage return control command.
Tray Renumber	Assign MP Feeder Assign Tray [x] Assign Manual Paper Assign Manual Envelope	Configure the printer to work with a different print driver or custom application that uses a different set of source assignments to request a given paper source. Choose from the following options: Off* —The printer uses the factory default paper source assignments. None —The paper source ignores the Select Paper Feed command. 0–199 —Select a numeric value to assign a custom value to a paper source.
	View Factory Defaults	Show the factory default value assigned for each paper source.
	Restore Defaults	Restore the tray renumber values to their factory defaults.
Print Timeout	Off On* (90)	Set the printer to end a print job after it has been idle for the specified amount of time.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Image

Menu item	Settings	Description
Auto Fit	On Off*	Select the best available paper size and orientation setting for an image. Note: When set to On , this menu item overrides the scaling and orientation settings for the image.
Invert	Off* On	Invert bitonal monochrome images. Note: This menu item does not apply to GIF or JPEG image formats.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Menu item	Settings	Description
Scaling	Best Fit* Anchor Top Left Anchor Center Fit Height/Width Fit Height Fit Width	Adjust the image to fit the printable area. Note: When Auto Fit is set to On , Scaling is automatically set to Best Fit .
Orientation	Portrait* Landscape Reverse Portrait Reverse Landscape	Specify the orientation of text and graphics on the page.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Paper

Tray Configuration

Menu item	Submenu item	Settings	Description
Default Source	N/A	Tray [x] (1*) Multipurpose Feeder Manual Paper Manual Envelope	Set the default paper source for all print jobs.
Paper Size/Type	Tray [x] Multipurpose Feeder Manual Paper Manual Envelope	Size Type	Specify the paper size or paper type loaded in each paper source.
Substitute Size	N/A	Off Statement/A5 Letter/A4 11 x 17/A3 All Listed*	Set the printer to substitute a specified paper size if the requested size is not loaded in any paper source. Notes: <ul style="list-style-type: none"> • Off—prompts the user to load the required paper size. • All Listed—allows all available substitutions.
Note: An asterisk (*) next to a value indicates the factory default setting.			

Menu item	Submenu item	Settings	Description
Configure MP	N/A	Cassette* Manual First	<p>Determine the behavior of the multipurpose feeder.</p> <p>Notes:</p> <ul style="list-style-type: none"> • Cassette—configures the multipurpose feeder as the automatic paper source. • Manual—sets the multipurpose feeder only for manual-feed print jobs. • First—configures the multipurpose feeder as the primary paper source.
Note: An asterisk (*) next to a value indicates the factory default setting.			

Media Configuration

Menu item	Submenu item	Settings	Description
Units of Measure	N/A	Inches Millimeters	<p>Specify the unit of measurement for the universal paper.</p> <p>Note: Inches is the U.S. factory default setting. Millimeters is the international factory default setting.</p>
Universal Setup	All Input Trays	Portrait Width	Set the portrait width of the universal paper.
		Portrait Height	Set the portrait height of the universal paper.
		Feed Direction (Short Edge*)	<p>Set the printer to pick paper from the short edge or long edge direction.</p> <p>Note: Long Edge appears only when the longest edge is shorter than the maximum width supported.</p>
Media Type Setup	[List of paper types]	Texture Weight Loading Orientation Send to Bin	Specify the texture, weight, and orientation of the paper.
Note: An asterisk (*) next to a value indicates the factory default setting.			

Bin Configuration

Menu item	Settings	Description
Output Bin	Standard Bin* Bin [x]	Specify the output bin for the printer jobs.
Configure Bins	Mailbox* Link Link Optional Type Assignment	Configure the mode of operation for the output bins. Notes: <ul style="list-style-type: none"> • Mailbox—allows the standard bin and any optional bin to be selected individually. • Link—allows all output bins to be linked together as though they were one large bin. • Link Optional—treats all optional bins as one large output bin. • Type Assignment—assigns each paper type a bin or a linked bin set.
Custom Bin Names	Standard Bin Bin [x]	Assign a name for each bin.
Note: An asterisk (*) next to a value indicates the factory default setting.		

USB Drive

Flash Drive Print

Menu item	Settings	Description
Number of Copies	1–9999 (1*)	Set the number of copies in a print job.
Paper Source	Tray [x] (1*) Multipurpose Feeder Manual Paper Manual Envelope	Set the paper source for the print job.
Color	Off On*	Print the flash drive in color.
Collate	Off [1,1,1,2,2,2] On [1,2,1,2,1,2]*	Keep the pages of a print job stacked in sequence, particularly when printing multiple copies of the job.
Sides	1-Sided* 2-Sided	Specify whether to print on one side or both sides of the paper.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Menu item	Settings	Description
Staple	Off* 1 staple, top left corner 2 staples, left 1 staple, top right corner 2 staples, top 1 staple, bottom left corner 2 staples, bottom 1 staple, bottom right corner 2 staples, right	Specify the staple position for all print jobs. Note: This menu item appears only when a staple finisher is installed.
Hole Punch	Off* 2 holes 3 holes 4 holes	Set the punch mode for all print jobs. Note: This menu item appears only when a staple, hole punch, or booklet finisher is installed.
Offset Pages	None* Between Copies Between Jobs	Offset the output of each print job or each copy of a print job. Notes: <ul style="list-style-type: none"> • Between Copies—offsets each copy of a print job if Collate is set to On [1,2,1,2,1,2]. If Collate is set to Off [1,1,1,2,2,2], then each set of printed pages is offset, such as all pages designated as 1 and all pages designated as 2. • Between Jobs—sets the same offset position for the entire print job regardless of the number of copies printed.
Flip Style	Long Edge* Short Edge	Determine which side of the paper is bound when performing two-sided printing.
Pages per Side	Off* 2 pages per side 3 pages per side 4 pages per side 6 pages per side 9 pages per side 12 pages per side 16 pages per side	Print multiple page images on one side of a sheet of paper.
Pages per Side Ordering	Horizontal* Reverse Horizontal Reverse Vertical Vertical	Specify the positioning of multiple page images when using the Pages per Side menu.
Pages per Side Orientation	Auto* Landscape Portrait	Specify the orientation of multiple page images when using the Pages per Side menu.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Menu item	Settings	Description
Pages per Side Border	None* Solid	Print a border around each page image when using the Pages per Side menu.
Separator Sheets	Off* Between Copies Between Jobs Between Pages	Insert blank separator sheets when printing.
Separator Sheet Source	Tray [x] (1*) Multipurpose Feeder	Specify the paper source for the separator sheet.
Blank Pages	Do Not Print* Print	Print blank pages in a print job.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Network/Ports

Network Overview

Menu item	Settings	Description
Active Adapter	Auto* Standard Network Wireless	Specify the type of the network connection. Note: Wireless is available only in printers connected to a wireless network.
Network Status	The setting is a read-only information.	Show the connectivity status of the printer network.
Display Network Status on Printer	Off On*	Show the network status on the display.
Speed, Duplex	The setting is a read-only information.	Show the speed of the currently active network card.
IPv4	The setting is a read-only information.	Show the IPv4 address.
All IPv6 Addresses	The setting is a read-only information.	Show all the IPv6 addresses.
Reset Print Server	Start	Reset all active network connections to the printer. Note: This setting removes all network configuration settings.
Network Job Timeout	Off On* (90 seconds)	Set the time before the printer cancels a network print job.
Banner Page	Off* On	Print a banner page.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Menu item	Settings	Description
Enable Network Connections	Off On*	Enable the printer to connect to a network.
Enable LLDP	Off* On	Show the network status on the home screen.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Wireless

Note: This menu is available only in printers connected to a Wi-Fi network or printers that have a wireless network adapter.

Menu item	Submenu item	Settings	Description
Setup On Printer Panel	Choose Network	[List of available wireless networks]	Determine the wireless network that the printer connects to.
	Add Wi-Fi Network	Network Name Network Mode (Infrastructure*) Wireless Security Mode (Disabled*)	Manually enter a network name and network type.
Wi-Fi Protected Setup	N/A	Start Push Button Method Start PIN Method	Establish a Wi-Fi network and enable network security. Notes: <ul style="list-style-type: none"> • Start Push-Button Method connects the printer to a Wi-Fi network when buttons on both the printer and the access point (wireless router) are pressed within a given time. • Start PIN Method connects the printer to a Wi-Fi network when a PIN on the printer is entered into the wireless settings of the access point.
Network Mode	N/A	BSS Type Infrastructure*	Specify the network mode.

Menu item	Submenu item	Settings	Description
Compatibility	N/A	802.11b/g/n (2.4GHz)* 802.11a/b/g/n/ac (2.4GHz/5GHz) 802.11a/n/ac (5GHz)	Specify the standard for the Wi-Fi network. Note: 802.11a/b/g/n/ac (2.4GHz/5GHz) and 802.11a/n/ac (5GHz) appear only when a Wi-Fi option is installed.
Wireless Security Mode	N/A	Disabled* WPA2/WPA-Personal WPA2-Personal WPA3/WPA-Personal WPA3-Personal 802.1x - RADIUS	Set the security mode for connecting the printer to Wi-Fi devices.
WPA2/WPA Personal	N/A	AES	Enable Wi-Fi security through Wi-Fi Protected Access (WPA). Note: This menu item appears only when the Wireless Security Mode is set to WPA2/WPA-Personal .
Set PSK	N/A	The setting is user-defined.	Set the password for a secure Wi-Fi connection.
WPA2-Personal	N/A	AES	Enable Wi-Fi security through WPA2. Note: This menu item appears only when the Wireless Security Mode is set to WPA2-Personal .
802.1x Encryption Mode	N/A	WPA+ WPA2*	Enable Wi-Fi security through the 802.1x standard. Notes: <ul style="list-style-type: none"> This menu item appears only when the Wireless Security Mode is set to 802.1x - RADIUS. 802.1x - RADIUS can be configured only from the Embedded Web Server.
IPv4	Enable DHCP	On* Off	Enable and configure the IPv4 settings in the printer.
	Set Static IP Address	IP Address Netmask Gateway	

Menu item	Submenu item	Settings	Description
IPv6	Enable IPv6	On* Off	Enable and configure the IPv6 settings in the printer.
	Enable DHCPv6	On Off*	
	Stateless Address Autoconfiguration	On* Off	
	DNS Server Address	The setting is user-defined.	
	Manually Assigned IPv6 Address	The setting is user-defined.	
	Manually Assigned IPv6 Router	The setting is user-defined.	
	Address Prefix	The setting is user-defined.	
	All IPv6 Addresses	The setting is user-defined.	
	All IPv6 Router Addresses	The setting is user-defined.	
Network Address	N/A	UAA LAA	View the network addresses.
PCL SmartSwitch	N/A	Off On*	Set the printer to switch automatically to PCL emulation when a print job requires it, regardless of the default printer language. Note: If PCL SmartSwitch is set to Off , then the printer does not examine incoming data and uses the default printer language specified in the Setup menu.
PS SmartSwitch	N/A	Off On*	Set the printer to switch automatically to PS emulation when a print job requires it, regardless of the default printer language. Note: If PS SmartSwitch is set to Off , then the printer does not examine incoming data and uses the default printer language specified in the Setup menu.
Job Buffering	N/A	On Off*	Temporarily store print jobs in the storage drive before printing. Note: This menu item appears only when a storage device is installed.

Menu item	Submenu item	Settings	Description
Mac Binary PS	N/A	Auto* On Off	<p>Set the printer to process Macintosh binary PostScript emulation print jobs.</p> <p>Notes:</p> <ul style="list-style-type: none"> • On processes raw binary PostScript emulation print jobs. • Off filters print jobs using the standard protocol.

Wi-Fi Direct

Menu item	Settings	Description
Enable Wi-Fi Direct	On Off*	Set the printer to connect directly to Wi-Fi devices.
Wi-Fi Direct Name	The setting is user-defined.	Specify the name of the Wi-Fi Direct network.
Wi-Fi Direct Password	The setting is user-defined.	Set the password to authenticate and validate users on a Wi-Fi connection.
Show Password on Setup Page	Off On*	Show the Wi-Fi Direct Password on the Network Setup Page .
Preferred Channel Number	1–11 Auto*	Set the preferred channel of the Wi-Fi network.
Group Owner IP Address	The setting is user-defined.	Specify the IP address of the group owner.
Auto-Accept Push Button Requests	Off* On	<p>Accept requests to connect to the network automatically.</p> <p>Note: Accepting clients automatically is not secured.</p>
Note: An asterisk (*) next to a value indicates the factory default setting.		

Mobile Services Management

Menu item	Settings	Description
Enable IPP Print	On* Off	Enable a network printer to print jobs using Internet Printing Protocol (IPP).
Enable IPP Over USB	On* Off	<p>Enable a USB printer to print jobs using IPP.</p> <p>Note: IPP is normally designed for network printers.</p>
Enable Mopria Discovery	On* Off	Enable mobile devices to discover a Mopria™ certified printer.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Ethernet

Menu item	Submenu item	Settings	Description
Network Speed	N/A	The setting is a read-only information.	Show the speed of the active network adapter.
IPv4	Enable DHCP	On* Off	Configure the IPv4 settings. Note: The settings are user-defined.
	Set Static IP Address	IP Address Netmask Gateway	
IPv6	Enable IPv6	On* Off	Configure the IPv6 settings.
	Enable DHCPv6	Off* On	
	Stateless Address Autoconfiguration	On* Off	
	DNS Server Address	The setting is user-defined.	
	Manually Assigned IPv6 Address	The setting is user-defined.	
	Manually Assigned IPv6 Router	The setting is user-defined.	
	Address Prefix (64*)	0–128 (64*)	
	All IPv6 Addresses	The setting is a read-only information.	
	All IPv6 Router Addresses	The setting is a read-only information.	
Network Address	N/A	UAA LAA	Specify the network address.
PCL SmartSwitch	N/A	Off On*	Set the printer to switch automatically to PCL emulation when a print job requires it, regardless of the default printer language. Note: When this setting is disabled, the printer does not examine incoming data and uses the default printer language specified in the Setup menu.
Note: An asterisk (*) next to a value indicates the factory default setting.			

Menu item	Submenu item	Settings	Description
PS SmartSwitch	N/A	Off On*	Set the printer to switch automatically to PostScript emulation when a print job requires it, regardless of the default printer language. Note: When this setting is disabled, the printer does not examine incoming data and uses the default printer language specified in the Setup menu.
Job Buffering	N/A	Off* On	Temporarily store jobs on the storage drive before printing. Note: This menu item appears only when a storage drive is installed.
Mac Binary PS	N/A	Auto* Off On	Set the printer to process Macintosh binary PostScript emulation print jobs. Notes: <ul style="list-style-type: none"> • Auto processes print jobs from computers using either Windows or Macintosh operating systems. • Off filters PostScript emulation print jobs using the standard protocol.
Energy Efficient Ethernet	N/A	On Off Auto*	Reduce power consumption when the printer does not receive data from the Ethernet network.
Note: An asterisk (*) next to a value indicates the factory default setting.			

TCP/IP

Note: This menu appears only in network printers or printers attached to print servers.

Menu item	Settings	Description
Set Hostname	The setting is user-defined.	Set the current TCP/IP host name.
Domain Name	The setting is user-defined.	Set the domain name.
Allow DHCP/BOOTP to update NTP server	On* Off	Allow the Dynamic Host Configuration Protocol (DHCP) and BOOTstrap Protocol (BOOTP) clients to update the NTP settings of the printer.
Zero Configuration Name	The setting is user-defined.	Specify a service name for the zero configuration network.
Enable Auto IP	Off On*	Assign an IP address automatically.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Menu item	Settings	Description
DNS Server Address	The setting is user-defined.	Specify the current Domain Name System (DNS) server address.
Backup DNS Server Address	The setting is user-defined.	Specify the backup DNS server addresses.
Backup DNS Server Address 2		
Backup DNS Server Address 3		
Domain Search Order	The setting is user-defined.	Specify a list of domain names to locate the printer and its resources that reside in different domains on the network.
Enable DDNS	Off* On	Update the Dynamic DNS settings.
DDNS TTL	The setting is user-defined.	Specify the current DDNS settings.
Default TTL		
DDNS Refresh Time		
Enable mDNS	Off On*	Update the multicast DNS settings.
WINS Server Address	The setting is user-defined.	Specify a server address for Windows Internet Name Service (WINS).
Enable BOOTP	Off* On	Allow the BOOTP to assign a printer IP address.
Restricted Server List	The setting is user-defined.	Specify the IP addresses that are allowed to communicate with the printer over TCP/IP. Notes: <ul style="list-style-type: none"> • Use a comma to separate each IP address. • You can add up to 50 IP addresses.
Restricted Server List Options	Block All Ports* Block Printing Only Block Printing and HTTP Only	Specify the access option for IP addresses that are not in the list.
MTU	256–1500 Ethernet (1500*)	Specify a maximum transmission unit (MTU) parameter for the TCP connections.
Raw Print Port	1–65535 (9100*)	Specify a raw port number for printers connected on a network.
Outbound Traffic Maximum Speed	Off* On	Set the maximum transfer rate of the printer. Note: When enabled, the option for this setting is 100–1000000 Kilobits/second.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Menu item	Settings	Description
TLS Support	Enable TLSv1.0 (Off*) Enable TLSv1.1 (Off*) Enable TLSv1.2 (On*)	Enable the Transport Layer Security protocol.
SSL Cipher List	The setting is user-defined.	Specify the cipher algorithms to use for the SSL or the TLS connections.
TLSv1.3 SSL Cipher List		
Note: An asterisk (*) next to a value indicates the factory default setting.		

SNMP

Note: This menu appears only in network printers or printers that are attached to print servers.

Menu item	Submenu Item	Settings	Description
SNMP Versions 1 and 2c	Enabled	Off On*	Configure Simple Network Management Protocol (SNMP) versions 1 and 2c to install print drivers and applications.
	Allow SNMP Set	Off On*	
	Enable PPM MIB	Off On*	
	SNMP Community	The setting is user-defined.	
SNMP Version 3	Enabled	Off On*	Enable the SNMP version 3 to install and update the printer security.
	Context Name	The setting is user-defined.	Enter the context name.
	Set Read/Write Credentials	Username Authentication Password Privacy Password	Enter the read and write credentials for SNMP version 3.
	Set Read-only Credentials	Username Authentication Password Privacy Password	Enter the read-only credentials for SNMP version 3.
	Authentication Hash	MD5 SHA1*	Set the applicable authentication hash.
	Minimum Authentication Level	No Authentication, No Privacy Authentication, No Privacy Authentication, Privacy*	Set the applicable minimum authentication level.
	Privacy Algorithm	DES AES-128*	Set the applicable privacy algorithm.
Note: An asterisk (*) next to a value indicates the factory default setting.			

IPSec

Note: This menu appears only in network printers or printers that are attached to print servers.

Menu item	Settings	Description
Enable IPSec	Off* On	Enable Internet Protocol Security (IPSec).
Base Configuration	Default* Compatibility Secure	Set the IPSec base configuration. Note: This menu item appears only when Enable IPSec is set to On .
DH (Diffie-Hellman) Group Proposal	modp2048 (14)* modp3072 (15) modp4096 (16) modp6144 (17)	Set the IPSec base configuration. Note: This menu item appears only when Base Configuration is set to Compatibility .
Proposed Encryption Method	3DES AES*	Set the encryption method. Note: This menu item appears only when Base Configuration is set to Compatibility .
Proposed Authentication Method	SHA1 SHA256* SHA512	Set the authentication method. Note: This menu item appears only when Base Configuration is set to Compatibility .
IKE SA Lifetime (Hours)	1 2 4 8 24*	Specify the IKE SA expiry period. Note: This menu item appears only when Base Configuration is set to Secure .
IPSec SA Lifetime (Hours)	1 2 4 8 24*	Specify the IPSec SA expiry period. Note: This menu item appears only when Base Configuration is set to Secure .
IPSec Device Certificate	default*	Specify an IPSec certificate. Note: This menu item appears only when Enable IPSec is set to On .
Pre-Shared Key Authenticated Connections	Host [x]	Configure the authenticated connections of the printer. Note: These menu items appear only when Enable IPSec is set to On .
Certificate Authenticated Connections	Host [x] Address[/subnet]	
Note: An asterisk (*) next to a value indicates the factory default setting.		

802.1x

Note: This menu appears only in network printers or printers that are attached to print servers.

Menu item	Submenu Items	Settings	Description
Active	N/A	Off* On	Let the printer join networks that require authentication before allowing access.
802.1x Authentication	Device Login Name	The setting is user-defined.	Specify the unique login name.
	Device Login Password	The setting is user-defined.	Specify the unique password.
	Validate Server Certificate	On* Off	Enable this option to require verification of the security certificate on the authenticating server.
	Enable Event Logging	On Off*	Enable the printer to record connection logs.
	802.1x Device Certificate	default*	Select the digital certificate that you want to use. Note: If only one certificate is installed, then default is the only option that appears.
Note: An asterisk (*) next to a value indicates the factory default setting.			

Menu item	Submenu Items	Settings	Description
Authentication Mechanism	EAP - MD5	On* Off	Enable the Extensible Authentication Protocol (EAP) MD5 framework.
	EAP - MSCHAPv2	On* Off	Enable the EAP Microsoft Challenge Handshake Authentication Protocol (MSCHAP) version 2 authentication method.
	LEAP	On* Off	Enable Lightweight Extensible Authentication Protocol (LEAP), a modified version of MSCHAP.
	PEAP	On* Off	Enable Protected Extensible Authentication Protocol (PEAP), a method that provides more secure authentication for 802.11 WLANs. PEAP supports 802.1x port access control.
	EAP - TLS	On* Off	Enable EAP Transport Layer Security (TLS), a protocol in which the client and server authenticate each other using digital certificates.
	EAP - TTLS	On* Off	Enable EAP tunneled Transport Layer Security (TLS), a protocol similar to EAP_TLS except that only the server has a certificate to authenticate itself to the client first.
	TTLS Authentication Method	CHAP MSCHAP MSCHAPv2* PAP	Select which EAP TTLS method to use for your device.
Note: An asterisk (*) next to a value indicates the factory default setting.			

LPD Configuration

Note: This menu appears only in network printers or printers that are attached to print servers.

Menu item	Settings	Description
LPD Timeout	0–65535 seconds (90*)	Set the timeout value to stop the Line Printer Daemon (LPD) server from waiting indefinitely for hung or invalid print jobs.
LPD Banner Page	Off* On	Print a banner page for all LPD print jobs. Note: A banner page is the first page of a print job used as a separator of print jobs and to identify the originator of the print job request.
LPD Trailer Page	Off* On	Print a trailer page for all LPD print jobs. Note: A trailer page is the last page of a print job.
LPD Carriage Return Conversion	Off* On	Enable carriage return conversion. Note: Carriage return is a mechanism that commands the printer to move the position of the cursor to the first position on the same line.
Note: An asterisk (*) next to a value indicates the factory default setting.		

HTTP/FTP Settings

Menu item	Submenu Item	Settings	Description
Proxy	HTTP Proxy IP Address	The setting is user-defined.	Configure the HTTP server settings.
	HTTP Default IP Port	The setting is user-defined.	Configure the HTTP default IP port address. Note: The factory default port for HTTP is 80.
	FTP Proxy IP Address	The setting is user-defined.	Configure the FTP settings.
	FTP Default IP Port	The setting is user-defined.	Configure the FTP default IP port address. Note: The factory default port for HTTP is 21.
	Authentication	None Auto* Basic Digest NTLM	Specify the authentication credentials.
	Username	The setting is user-defined.	Specify the unique username.
	Password	The setting is user-defined.	Specify the unique password.
	Local Domains	The setting is user-defined.	Specify domain names for HTTP and FTP servers.
Other Settings	Enable HTTP Server	On* Off	Access the Embedded Web Server to monitor and manage the printer.
	Enable HTTPS	On* Off	Enable Hypertext Transfer Protocol Secure (HTTPS) to encrypt data transferring to and from the print server.
	Force HTTPS Connections	On Off*	Force the printer to use HTTPS connections.
	Enable FTP/TFTP	On* Off	Send files using FTP/TFTP.
	HTTPS Device Certificate	default*	View the HTTP device certificate used on the printer.
	Timeout for HTTP/FTP Requests	1–299 seconds (30*)	Specify the amount of time before the server connection stops.
	Retries for HTTP/FTP Requests	1–299 seconds (3*)	Set the number of retries to connect to the HTTP/FTP server.
Note: An asterisk (*) next to a value indicates the factory default setting.			

ThinPrint

Menu item	Settings	Description
Enable ThinPrint	Off* On	Print using ThinPrint.
Port Number	4000–4999 (4000*)	Set the port number for the ThinPrint server.
Bandwidth (bits/sec)	100–1000000 (0*)	Set the speed to transmit data in a ThinPrint environment.
Packet Size (kbytes)	0–64000 (0*)	Set the packet size for data transmission.
Note: An asterisk (*) next to a value indicates the factory default setting.		

USB

Menu item	Settings	Description
PCL SmartSwitch	Off On*	Set the printer to switch to PCL emulation when a print job received through a USB port requires it, regardless of the default printer language. Note: When this setting is disabled, the printer does not examine incoming data and uses the default printer language specified in the Setup menu.
PS SmartSwitch	Off On*	Set the printer to switch to PostScript emulation when a print job received through a USB port requires it, regardless of the default printer language. Note: When this setting is disabled, the printer does not examine incoming data and uses the default printer language specified in the Setup menu.
Job Buffering	Off* On	Temporarily store jobs on the storage drive before printing. Note: This menu item appears only when a storage drive is installed.
Mac Binary PS	Auto* On Off	Set the printer to process Macintosh binary PostScript emulation print jobs. Notes: <ul style="list-style-type: none"> • Auto processes print jobs from computers using either Windows or Macintosh operating systems. • Off filters PostScript emulation print jobs using the standard protocol.
Enable USB Port	Off On*	Enable the front and rear USB drive ports.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Restrict external network access

Menu item	Settings	Description
Restrict external network access	Off* On	Restrict access to network sites.
External network address	The setting is user-defined.	Specify the network addresses with restricted access.
Email address for notification	The setting is user-defined.	Specify an email address to send a notification of logged events.
Ping frequency	1–300 (10*)	Specify the network query interval in seconds.
Subject	The setting is user-defined.	Specify the subject and message of the notification email.
Message		
Note: An asterisk (*) next to a value indicates the factory default setting.		

Security

Login Methods

Manage Permissions

Menu item	Settings	Description
Function Access	Access Address Book in Apps Modify Address Book Manage Shortcuts Create Profiles Manage Bookmarks Flash Drive Print Flash Drive Color Printing Held Jobs Access Use Profiles Cancel Jobs at the Device Change Language Internet Printing Protocol (IPP) Initiate Scans Remotely B/W Print Color Print	Specify the printer functions that the user can access. Note: Some menu items appear only when a storage drive is installed.

Menu item	Settings	Description
Administrative Menus	Security Menu Network/Ports Menu Paper Menu Reports Menu Function Configuration Menus Supplies Menu Option Card Menu SE Menu Device Menu	Control access to the printer menu settings.
Device Management	Remote Management Firmware Updates Apps Configuration Embedded Web Server Access Import / Export All Settings Out of Service Erase Cloud Services Enrollment	Specify the Device Management functions that the user can access.
Apps	New Apps Slideshow Change Wallpaper Screen Saver	Control access to the printer apps.

Local Accounts

Menu item	Submenu Item	Settings	Description
Manage Groups/Permissions	Add Group	The setting is user-defined.	Specify the groups that have access to printer functions, administrative menus, printer management options, and apps.
	All Users	Import Access Controls	Import access controls from accounts enrolled in the printer.
Add User	Username/Password Username Password PIN	The setting is user-defined.	Add a user and specify the login method to the printer.

Default Login Methods

Note: This menu appears only when the **Local Accounts** menu is configured.

Menu item	Settings	Description
Control Panel	Username/Password Username Password PIN	Specify the default login method to access the control panel.
Browser	Username/Password Username Password PIN	Specify the default login method to access the browser.

Schedule USB Devices

Menu item	Submenu items	Settings	Description
Schedules	Add New Schedule	Save Schedule Action Day(s) Time	Schedule access to the front USB port.

Security Audit Log

Menu item	Settings	Description
Enable Audit	Off* On	Set the printer to record the events in the secure audit log and remote syslog.
Enable Remote Syslog	Off* On	Set the printer to send audit logs to a remote server.
Remote Syslog Server	The setting is user-defined.	Specify the remote syslog server.
Remote Syslog Port	1-65535 (514*)	Specify the port over which the printer sends logged events to a remote server.
Remote Syslog Method	Normal UDP* Stunnel	Identify the protocol that the printer uses to transmit logged events to a remote server.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Menu item	Settings	Description
Remote Syslog Facility	0 - Kernel Messages 1 - User-Level Messages 2 - Mail System 3 - System Daemons 4 - Security/Authorization Messages* 5 - Messages Generated Internally by Syslogs 6 - Line Printer Subsystem 7 - Network News Subsystem 8 - UUCP Subsystem 9 - Clock Daemon 10 - Security/Authorization Messages 11 - FTP Daemon 12 - NTP Subsystem 13 - Log Audit 14 - Log Alert 15 - Clock Daemon 16 - Local Use 0 (local0) 17 - Local Use 1 (local1) 18 - Local Use 2 (local2) 19 - Local Use 3 (local3) 20 - Local Use 4 (local4) 21 - Local Use 5 (local5) 22 - Local Use 6 (local6) 23 - Local Use 7 (local7)	Specify a Facility value that the printer uses when sending log events to the remote syslog server.
Severity of Events to Log	0 - Emergency 1 - Alert 2 - Critical 3 - Error 4 - Warning* 5 - Notice 6 - Informational 7 - Debug	Specify the severity value of each event.
Remote Syslog Non-Logged Events	Off* On	Set the printer to send any applicable events.
Admin's Email Address	The setting is user-defined.	Specify the email address of the printer administrator that are notified of certain log events.
Email Log Cleared Alert	Off* On	Set the printer to send an email to the administrator every time a log is deleted.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Menu item	Settings	Description
Email Log Wrapped Alert	Off* On	Set the printer to send the administrator an email when log entries are wrapping.
Log Full Behavior	Wrap Over Oldest Entries* Email Log Then Delete All Entries	Determine how the printer resolves log storage issues when the log fills its allotted memory.
Email % Full Alert	Off* On	Set the printer to send the administrator an email when the log fills its allotted memory.
% Full Alert Level	1–99 (90*)	Determine if the space occupied by the log equals or exceeds the value of the full alert level.
Email Log Exported Alert	Off* On	Send an email notification to the administrator when a log is exported.
Email Log Settings Changed Alert	Off* On	Set the printer to send an email to the administrator when the value of the Enable Audit menu is changed.
Log Line Endings	LF (\n)* CR (\r) CRLF (\r\n)	Determine how the printer handles line endings in the log file, depending on the operating system that the file is parsed or viewed.
Digitally Sign Exports	Off* On	Set the printer to sign exported security logs automatically.
Clear Log	The setting is user-defined.	Delete all audit logs.
Export Log	Syslog (RFC 5424) Syslog (RFC 3164) CSV	Export logs from the printer or flash drive.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Login Restrictions

Menu item	Settings	Description
Login failures	1–10 (3*)	Specify the number of failed login attempts before the user is locked out.
Failure time frame	1–60 minutes (5*)	Specify the time frame that failed login attempts are allowed before the user is locked out.
Lockout time	1–60 minutes (5*)	Specify the amount of time where no logins are allowed.
Web Login Timeout	1–120 minutes (10*)	Specify the amount of time that a remote interface such as a web page can remain idle before the user is logged off automatically.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Confidential Print Setup

Menu item	Settings	Description
Max Invalid PIN	2–10	Set the limit for entering an invalid PIN. Note: When the limit is reached, the print jobs for that username are deleted.
Confidential Job Expiration	Off* 1 Hour 4 Hours 24 Hours 72 Hours 1 Week	Set an individual expiration time for each type of held job before the printer deletes it automatically from memory. Notes: <ul style="list-style-type: none"> The types of held jobs are Confidential, Repeat, Reserve, and Verify. If the expiration time setting is changed while confidential print jobs reside on the printer memory or printer hard disk, then the expiration time for those print jobs does not change to the new default value. If the printer is turned off, then all confidential jobs held in the printer memory are deleted.
Repeat Job Expiration	Off* 1 Hour 4 Hours 24 Hours 72 Hours 1 Week	Set the expiration time for print jobs that you want to repeat.
Verify Job Expiration	Off* 1 Hour 4 Hours 24 Hours 72 Hours 1 Week	Set the expiration time for printing a copy of a job for you to check its quality before printing the remaining copies.
Reserve Job Expiration	Off* 1 Hour 4 Hours 24 Hours 72 Hours 1 Week	Set the expiration time for jobs that you want to store in the printer for printing later.
Require All Jobs to be Held	Off* On	Set the printer to hold all print jobs.
Keep duplicate documents	Off* On	Set the printer to keep all documents with the same file name.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Encryption

Menu item	Settings	Description
Internal Storage	The setting is a read-only information.	Show the encryption status of the internal storage.
Hard Disk	The setting is a read-only information.	Show the encryption status of the hard disk. Note: This menu item appears only when a hard disk is installed.
Intelligent Storage Drive	The setting is a read-only information.	Show the encryption status of the intelligent storage drive (ISD). Note: This menu item appears only when an ISD is installed.

Erase Temporary Data Files

Menu item	Settings	Description
Stored in onboard memory	Off* On	Set the printer to erase all the data of a job from its memory after the job is finished.
Stored on hard disk	1 Pass Erase* 3 Pass Erase 7 Pass Erase	Specify the method that the printer uses to erase all the data of a job from the hard disk after the job is finished. Note: This menu item appears only when a printer hard disk is installed.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Solutions LDAP Settings

Menu item	Settings	Description
Follow LDAP Referrals	Off* On	Search the different servers in the domain for the logged-in user account.
LDAP Certificate Verification	Yes No*	Enable verification of LDAP certificates.

Miscellaneous

Menu item	Settings	Description
Protected Features	Show* Hide	Show all the features that Function Access Control (FAC) protects regardless of the security permission that the user has. Note: Hide displays only FAC-protected features that the user has access.
Print Permission	Off* On	Require the user to log in before printing.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Menu item	Settings	Description
Default Print Permission Login	Username/Password* Username	Set the default login for Print Permission .
Security Reset Jumper	Enable “Guest” access* No Effect	Specify user access to the printer. Notes: <ul style="list-style-type: none"> • Enable “Guest” access gives anyone access to all aspects of the printer. • No Effect may make access to the printer impossible when the required security information is unavailable.
Use Intelligent Storage Drive for User Data	Off On*	Enable the intelligent storage drive to store user data. Note: This menu item is disabled when a hard disk is installed.
Minimum Password Length	0–32 (0*)	Specify the minimum password length that is used for internal accounts such as Password and Username/Password accounts.
Enable Password/PIN Reveal	Off On*	Show the password or personal identification number.
Allow Encryption of Service Nonvolatile Memory	Off* On	Enable the encryption of service nonvolatile memory in your device. Note: This setting is available if Encrypt Service Nonvolatile Memory is disabled.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Cloud Services

Cloud Services Enrollment

Menu item	Settings	Description
View More Information	The setting is a read-only information.	View more information on the usage of Lexmark Cloud Services.
Enable communication with Lexmark Cloud Services	Off* On	Enable the printer to communicate with Lexmark Cloud Services.
View Current Status	The setting is a read-only information.	View the connection status between the printer and Lexmark Cloud Services.
Note: An asterisk (*) next to a value indicates the factory default setting.		

Reports

Menu Settings Page

Menu item	Description
Menu Settings Page	Print a report that contains the printer menus.

Device

Menu item	Description
Device Information	Print a report that contains information about the printer.
Device Statistics	Print a report about supply status, paper count, job information, and more.
Profiles List	Print a list of profiles that are stored in the printer.
Asset Report	Print a diagnostic tool for print problems. Note: To avoid clipping the content, print the report on Letter- or A4-size paper.

Print

Menu item	Settings	Description
Print Fonts	PCL Fonts PS Fonts	Print samples and information about the fonts that are available in each printer language.
Print Demo	Demo Page	Print a diagnostic tool for print problems. Notes: <ul style="list-style-type: none"> To avoid clipping the content, print the report on Letter- or A4-size paper. This menu item appears only when the printer has a demo page installed.
Print Directory	The setting is user-defined.	Print a report that shows the resources that are stored in the flash drive or printer hard disk.

Network

Menu item	Description
Network Setup Page	Print a page that shows the configured network and wireless settings on the printer. Note: This menu item appears only in network printers or printers connected to print servers.
Wi-Fi Direct Connected Clients	Print a page that shows the list of devices that are connected to the printer using Wi-Fi Direct. Note: This menu item appears only when Enable Wi-Fi Direct is set to On .

Troubleshooting

Menu item	Description
Print Quality Test Pages	Print sample pages to identify and correct print quality defects.

Forms Merge

Note: This menu item appears only when a storage drive is installed.

Menu item	Submenu item	Settings	Description
Merge Mode	N/A	Print* Data Capture Disabled	Specify the mode of operation for Forms Merge.
Data Capture Target	N/A	Flash*	Set the target destination where the captured data is forwarded. Note: This menu item appears only when Merge Mode is set to Data Capture .
Print Port and Filter Settings	Network Port	On* Off	Enable Forms Merge to process all data that are sent to the network port.
	Network Filter	Disabled* NULL OFIS OFIS+NULL OFIS+AS400 AS400 PCL ZPL ZPLF	Specify the network filter for all data that are sent to the printer.
	USB Port	On* Off	Enable Forms Merge to process all data that are sent to the USB port.
	USB Filter	Disabled* NULL OFIS OFIS+NULL OFIS+AS400 AS400 PCL ZPL ZPLF	Specify the USB filter for all data that are sent to the printer.
	Local Port Timeout	1–100 (10*)	Specify the time-out value for Forms Merge jobs that are sent to the local port.
Note: An asterisk (*) next to a value indicates the factory default setting.			

Menu item	Submenu item	Settings	Description
Miscellaneous	Print All Forms	Start	Print all form sets that are stored in the intelligent storage drive or hard disk.
	Error Page Print	On* Off	Enable printing of an error page when an error is encountered in a Forms Merge job.
Note: An asterisk (*) next to a value indicates the factory default setting.			

Printing the Menu Settings Page

- 1 From the control panel, navigate to **Settings > Reports**.
- 2 Select **Menu Settings Page**.

Printer finisher options

Using the staple finisher

Stapling using the print driver

For Windows users

- 1 With a document open, click **File > Print**.
- 2 Select a printer, and then click **Properties, Preferences, Options, or Setup**.
- 3 Click **Paper/Finishing**, and then configure the **Paper** settings.
- 4 In the **Staple** menu, select a setting.
- 5 Click **OK**, and then click **Print**.

For Macintosh users

- 1 With a document open, choose **File > Print**.
- 2 Select a printer.
- 3 From the **Finishing Options** menu, select **Apply Finishings > Printer Options**.
- 4 Click **Staple**, and then select a setting.
- 5 Click **Print**.

Stapling using the control panel

- 1 From the control panel, select **Print**, and then select the source of the print job.
- 2 Select the document.
- 3 Select **More Settings**, and then select **Finishing Options**.
- 4 Select **Staple**, and then select a setting.
- 5 Print the document.

Using the staple, hole-punch finisher

Stapling or punching paper using the print driver

For Windows users

- 1 With a document open, click **File > Print**.
- 2 Select a printer, and then click **Properties, Preferences, Options, or Setup**.
- 3 Click **Paper/Finishing**, and then configure the **Paper** settings.

- 4 Depending on the finishing that you want, select a setting for **Staple** or **Hole punch**.

Note: You can select a setting for both if you want to staple and punch the printed materials.

- 5 Click **OK**, and then click **Print**.

For Macintosh users

- 1 With a document open, click **File > Print**.
- 2 Select a printer.
- 3 From the **Finishing Options** menu, select **Apply Finishings > Printer Options**.
- 4 Click **Staple** or **Punch**, and then select a setting.
- 5 Click **Print**.

Stapling or punching paper using the control panel

- 1 From the control panel, select **Print**, and then select the source of the print job.
- 2 Select the document.
- 3 Select **More Settings**, and then select **Finishing Options**.
- 4 Depending on the finishing that you want, select a setting for **Staple** or **Hole punch**.

Note: You can select a setting for both if you want to staple and punch the printed materials.
- 5 Print the document.

Using the offset stacker

Offset stacking using the print driver

For Windows users

- 1 With a document open, click **File > Print**.
- 2 Select a printer, and then click **Properties, Preferences, Options, or Setup**.
- 3 Click **Paper/Finishing**, and then configure the **Paper** settings.
- 4 In the **Offset** menu, select a setting.
- 5 Click **OK**, and then click **Print**.

For Macintosh users

- 1 With a document open, click **File > Print**.
- 2 Select a printer.
- 3 From the **Finishing Options** menu, select **Apply Finishings > Printer Options**.
- 4 Click **Offset**, and then select a setting.
- 5 Click **Print**.

Offset stacking using the control panel

- 1 Load an original document into the ADF tray or on the scanner glass.

Note: To avoid a cropped image, make sure that the original document and output have the same paper size.

- 2 From the control panel, select **Copy**, and then specify the number of copies.
- 3 Select **More Settings**, and then select **Offset Pages**.
- 4 Enable the menu, and then select a setting.
- 5 Print the document.

Using the booklet finisher

Note: Before creating a booklet, load paper with the short edge toward the right side of the tray.

Creating a booklet using the print driver

For Windows users

- 1 With a document open, click **File > Print**.
- 2 Select a printer, and then click **Properties, Preferences, Options, or Setup**.
- 3 Select **Booklet**.
- 4 Click the **Paper/Finishing** tab, and then configure the paper settings.
- 5 In the **Fold** menu, select a setting.
- 6 Click **OK**, and then click **Print**.

For Macintosh users

- 1 With a document open, click **File > Print**.
- 2 Select a printer.
- 3 From the **Finishing Options** menu, select **Apply Finishings > Printer Options**.
- 4 Select **Booklet**, and then select a **Fold** setting.
- 5 Click **OK**.

Creating a booklet using the control panel

- 1 Load an original document into the ADF tray or on the scanner glass.

Note: To avoid a cropped image, make sure that the original document and output have the same paper size.

- 2 From the control panel, select **Copy**, and then configure the settings.
- 3 Select **More Settings**, and then select **Create Booklet**.
- 4 Enable **Booklet Finishing**, and then select a setting.
- 5 Copy the document.

Using the paper transport with folding option

Folding paper using the print driver

For Windows users

- 1 With a document open, click **File > Print**.
- 2 Select a printer, and then click **Properties, Preferences, Options, or Setup**.
- 3 Click **Paper/Finishing**, and then configure the paper settings.
- 4 In the **Fold** menu, select a setting.
- 5 Click **OK**, and then click **Print**.

For Macintosh users

- 1 With a document open, choose **File > Print**.
- 2 Select a printer.
- 3 From the **Finishing Options** menu, select **Apply Finishings > Printer Options**.
- 4 Click **Fold**, and then select a setting.
- 5 Click **Print**.

Folding paper using the control panel

- 1 Load an original document into the ADF tray or on the scanner glass.
Note: To avoid a cropped image, make sure that the original document and output have the same paper size.
- 2 From the control panel, select **Copy**, and then specify the number of copies.
- 3 Select **More Settings**, and then select **Finishing Options**.
- 4 Select **Fold**, and then select a setting.
- 5 Copy the document.

Maintain the printer

Warning—Potential Damage: Failure to maintain optimum printer performance, or to replace parts and supplies, may cause damage to your printer.

Checking the status of parts and supplies

- 1 From the upper-right corner of the control panel, select .
- 2 View the status of the printer parts and supplies.

Note: You can also select  to check notifications that require user intervention.

Configuring supply notifications

- 1 Open a web browser, and then type the printer IP address in the address field.

Notes:

- View the printer IP address on the printer home screen. The IP address appears as four sets of numbers separated by periods, such as 123.123.123.123.
- If you are using a proxy server, then temporarily disable it to load the web page correctly.

- 2 Click **Settings > Device > Notifications**.
- 3 Click **Custom Supply Notifications**.
- 4 Select a notification for each supply item.
- 5 Apply the changes.

Setting up email alerts

- 1 Open a web browser, and then type the printer IP address in the address field.

Notes:

- View the printer IP address on the printer home screen. The IP address appears as four sets of numbers separated by periods, such as 123.123.123.123.
- If you are using a proxy server, then temporarily disable it to load the web page correctly.

- 2 Click **Settings > Device > Notifications**.
- 3 Click **Email Alert Setup**, and then configure the settings.

Note: For more information on SMTP settings, contact your email provider.

- 4 Apply the changes.
- 5 Click **Setup Email Lists and Alerts**, and then configure the settings.
- 6 Apply the changes.

Generating reports and logs

- 1 From the control panel, navigate to **Settings > Reports**.
- 2 Select the report or log that you want to print.
 - **Menu Settings Page**—Show the current printer preferences, settings, and configurations.
 - **Device**
 - Device Information**—Show the printer serial number, installed solutions, and fax.
 - Device Statistics**—Show supply status, total printed sheets, and printer job information.
 - Profiles List**—Show a list of profiles or shortcuts that are stored in the printer.
 - Asset Report**—Show the report containing printer asset information, such as serial number and model name.
 - **Print**
 - Print Fonts**—Show the fonts that are available in each printer language.
 - Print Demo**—Show the demo files that are available in the firmware, the flash option, and the disk option.
 - Print Directory**—Show the resources that are stored on the flash drive, hard disk, or intelligent storage drive (ISD).

Note: The report appears only when a flash drive, a printer hard disk, or an ISD is installed.
 - **Network**
 - Network Setup Page**—Show the configured network and wireless settings on the printer.

Note: This report appears only in network printers and printers connected to print servers.

 - Wi-Fi Direct Connected Clients**—Show the list of devices that are connected to the printer using Wi-Fi Direct.

Note: This report appears only when **Enable Wi-Fi Direct** is set to **On**.

Ordering parts and supplies

To order supplies in the U.S., contact Lexmark at 1-800-539-6275 for information about Lexmark authorized supplies dealers in your area. In other countries or regions, go to www.lexmark.com or contact the place where you purchased the printer.

Note: All life estimates for printer supplies assume printing on letter- or A4-size plain paper.

Warning—Potential Damage: Failure to maintain optimum printer performance, or to replace parts and supplies, may cause damage to your printer.

Using genuine Lexmark parts and supplies

Your Lexmark printer is designed to function best with genuine Lexmark parts and supplies. Use of third-party supplies or parts may affect the performance, reliability, or life of the printer and its imaging components. It can also affect warranty coverage. Damage caused by the use of third-party parts and supplies is not covered by the warranty. All life indicators are designed to function with Lexmark parts and supplies, and may deliver unpredictable results if third-party parts and supplies are used. Imaging component usage beyond the intended life may damage your Lexmark printer or its associated components.

Warning—Potential Damage: Supplies and parts without Return Program agreement terms may be reset and remanufactured. However, the manufacturer's warranty does not cover any damage caused by non-genuine supplies or parts. Resetting counters on the supply or part without proper remanufacturing can cause damage to your printer. After resetting the supply or part counter, your printer may display an error indicating the presence of the reset item.

Ordering a toner cartridge

Notes:

- The estimated cartridge yield is based on the ISO/IEC 19798 standard.
- Extremely low print coverage for extended periods of time may negatively affect actual yield.

Return Program toner cartridges for Lexmark CS963

Item	United States, Canada, Australia, and New Zealand	European Union, European Economic Area, Iceland, Liechtenstein, Norway, Switzerland	Rest of Asia Pacific	Latin America, Puerto Rico, and Mexico	Rest of Europe, Middle East, Africa, Central Eastern Europe, Commonwealth of Independent States

Ordering a black imaging unit

Item	Part number
Return Program Black imaging unit	77L0ZK0
Black imaging unit	77L0Z10

Ordering a color imaging kit

Item	Part number
Return Program color imaging kit	77L0ZV0
Regular color imaging kit	77L0Z50

Ordering the waste toner bottle

Item	Part number
Waste toner bottle	77LOW00

Ordering a staple cartridge

Item	Part number
Staple cartridge (4-pack) ¹	20L7500
Staple cartridge (3-pack) ²	25A0013
¹ Available only for the booklet maker.	
² Available only for the booklet finisher, staple finisher, and staple, hole punch finisher.	

Ordering a maintenance kit

Match the maintenance kit to the printer voltage.

Notes:

- Using certain types of paper may require more frequent replacement of the maintenance kit.

- The maintenance kit includes a fuser and pick tires. These parts may be individually ordered and replaced if necessary.

Item	Part number
100 V Return Program fuser maintenance kit, Type 02	41X5654
110-120 V Return Program fuser maintenance kit, Type 00	41X5655
220-240 V Return Program fuser maintenance kit, Type 01	41X5656
100 V Regular fuser maintenance kit, Type 12	41X6053
110-120 V Regular fuser maintenance kit, Type 10	41X6051
220-240 V Regular fuser maintenance kit, Type 11	41X6052
Note: Only an authorized service technician can replace the maintenance kit. Contact your service provider.	

Replacing parts and supplies

Replacing a toner cartridge

- 1 Open the front door.

2 Remove the used toner cartridge.

3 Unpack the new toner cartridge.

- 4** Insert the new toner cartridge until it *clicks* into place.

- 5** Close the door.

Replacing the black imaging unit

- 1** Open the front door.

2 Remove the toner cartridges.**3** Remove the waste toner bottle.

Note: To avoid spilling the toner, place the bottle in an upright position.

4 Remove the imaging kit.

Warning—Potential Damage: Do not expose the imaging kit to direct light. Extended exposure to light may cause print quality problems.

Warning—Potential Damage: Do not touch the photoconductor drum. Doing so may affect the quality of future print jobs.

Note: Place the imaging kit on a clean, flat surface and in an upright position to avoid scratching or damaging the photoconductor drum.

- 5** Unlock the used black imaging unit.

- 6** Remove the used black imaging unit.

- 7** Unpack the new black imaging unit.

8 Insert the new black imaging unit.

9 Lock the new black imaging unit in place.

10 Insert the imaging kit until it is fully seated.

11 Insert the waste toner bottle until it *clicks* into place.

12 Gently pull out the printhead wipers, and then clean the printhead lenses.

For more information on cleaning the printhead lenses, see [“Cleaning the printhead lenses” on page 353](#).

- 13** Insert the toner cartridges.

- 14** Close the door.

Replacing the color imaging kit

- 1** Open the front door.

2 Remove the toner cartridges.**3** Remove the waste toner bottle.

Note: To avoid spilling the toner, place the bottle in an upright position.

4 Remove the used imaging kit.

Note: Place the imaging kit on a clean, flat surface and in an upright position to avoid scratching or damaging the photoconductor drum.

5 Unlock the black imaging unit.

6 Remove the black imaging unit.

Note: Do not throw away the black imaging unit. It will be installed on the new imaging kit.

7 Unpack the new imaging kit.

Note: The imaging kit includes the imaging basket and the cyan, magenta, and yellow developer units.

Warning—Potential Damage: Do not expose the imaging kit to direct light. Extended exposure to light may cause print quality problems.

Warning—Potential Damage: Do not touch the photoconductor drum. Doing so may affect the quality of future print jobs.

- 8** Insert the black imaging unit into the new imaging kit.

- 9** Lock the black imaging unit in place.

- 10** Insert the new imaging kit until it is fully seated.

- 11** Insert the waste toner bottle until it *clicks* into place.

- 12** Gently pull out the printhead wipers, and then clean the printhead lenses.

For more information on cleaning the printhead lenses, see [“Cleaning the printhead lenses” on page 353](#).

- 13** Insert the toner cartridges.

- 14** Close the door.

Replacing the waste toner bottle

- 1** Open the front door.

- 2** Remove the used waste toner bottle.

Note: To avoid spilling the toner, place the bottle in an upright position.

3 Unpack the new waste toner bottle.

4 Insert the new waste toner bottle until it *clicks* into place, and then close the door.

Replacing the fuser

- 1 Turn off the printer.

- 2 Unplug the power cord from the electrical outlet, and then from the printer.

- 3 Open door B.

CAUTION—HOT SURFACE: The inside of the printer might be hot. To reduce the risk of injury from a hot component, allow the surface to cool before touching it.

- 4 Unlock, and then remove the used fuser.

- 5 Unpack the new fuser.

- 6 Insert the new fuser until it *clicks* into place, and then lock it.

- 7 Close door B.
- 8 Connect one end of the power cord to the printer, and then the other end to the electrical outlet.

CAUTION—POTENTIAL INJURY: To avoid the risk of fire or electrical shock, connect the power cord to an appropriately rated and properly grounded electrical outlet that is near the product and easily accessible.

- 9 Turn on the printer.

Replacing the tray insert

- 1 Pull out the used tray insert.

- 2 Unpack the new tray insert.

- 3 Insert the new tray insert.

Replacing the size guides in the optional 550-sheet tray

- 1 Pull out the tray.

2 Remove the used size guides.

3 Unpack the new size guides.

- 4 Insert the new size guides until they *click* into place.

- 5 Insert the tray.

Replacing the cover in the optional 550-sheet tray

- 1 Remove the used tray cover.

- 2 Unpack the new tray cover.

- 3** Insert the new tray cover until it clicks into place.

Replacing the booklet finisher top bin extension

- 1 Remove the used top bin extension.

- 2 Unpack the new top bin extension.

3 Insert the new top bin extension.

Replacing the hole punch box

Note: Depending on the finisher installed, the appearance of the hole punch box may vary.

- 1 Open the finisher door.

- 2 Remove the used hole punch box.

- 3 Unpack the new hole punch box.

- 4 Insert the new hole punch box.

- 5 Close the finisher door.

Replacing the standard bin

- 1 Remove the used standard bin.

- 2 Unpack the new standard bin.

3 Attach the new standard bin.

Replacing the fan cover

- 1 Remove the used fan cover.

- 2 Unpack the new cover.

3 Insert the new cover until it *clicks* into place.

Replacing the right cover

- 1 Remove the used right cover.

- 2 Unpack the new cover.

- 3 Insert the new cover until it *clicks* into place.

Replacing the paper transport connector cover

- 1 Remove the standard bin.

- 2 Remove the used paper transport connector cover.

- 3 Unpack the new connector cover.

- 4** Attach the new connector cover until it *clicks* into place.

5 Attach the standard bin.**Replacing the staple cartridge unit****Replacing the staple cartridge in the staple finisher**

- 1** Grab handle F, and then slide the staple finisher to the left.

2 Remove the staple cartridge holder.

3 Remove the empty staple cartridge.

- 4** Insert the new staple cartridge until it *clicks* into place.

- 5** Insert the staple cartridge holder until it *clicks* into place.

- 6** Slide the staple finisher to the right.

Replacing the staple cartridge in the staple, hole punch finisher

- 1 Open door H.

- 2 Pull out the green handle, and then remove the staple cartridge holder.

- 3** Remove the empty staple cartridge.

- 4** Unpack the new staple cartridge.

- 5** Insert the new staple cartridge until it *clicks* into place.

- 6** Insert the staple cartridge holder until it *clicks* into place.

- 7** Close door H.

Replacing the staple cartridge in the booklet finisher

- 1** Open door H.

- 2** Pull out the green handle, and then remove the staple cartridge holder.

- 3** Remove the empty staple cartridge.

- 4** Unpack the new staple cartridge.

5 Insert the new staple cartridge until it *clicks* into place.

6 Insert the staple cartridge holder until it *clicks* into place.

7 Close door H.

Replacing the staple cartridge holders in the booklet finisher

- 1 Open the finisher door.

- 2 Pull out the booklet maker, and then remove the used staple cartridge holders.

- 3 Unpack the new staple cartridge holders.

- 4 Insert the new staple cartridge holders.

- 5 Insert the booklet maker, and then close the finisher door.

Resetting the supply usage counters

- 1 From the control panel, navigate to **Settings > Device > Maintenance > Configuration Menu > Supply Usage And Counters**.
- 2 Select the counter that you want to reset.

Warning—Potential Damage: Supplies and parts without Return Program agreement terms may be reset and remanufactured. However, the manufacturer's warranty does not cover any damage caused by non-genuine supplies or parts. Resetting counters on the supply or part without proper remanufacturing can cause damage to your printer. After resetting the supply or part counter, your printer may display an error indicating the presence of the reset item.

Cleaning printer parts

Cleaning the printer

 **CAUTION—SHOCK HAZARD:** To avoid the risk of electrical shock when cleaning the exterior of the printer, unplug the power cord from the electrical outlet and disconnect all cables from the printer before proceeding.

Notes:

- Perform this task after every few months.
 - Damage to the printer caused by improper handling is not covered by the printer warranty.
- 1 Turn off the printer, and then unplug the power cord from the electrical outlet.
 - 2 Remove paper from the standard bin and multipurpose feeder.

- 3 Using a soft brush or vacuum, remove any dust, lint, and pieces of paper around the printer.
- 4 Using a damp, soft, lint-free cloth, wipe the outside of the printer.

Notes:

- Do not use household cleaners or detergents, as they may damage the finish of the printer.
- Make sure that all areas of the printer are dry after cleaning.

- 5 Connect the power cord to the electrical outlet, and then turn on the printer.

 **CAUTION—POTENTIAL INJURY:** To avoid the risk of fire or electrical shock, connect the power cord to an appropriately rated and properly grounded electrical outlet that is near the product and easily accessible.

Cleaning the touch screen

 **CAUTION—SHOCK HAZARD:** To avoid the risk of electric shock when cleaning the exterior of the printer, unplug the power cord from the electrical outlet and disconnect all cables from the printer before proceeding.

- 1 Turn off the printer, and then unplug the power cord from the electrical outlet.
- 2 Using a damp, soft, lint-free cloth, wipe the touch screen.

Notes:

- Do not use household cleaners or detergents as they may damage the touch screen.
- Make sure that the touch screen is dry after cleaning.

- 3 Connect the power cord to the electrical outlet, and then turn on the printer.

 **CAUTION—POTENTIAL INJURY:** To avoid the risk of fire or electrical shock, connect the power cord to an appropriately rated and properly grounded electrical outlet that is near the product and easily accessible.

Cleaning the printhead lenses

- 1 Open the front door.

2 Remove the toner cartridges.

3 Gently pull out the wiper until it stops.

Note: The wiper does not detach from the printer.

- 4** Push the wiper back into the printhead until it stops.

- 5** Repeat [step 3](#) and [step 4](#) three times for each printhead.

- 6** Insert the toner cartridges.

- 7** Close the front door.

Emptying the hole punch box

Note: Depending on the finisher installed, the appearance of the hole punch box may vary.

- 1 Open the finisher door.

- 2 Remove, and then empty the hole punch box.

- 3 Insert the hole punch box.

- 4 Close the finisher door.

Saving energy and paper

Configuring the power save mode settings

Sleep mode

- 1 From the control panel, navigate to **Settings > Device > Power Management > Timeouts > Sleep Mode**.
- 2 Set the amount of time that the printer stays idle before it enters **Sleep Mode**.

Hibernate mode

- 1 From the control panel, navigate to **Settings > Device > Power Management > Timeouts > Hibernate Timeout**.
- 2 Set the amount of time that the printer stays idle before it enters hibernate mode.

Notes:

- For **Hibernate Timeout** to work, set **Hibernate Timeout on Connection** to **Hibernate**.
- The Embedded Web Server is disabled when the printer is in hibernate mode.

Adjusting the brightness of the display

- 1 From the control panel, navigate to **Settings > Device > Preferences**.
- 2 In the **Screen Brightness** menu, adjust the setting.

Conserving supplies

- Print on both sides of the paper.

Note: Two-sided printing is the default setting in the printer.

- Print multiple pages on a single sheet of paper.
- Use the preview feature to see how the document looks like before printing it.
- Print one copy of the document to check its content and format for accuracy.

Moving the printer to another location

 **CAUTION—POTENTIAL INJURY:** If the printer weight is greater than 20 kg (44 lb), then it may require two or more people to lift it safely.

 **CAUTION—POTENTIAL INJURY:** To avoid the risk of fire or electrical shock, use only the power cord provided with this product or the manufacturer's authorized replacement.

 **CAUTION—POTENTIAL INJURY:** When moving the printer, follow these guidelines to avoid personal injury or printer damage:

- Make sure that all doors and trays are closed.
- Turn off the printer, and then unplug the power cord from the electrical outlet.
- Disconnect all cords and cables from the printer.
- If the printer has separate floor-standing optional trays or output options attached to it, then disconnect them before moving the printer.
- If the printer has a caster base, then carefully roll it to the new location. Use caution when passing over thresholds and breaks in flooring.
- If the printer does not have a caster base but is configured with optional trays or output options, then remove the output options and lift the printer off the trays. Do not try to lift the printer and any options at the same time.
- Always use the handholds on the printer to lift it.
- Any cart used to move the printer must have a surface able to support the full footprint of the printer.
- Any cart used to move the hardware options must have a surface able to support the dimensions of the options.
- Keep the printer in an upright position.
- Avoid severe jarring movements.
- Make sure that your fingers are not under the printer when you set it down.
- Make sure that there is adequate clearance around the printer.

Note: Damage to the printer caused by improper moving is not covered by the printer warranty.

Printing problems

Print quality is poor

Blank or white pages

Notes:

- Before solving the problem, print the Print Quality Test Pages. From the control panel, navigate to **Settings > Troubleshooting > Print Quality Test Pages**.
- Use tray 1 to print the sample pages and make sure that the paper is loaded in the portrait orientation.

Try one or more of the following:

- Make sure that all packing material is removed from the imaging kit, imaging unit, and toner cartridges.
- Check if the printer is using a genuine and supported Lexmark toner cartridge.

Note: If the cartridge is not supported, then install a supported one.

- Make sure that the imaging kit and black imaging unit are properly installed.

1 Remove the imaging kit, and then remove the black imaging unit.

Warning—Potential Damage: Do not expose the imaging kit and black imaging unit to direct light for more than 10 minutes. Extended exposure to light may cause print quality problems.

Warning—Potential Damage: Do not touch the photoconductor drum under the imaging kit and black imaging unit. Doing so may affect the quality of future print jobs.

2 Insert the black imaging unit, and then insert the imaging kit.

If the problem persists, then contact [customer support](#).

Dark print

Notes:

- Before solving the problem, print the Print Quality Test Pages. From the control panel, navigate to **Settings > Troubleshooting > Print Quality Test Pages**.
- Use tray 1 to print the sample pages and make sure that the paper is loaded in the portrait orientation.

Try one or more of the following:

- From the control panel, navigate to **Settings > Print > Quality > Advanced Imaging**, and then select **Color Adjust**.
- Depending on your operating system, reduce the toner darkness from the Printing Preferences or Print dialog.

Note: You can also change the setting on the printer control panel. Navigate to **Settings > Print > Quality > Toner Darkness**.

- Depending on your operating system, specify the paper type from the Printing Preferences or Print dialog. Make sure that the setting matches the paper loaded in the tray.

Note: You can also change the setting on the printer control panel. Navigate to **Settings > Paper > Tray Configuration > Paper Size/Type**.

- Make sure that the paper does not have a texture or rough finish.
- Load paper from a fresh package.

Note: Paper absorbs moisture due to high humidity. Store the paper in its original wrapper until you are ready to use it.

If the problem persists, then contact [customer support](#).

Ghost images**Notes:**

- Before solving the problem, print the Print Quality Test Pages. From the control panel, navigate to **Settings > Troubleshooting > Print Quality Test Pages**.
- Use tray 1 to print the sample pages and make sure that the paper is loaded in the portrait orientation.

Try one or more of the following:

- Load the tray with the correct paper type and weight.
- Depending on your operating system, specify the paper type from the Printing Preferences or Print dialog. Make sure that the setting matches the paper loaded in the tray.

Note: You can also change the setting on the printer control panel. Navigate to **Settings > Paper > Tray Configuration > Paper Size/Type**.

- From the control panel, navigate to **Settings > Print > Quality > Advanced Imaging**, and then select **Color Adjust**.

If the problem persists, then contact [customer support](#).

Gray or colored background

Notes:

- Before solving the problem, print the Print Quality Test Pages. From the control panel, navigate to **Settings > Troubleshooting > Print Quality Test Pages**.
- Use tray 1 to print the sample pages and make sure that the paper is loaded in the portrait orientation.

Try one or more of the following:

- Depending on your operating system, increase the toner darkness from the Printing Preferences or Print dialog.

Note: You can also change the setting on the printer control panel. Navigate to **Settings > Print > Quality > Toner Darkness**.

- From the control panel, navigate to **Settings > Print > Quality > Advanced Imaging**, and then select **Color Adjust**.
- Make sure that the imaging kit and black imaging unit are properly installed.

- 1 Remove the imaging kit, and then remove the black imaging unit.

Warning—Potential Damage: Do not expose the imaging kit and black imaging unit to direct light for more than 10 minutes. Extended exposure to light may cause print quality problems.

Warning—Potential Damage: Do not touch the photoconductor drum under the imaging kit and black imaging unit. Doing so may affect the quality of future print jobs.

- 2 Insert the black imaging unit, and then insert the imaging kit.

If the problem persists, then contact [customer support](#).

Incorrect margins

Try one or more of the following:

- Adjust the paper guides in the tray to the correct position for the paper loaded.
- Depending on your operating system, specify the paper size from the Printing Preferences or Print dialog. Make sure that the setting matches the paper loaded.

Note: You can also change the setting on the printer control panel. Navigate to **Settings > Paper > Tray Configuration > Paper Size/Type**.

If the problem persists, then contact [customer support](#).

Light print**Notes:**

- Before solving the problem, print the Print Quality Test Pages. From the control panel, navigate to **Settings > Troubleshooting > Print Quality Test Pages**.
- Use tray 1 to print the sample pages and make sure that the paper is loaded in the portrait orientation.

Try one or more of the following:

- Make sure that all packing material is removed from the imaging kit, imaging unit, and toner cartridges.
- From the control panel, navigate to **Settings > Print > Quality > Advanced Imaging**, and then select **Color Adjust**.
- Depending on your operating system, increase the toner darkness from the Printing Preferences or Print dialog.

Note: You can also change the setting on the printer control panel. Navigate to **Settings > Print > Quality > Toner Darkness**.

- From the control panel, navigate to **Settings > Print > Quality**, and then turn off **Color Saver**.
- Depending on your operating system, specify the paper type from the Printing Preferences or Print dialog. Make sure that the setting matches the paper loaded.

Note: You can also change the setting on the printer control panel. Navigate to **Settings > Paper > Tray Configuration > Paper Size/Type**.

- Make sure that the paper does not have a texture or rough finish.
- Load paper from a fresh package.

Note: Paper absorbs moisture due to high humidity. Store the paper in its original wrapper until you are ready to use it.

- Make sure that the imaging kit and black imaging unit are properly installed.

1 Remove the imaging kit, and then remove the black imaging unit.

Warning—Potential Damage: Do not expose the imaging kit and black imaging unit to direct light for more than 10 minutes. Extended exposure to light may cause print quality problems.

Warning—Potential Damage: Do not touch the photoconductor drum under the imaging kit and black imaging unit. Doing so may affect the quality of future print jobs.

2 Insert the black imaging unit, and then insert the imaging kit.

If the problem persists, then contact [customer support](#).

Missing colors

Notes:

- Before solving the problem, print the Print Quality Test Pages. From the control panel, navigate to **Settings > Troubleshooting > Print Quality Test Pages**.
- Use tray 1 to print the sample pages and make sure that the paper is loaded in the portrait orientation.

Try one or more of the following:

- Make sure that all packing material is removed from the imaging kit, imaging unit, and toner cartridges.
- Remove the developer unit of the missing color.

1 Remove the imaging kit.

Warning—Potential Damage: Do not expose the imaging kit and black imaging unit to direct light for more than 10 minutes. Extended exposure to light may cause print quality problems.

Warning—Potential Damage: Do not touch the photoconductor drum under the imaging kit and black imaging unit. Doing so may affect the quality of future print jobs.

2 Remove, and then insert the developer unit of the missing color.

3 Insert the imaging kit.

If the problem persists, then contact [customer support](#).

Mottled print and dots

Notes:

- Before solving the problem, print the Print Quality Test Pages. From the control panel, navigate to **Settings > Troubleshooting > Print Quality Test Pages**.
- Use tray 1 to print the sample pages and make sure that the paper is loaded in the portrait orientation.

Try one or more of the following:

- Check the printer for leaked toner contamination.
- Make sure that the paper size and paper type settings match the paper loaded. From the control panel, navigate to **Settings > Paper > Tray Configuration > Paper Size/Type**.

Note: Make sure that the paper does not have a texture or rough finish.

- Depending on your operating system, specify the paper size and paper type from the Printing Preferences or Print dialog. Make sure that the settings match the paper loaded in the tray.
- Load paper from a fresh package.

Note: Paper absorbs moisture due to high humidity. Store the paper in its original wrapper until you are ready to use it.

- Make sure that the imaging kit and black imaging unit are properly installed.

1 Remove the imaging kit, and then remove the black imaging unit.

Warning—Potential Damage: Do not expose the imaging kit and black imaging unit to direct light for more than 10 minutes. Extended exposure to light may cause print quality problems.

Warning—Potential Damage: Do not touch the photoconductor drum under the imaging kit and black imaging unit. Doing so may affect the quality of future print jobs.

2 Insert the black imaging unit, and then insert the imaging kit.

If the problem persists, then contact [customer support](#).

Print crooked or skewed

Notes:

- Before solving the problem, print the Print Quality Test Pages. From the control panel, navigate to **Settings > Troubleshooting > Print Quality Test Pages**.
- Use tray 1 to print the sample pages and make sure that the paper is loaded in the portrait orientation.

Try one or more of the following:

- Load paper from a fresh package.

1 Open the tray, and then remove the paper.

2 Load paper from a fresh package.

Note: Paper absorbs moisture due to high humidity. Store the paper in its original wrapper until you are ready to use it.

3 Adjust the paper guides in the tray to the correct position for the paper loaded.

- Make sure that you are printing on a supported paper.

If the problem persists, then contact [customer support](#).

Solid color or black images**Notes:**

- Before solving the problem, print the Print Quality Test Pages. From the control panel, navigate to **Settings > Troubleshooting > Print Quality Test Pages**.
- Use tray 1 to print the sample pages and make sure that the paper is loaded in the portrait orientation.

1 Remove the imaging kit, and then remove the black imaging unit.

Warning—Potential Damage: Do not expose the imaging kit and black imaging unit to direct light for more than 10 minutes. Extended exposure to light may cause print quality problems.

Warning—Potential Damage: Do not touch the photoconductor drum under the imaging kit and black imaging unit. Doing so may affect the quality of future print jobs.

2 Insert the black imaging unit, and then insert the imaging kit.

If the problem persists, then contact [customer support](#).

Text or images cut off

Notes:

- Before solving the problem, print the Print Quality Test Pages. From the control panel, navigate to **Settings > Troubleshooting > Print Quality Test Pages**.
- Use tray 1 to print the sample pages and make sure that the paper is loaded in the portrait orientation.

Try one or more of the following:

- Make sure that all packing material is removed from the imaging kit, imaging unit, and toner cartridges.
- Adjust the paper guides in the tray to the correct position for the paper loaded.
- Depending on your operating system, specify the paper size from the Printing Preferences or Print dialog. Make sure that the setting matches the paper loaded in the tray.

Note: You can also change the setting on the printer control panel. Navigate to **Settings > Paper > Tray Configuration > Paper Size/Type**.

- Make sure that the imaging kit and black imaging unit are properly installed.

1 Remove the imaging kit, and then remove the black imaging unit.

Warning—Potential Damage: Do not expose the imaging kit and black imaging unit to direct light for more than 10 minutes. Extended exposure to light may cause print quality problems.

Warning—Potential Damage: Do not touch the photoconductor drum under the imaging kit and black imaging unit. Doing so may affect the quality of future print jobs.

2 Insert the black imaging unit, and then insert the imaging kit.

If the problem persists, then contact [customer support](#).

Toner easily rubs off

Notes:

- Before solving the problem, print the Print Quality Test Pages. From the control panel, navigate to **Settings > Troubleshooting > Print Quality Test Pages**.
- Use tray 1 to print the sample pages and make sure that the paper is loaded in the portrait orientation.

Try any of the following:

- Make sure that the printer power cord is plugged into an appropriately rated and properly grounded electrical outlet.
- Depending on your operating system, specify the paper type from the Printing Preferences or Print dialog. Make sure that the setting matches the paper loaded.
- Configure the paper type from the control panel. Navigate to **Settings > Paper > Tray Configuration > Paper Size/Type**.

If the problem persists, then contact [customer support](#).

Uneven print density**Notes:**

- Before solving the problem, print the Print Quality Test Pages. From the control panel, navigate to **Settings > Troubleshooting > Print Quality Test Pages**.
- Use tray 1 to print the sample pages and make sure that paper is loaded in the portrait orientation.

Try one or more of the following:

- Open door B, and then make sure that the second transfer roller is locked in place.
- Make sure that the imaging kit and black imaging unit are properly installed.

- 1 Remove the imaging kit, and then remove the black imaging unit.

Warning—Potential Damage: Do not expose the imaging kit and black imaging unit to direct light for more than 10 minutes. Extended exposure to light may cause print quality problems.

Warning—Potential Damage: Do not touch the photoconductor drum under the imaging kit and black imaging unit. Doing so may affect the quality of future print jobs.

- 2 Insert the black imaging unit, and then insert the imaging kit.

If the problem persists, then contact [customer support](#).

Horizontal dark lines

Notes:

- Before solving the problem, print the Print Quality Test Pages. From the control panel, navigate to **Settings > Troubleshooting > Print Quality Test Pages**.
- Use tray 1 to print the sample pages and make sure that the paper is loaded in the portrait orientation.
- If horizontal dark lines keep appearing on the prints, then see [“Repeating defects” on page 383](#).

Try one or more of the following:

- Depending on your operating system, specify the paper type from the Printing Preferences or Print dialog. Make sure that the setting matches the paper loaded.

Note: You can also change the setting on the printer control panel. Navigate to **Settings > Paper > Tray Configuration > Paper Size/Type**.

- Make sure that the paper does not have a texture or rough finish.
- Load paper from a fresh package.

Note: Paper absorbs moisture due to high humidity. Store the paper in its original wrapper until you are ready to use it.

- Make sure that the imaging kit and black imaging unit are properly installed.

1 Remove the imaging kit, and then remove the black imaging unit.

Warning—Potential Damage: Do not expose the imaging kit and black imaging unit to direct light for more than 10 minutes. Extended exposure to light may cause print quality problems.

Warning—Potential Damage: Do not touch the photoconductor drum under the imaging kit and black imaging unit. Doing so may affect the quality of future print jobs.

2 Insert the black imaging unit, and then insert the imaging kit.

If the problem persists, then contact [customer support](#).

Vertical dark lines**Notes:**

- Before solving the problem, print the Print Quality Test Pages. From the control panel, navigate to **Settings > Troubleshooting > Print Quality Test Pages**.
- Use tray 1 to print the sample pages and make sure that paper is loaded in the portrait orientation.

Try one or more of the following:

- Depending on your operating system, specify the paper type from the Printing Preferences or Print dialog. Make sure that the setting matches the paper loaded in the tray.

Note: You can also change the setting on the printer control panel. Navigate to **Settings > Paper > Tray Configuration > Paper Size/Type**.

- Make sure that the paper does not have a texture or rough finish.
- Load paper from a fresh package.

Note: Paper absorbs moisture due to high humidity. Store the paper in its original wrapper until you are ready to use it.

- Make sure that the imaging kit and black imaging unit are properly installed.

1 Remove the imaging kit, and then remove the black imaging unit.

Warning—Potential Damage: Do not expose the imaging kit and black imaging unit to direct light for more than 10 minutes. Extended exposure to light may cause print quality problems.

Warning—Potential Damage: Do not touch the photoconductor drum under the imaging kit and black imaging unit. Doing so may affect the quality of future print jobs.

2 Insert the black imaging unit, and then insert the imaging kit.

If the problem persists, then contact [customer support](#).

Horizontal white lines**Notes:**

- Before solving the problem, print the Print Quality Test Pages. From the control panel, navigate to **Settings > Troubleshooting > Print Quality Test Pages**.
- Use tray 1 to print the sample pages and make sure that paper is loaded in the portrait orientation.
- If horizontal white lines keep appearing on the prints, then see [“Repeating defects” on page 383](#).

Try one or more of the following:

- Depending on your operating system, specify the paper type from the Printing Preferences or Print dialog. Make sure that the setting matches the paper loaded in the tray.

Note: You can also change the setting on the printer control panel. Navigate to **Settings > Paper > Tray Configuration > Paper Size/Type**.

- Load the specified paper source with the recommended paper type.

- Make sure that the imaging kit and black imaging unit are properly installed.

1 Remove the imaging kit, and then remove the black imaging unit.

Warning—Potential Damage: Do not expose the photoconductor drum to direct light. Extended exposure to light may cause print quality problems.

Warning—Potential Damage: Do not touch the photoconductor drums. Doing so may affect the quality of future print jobs.

2 Insert the black imaging unit, and then insert the imaging kit.

If the problem persists, then contact [customer support](#).

Vertical white lines

Notes:

- Before solving the problem, print the Print Quality Test Pages. From the control panel, navigate to **Settings > Troubleshooting > Print Quality Test Pages**.
- Use tray 1 to print the sample pages and make sure that paper is loaded in the portrait orientation.

Try one or more of the following:

- Depending on your operating system, specify the paper type from the Printing Preferences or Print dialog. Make sure that the setting matches the paper loaded in the tray.

Note: You can also change the setting on the printer control panel. Navigate to **Settings > Paper > Tray Configuration > Paper Size/Type**.

- Check if you are using the recommended paper type.

Be sure to load the specified paper source with the recommended paper type.

- Make sure that the imaging kit and black imaging unit are properly installed.

1 Remove the imaging kit, and then remove the black imaging unit.

Warning—Potential Damage: Do not expose the imaging kit and black imaging unit to direct light for more than 10 minutes. Extended exposure to light may cause print quality problems.

Warning—Potential Damage: Do not touch the photoconductor drum under the imaging kit and black imaging unit. Doing so may affect the quality of future print jobs.

2 Insert the black imaging unit, and then insert the imaging kit.

If the problem persists, then contact [customer support](#).

Repeating defects

Notes:

- Before solving the problem, print the Print Quality Test Pages. From the control panel, navigate to **Settings > Troubleshooting > Print Quality Test Pages**.
- Use tray 1 to print the sample pages and make sure that paper is loaded in the portrait orientation.
- Determine how many colors have defects.
 - 1 Measure the distance between the repeating defects on the affected color page. Using the Maintenance Defect Ruler, measure the distance between the repeating defects on the affected color page.
 - 2 Replace the supply item or part that matches the measurement on the affected color page.

Color imaging kit or black imaging unit

- 94.5 mm (3.72 in.)
- 19.9 mm (1.18 in.)
- 23.2 mm (0.91 in.)

Developer unit

- 43.6 mm (1.72 in.)
- 45.0 mm (1.77 in.)

Fuser

- 95 mm (3.74 in.)
- 110 mm (4.33 in.)

If the problem persists, then contact [customer support](#).

Print jobs do not print

Try one or more of the following:

- From the document that you are trying to print, open the Printing Preferences or Print dialog, and then check if the correct printer is selected.
- Check if the printer is on, and then resolve any error messages that appear on the display.
- Check if the ports are working and if the cables are securely connected to the computer and the printer. For more information, see the setup documentation that came with the printer.
- Turn off the printer, wait for about 10 seconds, and then turn on the printer.
- Remove, and then reinstall the print driver.

If the problem persists, then contact [customer support](#).

Confidential and other held documents do not print

Try one or more of the following:

- From the control panel, check if the documents appear in the **Held Jobs** list.
Note: If the documents are not listed, then print the documents using the Print and Hold options.
- Resolve possible formatting errors or invalid data in the print job.
 - Delete the print job, and then send it again.
 - For PDF files, generate a new file, and then print the document.
- If you are printing from the Internet, then the printer may be reading the multiple job titles as duplicates.
 - For Windows users, make sure to select **Keep duplicate documents** in the Printing Preferences or Print dialog.
 - For Macintosh users, name each job differently.
- Delete some held jobs to free up printer memory.
- Install more printer memory.

If the problem persists, then contact [customer support](#).

Job prints from the wrong tray or on the wrong paper

Try one or more of the following:

- Make sure that you are printing on the correct paper.
- Depending on your operating system, specify the paper size and paper type from the Printing Preferences or Print dialog. Make sure that the settings match the paper loaded.

Note: You can also change the settings on the printer control panel. Navigate to **Settings > Paper > Tray Configuration > Paper Size/Type**.

- Check if the trays are linked. For more information, see [“Linking trays” on page 83](#).

If the problem persists, then contact [customer support](#).

Slow printing

Try one or more of the following:

- Make sure that the printer cable is securely connected to the printer, computer, print server, option, and other network device.
- Make sure that the printer is not in **Quiet Mode**.

From the control panel, navigate to **Settings > Device > Maintenance > Config Menu > Device Operations > Quiet Mode**.

- Specify the resolution of the document that you want to print.
 - 1 Depending on your operating system, access the Printing Preferences or Print dialog.
 - 2 Set the resolution to **4800 CQ**.

Note: You can also change the setting on the control panel. Navigate to **Settings > Print > Quality > Print Resolution**.

- Depending on your operating system, specify the paper type from the Printing Preferences or Print dialog.

Notes:

- You can also change the setting on the control panel. Navigate to **Settings > Paper > Tray Configuration > Paper Size/Type**.
- Heavier paper print more slowly.
- Paper that is narrower than letter, A4, and legal may print more slowly.
- Make sure that the printer settings for texture and weight match the paper being loaded. From the control panel, navigate to **Settings > Paper > Media Configuration > Media Types**.

Note: Rough paper texture and heavy paper weight may print more slowly.

- Remove held jobs.
- Make sure that the printer is not overheating.

Notes:

- Allow the printer to cool down after a long print job.
- Observe the recommended ambient temperature for the printer. For more information, see [“Selecting a location for the printer” on page 61](#).

If the problem persists, then contact [customer support](#).

The printer is not responding

Try one or more of the following:

- Check if the power cord is connected to the electrical outlet.

CAUTION—POTENTIAL INJURY: To avoid the risk of fire or electrical shock, connect the power cord to an appropriately rated and properly grounded electrical outlet that is near the product and easily accessible.

- Make sure that the electrical outlet is not turned off by a switch or breaker.
- Check if the printer is on.
- Make sure that the printer is not in Sleep or Hibernate Mode.
- Make sure that the cables connecting the printer and computer are connected to the correct ports.
- Turn off the printer, install the hardware options, and then turn on the printer. For more information, see the documentation that came with the option.
- Install the correct print driver.
- Turn off the printer, wait for about 10 seconds, and then turn on the printer.

If the problem persists, then contact [customer support](#).

Unable to read flash drive

Try one or more of the following:

- Make sure that the printer is not busy processing multiple jobs.
- Make sure that the flash drive is inserted into the front USB port.

Note: The flash drive does not work when it is inserted into the rear USB port.

- Make sure that the flash drive is supported. For more information, see [“Supported flash drives and file types” on page 59](#).
- Remove, and then insert the flash drive.

If the problem persists, then contact [customer support](#).

Enabling the USB port

- 1 From the control panel, navigate to **Settings > Network/Ports > USB**.
- 2 Select **Enable USB Port**.

Clearing jams

Avoiding jams

Load paper properly

- Make sure that the paper lies flat in the tray.

- Do not load or remove a tray while the printer is printing.
- Do not load too much paper. Make sure that the stack height is below the maximum paper fill indicator.
- Do not slide paper into the tray. Load paper as shown in the illustration.

- Make sure that the paper guides are positioned correctly and are not pressing tightly against the paper or envelopes.
- Push the tray firmly into the printer after loading paper.

Use recommended paper

- Use only recommended paper or specialty media.
- Do not load paper that is wrinkled, creased, damp, bent, or curled.
- Flex, fan, and align the paper edges before loading.

- Do not use paper that has been cut or trimmed by hand.
- Do not mix paper sizes, weights, or types in the same tray.
- Make sure that the paper size and type are set correctly on the computer or printer control panel.
- Store paper according to manufacturer recommendations.

Identifying jam locations

Notes:

- When **Jam Assist** is set to **On**, the printer flushes blank pages or pages with partial prints after a jammed page has been cleared. Check your printed output for blank pages.
- When **Jam Recovery** is set to **On** or **Auto**, the printer reprints jammed pages.

	Jam locations
1	Standard bin
2	Door B
3	Multipurpose feeder
4	Standard tray
5	Staple finisher
6	Staple, hole punch finisher
7	Optional 550-sheet tray
8	1500-sheet tray
9	2 x 550-sheet tray
10	Booklet finisher
11	Paper transport with folding option

	Jam locations
12	2000-sheet tandem tray

Paper jam in the standard tray

- 1 Pull out the standard tray.

- 2 Remove the jammed paper.

Note: Make sure that all paper fragments are removed.

- 3 Insert the tray.

Paper jam in the optional 550-sheet tray

- 1 Open door D.

- 2 Remove the jammed paper.

Note: Make sure that all paper fragments are removed.

- 3 Close the door.

- 4 Pull out the optional 550-sheet tray.

- 5 Remove the jammed paper.

Note: Make sure that all paper fragments are removed.

- 6 Insert the tray.

Paper jam in the multipurpose feeder

- 1 Remove any paper from the multipurpose feeder.
2 Remove the jammed paper.

Note: Make sure that all paper fragments are removed.

Paper jam in the 2 x 550-sheet tray

- 1 Open door E.

- 2 Remove the jammed paper inside door E.

Note: Make sure that all paper fragments are removed.

- 3 Close door E.

4 Pull out tray 3.

5 Remove the jammed paper.

Note: Make sure that all paper fragments are removed.

6 Insert tray 3.

7 Repeat [step 4](#) through [step 6](#) for tray 4.

Paper jam in the 2000-sheet tandem tray

- 1 Open door E.

- 2 Remove the jammed paper inside door E.

Note: Make sure that all paper fragments are removed.

- 3 Close door E.

Paper jam in the 1500-sheet tray

- 1 Open door K.

- 2 Remove the jammed paper.

Note: Make sure that all paper fragments are removed.

3 Close door K.

4 Grab handle J, and then slide the tray to the right.

5 Remove the jammed paper.

Note: Make sure that all paper fragments are removed.

6 Slide the tray back into place.

Paper jam in door B

1 Open door B.

CAUTION—HOT SURFACE: The inside of the printer might be hot. To reduce the risk of injury from a hot component, allow the surface to cool before touching it.

Warning—Potential Damage: To prevent damage from electrostatic discharge, touch any exposed metal frame of the printer before accessing or touching interior areas of the printer.

2 Remove the jammed paper in any of the following locations:

Note: Make sure that all paper fragments are removed.

- Above the fuser

- In the fuser

- Below the fuser

- Under the standard bin exit roller

- In the duplex unit

3 Close door B.

Paper jam in the standard bin

- 1 Remove any paper from the standard bin.
 - 2 Remove the jammed paper.
- Note:** Make sure that all paper fragments are removed.

Paper jam in the staple finisher bin

- 1 Remove the jammed paper in the staple finisher bin.
- Note:** Make sure that all paper fragments are removed.

- 2** Grab handle F, and then slide the staple finisher to the left.

- 3** Open door R1, and then rotate the knob R2 clockwise.

- 4** Remove the jammed paper.

Note: Make sure that all paper fragments are removed.

5 Close door R1.

6 Remove the jammed paper in the standard bin exit roller.

Note: Make sure that all paper fragments are removed.

7 Slide the staple finisher back into place.

Paper jam in the paper transport with folding option

1 Remove the jammed paper.

Note: Make sure that all paper fragments are removed.

2 Open door F.

3 Lift handle N4.

4 Lift handle N5.

5 Remove the jammed paper.

Note: Make sure that all paper fragments are removed.

6 Close handle N5, and then close handle N4.

7 Push down handle N1.

- 8 Turn knob N2 counterclockwise.

- 9 Remove the jammed paper.

Warning—Potential Damage: To prevent damage to the printer, remove any hand accessories before removing the jammed paper.

Note: Make sure that all paper fragments are removed.

- 10 Put handle N1 back into place.

- 11 Close door F.

Paper jam in the staple, hole punch finisher

If your printer is configured with a paper transport, then do the following:

- 1 Remove the jammed paper in bin 1.

Notes:

- Make sure that all paper fragments are removed.
- Do not remove the printed pages that are in the staple compiler to avoid missing pages.

- 2** Remove the jammed paper in the finisher standard bin.

Note: Make sure that all paper fragments are removed.

- 3** Remove the jammed paper in bin 2.

Note: Make sure that all paper fragments are removed.

- 4** Open paper transport cover G, and then remove the jammed paper.

Note: Make sure that all paper fragments are removed.

5 Close paper transport cover G.

6 Open door I, open door R1, and then remove the jammed paper.

Note: Make sure that all paper fragments are removed.

7 Close door R1, and then close door I.

8 Open paper transport cover F.

9 Open door H.

10 Lift handle R4.

11 Turn knob R3 counterclockwise, and then remove the jammed paper in bin 1.

Note: Make sure that all paper fragments are removed.

- 12** Turn knob R2 counterclockwise, and then remove the jammed paper in paper transport cover F.

Note: Make sure that all paper fragments are removed.

- 13** Close paper transport cover F.

- 14** Return handle R4 to its original position.

- 15** Close door H.

If your printer is configured with a paper transport with folding option, then do the following:

- 1** Remove the jammed paper in bin 1.

Notes:

- Make sure that all paper fragments are removed.
- Do not remove the printed pages that are in the staple compiler to avoid missing pages.

- 2 Remove the jammed paper in the finisher standard bin.

Note: Make sure that all paper fragments are removed.

- 3 Remove the jammed paper in bin 2.

Note: Make sure that all paper fragments are removed.

4 Open door F.

5 Open door N4.

6 Open door N5.

7 Open door H.

8 Lift handle R4.

9 Turn knob R3 counterclockwise, and then remove the jammed paper in bin 1.

Note: Make sure that all paper fragments are removed.

- 10** Turn knob R2 counterclockwise, and then remove the jammed paper between doors N4 and N5.

Note: Make sure that all paper fragments are removed.

- 11** Open door B.

CAUTION—HOT SURFACE: The inside of the printer might be hot. To reduce the risk of injury from a hot component, allow the surface to cool before touching it.

Warning—Potential Damage: To prevent damage from electrostatic discharge, touch any exposed metal frame of the printer before accessing or touching interior areas of the printer.

- 12** Remove the jammed paper under the standard bin exit roller.

Note: Make sure that all paper fragments are removed.

- 13** Close door B.

- 14** Push down handle N1.

- 15 Turn knob N2 counterclockwise.

- 16 Remove the jammed paper.

Warning—Potential Damage: To prevent damage to the printer, remove any hand accessories before removing the jammed paper.

Note: Make sure that all paper fragments are removed.

- 17 Put handle N1 back into place.
- 18 Close handle N5, and then close handle N4.
- 19 Close door F.
- 20 Return handle R4 to its original position.
- 21 Close door H.

Paper jam in the booklet finisher

If your printer is configured with a paper transport, then do the following:

- 1 Remove the jammed paper in the finisher standard bin.

Note: Make sure that all paper fragments are removed.

2 Remove the jammed paper in bin 1.

Note: Make sure that all paper fragments are removed.

3 Remove the jammed paper in bin 1.

Notes:

- Make sure that all paper fragments are removed.
- Do not remove the printed pages that are in the staple compiler to avoid missing pages.

- 4 Remove the jammed paper in bin 3.

Note: Make sure that all paper fragments are removed.

- 5 Open paper transport cover G, and then remove the jammed paper.

Note: Make sure that all paper fragments are removed.

- 6 Close paper transport cover G.

- 7** Open paper transport cover F.

- 8** Open door H.

- 9** Move handle R3 to the right, and then remove the jammed paper.

Note: Make sure that all paper fragments are removed.

10 Move handle R1 to the left, turn knob R2 counterclockwise, and then remove the jammed paper.

Note: Make sure that all paper fragments are removed.

- 11** Turn knob R5 counterclockwise, and then remove the jammed paper from the finisher standard bin.

Note: Make sure that all paper fragments are removed.

12 Lift handle R4, turn knob R2 clockwise, and then remove the jammed paper.

Note: Make sure that all paper fragments are removed.

13 Close paper transport cover F.

14 Return handles R1, R3, and R4 to their original position.

15 Close door H.

If your printer is configured with a paper transport with folding option, then do the following:

1 Remove the jammed paper in the finisher standard bin.

Note: Make sure that all paper fragments are removed.

2 Remove the jammed paper in bin 1.

Note: Make sure that all paper fragments are removed.

3 Remove the jammed paper in bin 1.

Notes:

- Make sure that all paper fragments are removed.
- Do not remove the printed pages that are in the staple compiler to avoid missing pages.

- 4 Remove the jammed paper in bin 3.

Note: Make sure that all paper fragments are removed.

- 5 Open door F.

- 6 Open door H.

7 Open door N4.

8 Open door N5.

9 Lift handle R4.

10 Turn knob R2 clockwise, and then remove the jammed paper in handle R4.

Note: Make sure that all paper fragments are removed.

- 11** Move handle R1 to the left, turn knob R2 counterclockwise, and then remove the jammed paper between doors N4 and N5.

Note: Make sure that all paper fragments are removed.

12 Open door B.

CAUTION—HOT SURFACE: The inside of the printer might be hot. To reduce the risk of injury from a hot component, allow the surface to cool before touching it.

Warning—Potential Damage: To prevent damage from electrostatic discharge, touch any exposed metal frame of the printer before accessing or touching interior areas of the printer.

**13** Remove the jammed paper under the standard bin exit roller.

Note: Make sure that all paper fragments are removed.

**14** Close door B.**15** Push down handle N1.

- 16** Turn knob N2 counterclockwise.

- 17** Remove the jammed paper.

Warning—Potential Damage: To prevent damage to the printer, remove any hand accessories before removing the jammed paper.

Note: Make sure that all paper fragments are removed.

- 18** Put handle N1 back into place.
- 19** Close door N5, and then close door N4.
- 20** Close door F.
- 21** Return handles R1 and R4 back into their original positions.
- 22** Close door H.

Paper jam in the booklet maker

- 1** Remove jammed paper in bin 2.

Note: Make sure that all paper fragments are removed.

2 Open door H.

- 3** Turn knobs R6, R11, and R10 clockwise.

- 4** Pull out the booklet maker.

- 5** Remove the jammed paper.

Note: Make sure that all paper fragments are removed.

- 6 Turn knob R9 counterclockwise until it stops.

- 7 Open door R8.

- 8 Remove the jammed paper.

Note: Make sure that all paper fragments are removed.

- 9 Close door R8.

- 10 Return the booklet maker into the booklet finisher.

- 11 Close door H.

Network connection problems

Cannot open Embedded Web Server

Try one or more of the following:

- Make sure that the printer is on.
- Make sure that the printer IP address is correct.

Notes:

- View the IP address on the control panel.
 - The IP address appears as four sets of numbers separated by periods, such as 123.123.123.123.
 - Make sure that you installed a supported browser.
 - Internet Explorer version 11 or later
 - Microsoft Edge
 - Safari version 6 or later
 - Google Chrome™ version 32 or later
 - Mozilla Firefox version 24 or later
 - Check if the network connection is working.
- Note:** If the connection is not working, then contact your administrator.
- Make sure that the cable connections to the printer and print server are secure. For more information, see the documentation that came with the print server.
 - Check if the web proxy servers are disabled.

Note: If the servers are disabled, then contact your administrator.

If the problem persists, then contact [customer support](#).

Cannot connect the printer to the Wi-Fi network

Try one or more of the following:

- From the control panel, navigate to **Settings > Network/Ports > Network Overview > Active Adapter**, and then select **Auto**.
- Make sure that the computer is connected to the correct Wi-Fi network. For more information, see [“Connecting the printer to a Wi-Fi network” on page 232](#).

Note: Some routers may share the default Wi-Fi name.

- Make sure that you entered the correct network password.

Note: Take note of the spaces, numbers, and capitalization in the password.

- Make sure that the correct wireless security mode is selected. From the control panel, navigate to **Settings > Network/Ports > Wireless > Wireless Security Mode**.

If the problem persists, then contact [customer support](#).

Hardware options problems

Cannot detect internal option

Try one or more of the following:

- Turn off the printer, wait for about 10 seconds, and then turn on the printer.
- Print the **Menu Settings Page**, and then check if the internal option appears in the Installed Features list. From the control panel, navigate to **Settings > Reports > Menu Settings Page**.
- Check if the internal option is installed properly into the controller board.
 - 1 Turn off the printer, and then unplug the power cord from the electrical outlet.
 - 2 Make sure that the internal option is installed into the appropriate connector on the controller board.
 - 3 Connect the power cord to the electrical outlet, and then turn on the printer.

CAUTION—POTENTIAL INJURY: To avoid the risk of fire or electrical shock, connect the power cord to an appropriately rated and properly grounded electrical outlet that is near the product and easily accessible.

- Check if the internal option is available in the print driver.

Note: If necessary, manually add the internal option in the print driver to make it available for print jobs. For more information, see [“Adding available options in the print driver” on page 86](#).

If the problem persists, then contact [customer support](#).

Internal solutions port does not operate correctly

Try one or more of the following:

- Print the **Menu Settings Page**, and then check if the internal solutions port (ISP) appears in the Installed Features list. From the control panel, navigate to **Settings > Reports > Menu Settings Page**.
- Remove, and then reinstall the ISP. For more information, see [“Installing an internal solutions port” on page 221](#).
- Check the cable and the ISP connection.
 - 1 Use the correct cable, and then make sure that it is securely connected to the ISP.
 - 2 Check if the ISP solution interface cable is securely connected to its slot on the controller board.

If the problem persists, then contact [customer support](#).

Parallel or serial interface card does not operate correctly

Try one or more of the following:

- Print the **Menu Settings Page**, and then check if the parallel or serial interface card appears in the Installed Features list. From the control panel, navigate to **Settings > Reports > Menu Settings Page**.
- Remove, and then reinstall the parallel or serial interface card. For more information, see [“Installing an internal solutions port” on page 221](#).
- Check the connection between the cable and the parallel or serial interface card.

If the problem persists, then contact [customer support](#).

Defective flash detected

Try one or more of the following:

- Replace the defective flash memory.
- Select **Continue** to ignore the message and continue printing.
- Cancel the current print job.

Not enough free space in flash memory for resources

Try one or more of the following:

- Select **Continue** to clear the message and continue printing.
- Delete fonts, macros, and other data that are stored in the flash memory.
- Install a storage drive.

Note: Downloaded fonts and macros that are not previously stored in the flash memory are deleted.

Issues with supplies

Replace cartridge, printer region mismatch

To correct this problem, purchase a cartridge with the correct region that matches the printer region, or purchase a worldwide cartridge.

- The first number in the message after 42 indicates the region of the printer.
- The second number in the message after 42 indicates the region of the cartridge.

Printer and toner cartridge regions

Region	Numeric code
Worldwide or Undefined region	0
North America (United States, Canada)	1
European Economic Area, Western Europe, Nordic countries, Switzerland	2
Asia Pacific	3
Latin America	4
Rest of Europe, Middle East, Africa	5
Australia, New Zealand	6
Invalid region	9

Note: To find the region settings of the printer and toner cartridge, print the **Print Quality Test Pages**. From the control panel, navigate to **Settings > Troubleshooting > Print Quality Test Pages**.

Refilled regular [color] cartridge

The printer has detected a Lexmark Regular cartridge that has been refilled with non-genuine toner by a party other than Lexmark.

Select **OK** to continue.

All printer component life indicators are designed to function with Lexmark supplies and parts and may deliver unpredictable results when using supplies or parts in your Lexmark printer that are remanufactured by parties other than Lexmark.

For more information, see the printer statement of limited warranty.

Non-Lexmark supply

The printer has detected a non-Lexmark supply or part installed in the printer.

Your Lexmark printer is designed to function best with genuine Lexmark supplies and parts. Use of third-party supplies or parts may affect the performance, reliability, or life of the printer and its imaging components.

All life indicators are designed to function with Lexmark supplies and parts and may deliver unpredictable results if third-party supplies or parts are used. Imaging component usage beyond the intended life may damage your Lexmark printer or associated components.

Warning—Potential Damage: Use of third-party supplies or parts can affect warranty coverage. Damage caused by the use of third-party supplies or parts may not be covered by the warranty.

To accept any and all of these risks and to proceed with the use of non-genuine supplies or parts in your printer, touch and hold the error message on the display using two fingers for 15 seconds. When a confirmation dialog box appears, touch **Continue**.

If you do not want to accept these risks, then remove the third-party supply or part from your printer and install a genuine Lexmark supply or part. For more information, see [“Using genuine Lexmark parts and supplies” on page 305](#).

If the printer does not print after clearing the error message, then reset the supply usage counter.

- 1** From the control panel, navigate to **Settings > Device > Maintenance > Configuration Menu > Supply Usage And Counters**.
- 2** Select the part or supply that you want to reset, and then select **Start**.
- 3** Read the warning message, and then select **Continue**.
- 4** Using two fingers, touch the display for 15 seconds to clear the message.

Note: If you are unable to reset the supply usage counters, then return the supply item to the place of purchase.

Paper feed problems

Paper curl

Try one or more of the following:

- Adjust the guides in the tray to the correct position for the paper loaded.
- Depending on your operating system, specify the paper type from the Printing Preferences or Print dialog. Make sure that the setting matches the paper loaded.

Note: You can also change the setting on the printer control panel. Navigate to **Settings > Paper > Tray Configuration > Paper Size/Type**.

- Remove the paper, flip it over, and then reload the paper.
- Load paper from a fresh package.

Note: Paper absorbs moisture due to high humidity. Store the paper in its original wrapper until you are ready to use it.

If the problem persists, then contact [customer support](#).

Envelope seals when printing

Try one or more of the following:

- Use an envelope that has been stored in a dry environment.

Note: Printing on envelopes with high moisture content can seal the flaps.

- Make sure that the paper type is set to **Envelope**. From the control panel, navigate to **Settings > Paper > Tray Configuration > Paper Size/Type**.

If the problem persists, then contact [customer support](#).

Collated printing does not work

Try one or more of the following:

- From the control panel, navigate to **Settings > Print > Layout > Collate**, and then select **On [1,2,1,2,1,2]**.
- From the document that you are trying to print, open the Printing Preferences or Print dialog, and then select **Collate**.
- Reduce the number of pages to print.

If the problem persists, then contact [customer support](#).

Tray linking does not work

Try one or more of the following:

- Make sure that the linked trays contain the same paper size, orientation, and paper type.
- Make sure that the paper guides are positioned correctly.
- Set the paper size and paper type to match the paper loaded in the linked trays. From the control panel, navigate to **Settings > Paper > Tray Configuration > Paper Size/Type**.
- Make sure that **Tray Linking** is set to **Automatic**. For more information, see [“Linking trays” on page 83](#).

If the problem persists, then contact [customer support](#).

Paper frequently jams

Try one or more of the following:

- Check if the paper is loaded correctly.

Notes:

- Make sure that the paper guides are positioned correctly.
- Make sure that the stack height is below the maximum paper fill indicator.
- Make sure to print on the recommended paper size and paper type.
- Set the correct paper size and paper type. From the control panel, navigate to **Settings > Paper > Tray Configuration > Paper Size/Type**.
- Load paper from a fresh package.

Note: Paper absorbs moisture due to high humidity. Store the paper in its original wrapper until you are ready to use it.

If the problem persists, then contact [customer support](#).

Jammed pages are not reprinted

1 From the control panel, navigate to **Settings > Device > Notifications > Jam Content Recovery**.

2 In the **Jam Recovery** menu, select **On** or **Auto**.

If the problem persists, then contact [customer support](#).

Color quality problems

Modifying the colors in printed output

1 From the control panel, navigate to **Settings > Print > Quality > Advanced Imaging > Color Correction**.

2 In the **Color Correction** menu, select **Manual**.

3 In the **Color Correction Content** menu, select the appropriate color conversion setting.

Object type	Color conversion tables
RGB Image RGB Text RGB Graphics	<ul style="list-style-type: none"> • Vivid—Produces brighter, more saturated colors and can be applied to all incoming color formats. • sRGB Display—Produces an output that approximates the colors shown on a computer monitor. Black toner usage is optimized for printing photographs. • Display-True Black—Produces an output that approximates the colors shown on a computer monitor. This setting uses only black toner to create all levels of neutral gray. • sRGB Vivid—Provides an increased color saturation for the sRGB Display color correction. Black toner usage is optimized for printing business graphics. • Off
CMYK Image CMYK Text CMYK Graphics	<ul style="list-style-type: none"> • US CMYK—Applies color correction to approximate the Specifications for Web Offset Publishing (SWOP) color output. • Euro CMYK—Applies color correction to approximate Euroscale color output. • Vivid CMYK—Increases the color saturation of the US CMYK color correction setting. • Off

FAQ about color printing

What is an RGB color?

RGB color is a method of describing colors by indicating the amount of red, green, or blue used to produce a certain color. Red, green, and blue light can be added in various amounts to produce a large range of colors observed in nature. Computer screens, scanners, and digital cameras use this method to display colors.

What is the CMYK color?

CMYK color is a method of describing colors by indicating the amount of cyan, magenta, yellow, and black used to reproduce a particular color. CMYK inks or toners can be printed in various amounts to produce a large range of colors observed in nature. Printing presses, inkjet printers, and color laser printers create colors in this manner.

How is color specified in a document to be printed?

Software programs are used to specify and modify the colors in a document using RGB or CMYK color combinations. For more information, see the software program Help topics.

How does the printer know what color to print?

When printing a document, information describing the type and color of each object is sent to the printer. The information is then passed through color conversion tables. Color is translated into the appropriate amounts of CMYK toners that are used to produce the color that you want. The object information determines the application of color conversion tables. For example, it is possible to apply one type of color conversion table to text while applying a different color conversion table to photos.

What is manual color correction?

When manual color correction is enabled, the printer employs user-selected color conversion tables to process objects. Manual color correction settings are specific to the type of object being printed (text, graphics, or images). It is also specific to how the color of the object is specified in the software program (RGB or CMYK combinations). To apply a different color conversion table manually, see [“Modifying the colors in printed output” on page 438](#).

If the software program does not specify colors with RGB or CMYK combinations, then manual color correction is not useful. It is also not effective if the software program or the computer operating system controls the adjustment of colors. In most situations, setting the Color Correction to Auto generates preferred colors for the documents.

How can I match a particular color (such as a corporate logo)?

From the **Quality** menu, nine types of **Color Samples** sets are available. These sets are also available from the **Color Samples** page of the Embedded Web Server. Selecting any sample set generates multiple-page prints consisting of hundreds of colored boxes. Each box contains a CMYK or RGB combination, depending on the table selected. The observed color of each box is obtained by passing the CMYK or RGB combination that is labeled on the box.

By examining **Color Samples** sets, you can identify the box with the color closest to the color being matched. The color combination on the box label can be used to modify the color of the object in a software program. For more information, see the software program Help topics. Manual color correction may be necessary to use the selected color conversion table for the particular object.

Selecting which **Color Samples** set to use for a particular color-matching problem depends on:

- The **Color Correction** setting being used (**Auto**, **Off**, or **Manual**).
- The type of object being printed (text, graphics, or images).
- How the color of the object is specified in the software program (RGB or CMYK combinations).

If the software program does not specify colors with RGB or CMYK combinations, then the **Color Samples** pages are not useful. Some software programs adjust the RGB or CMYK combinations specified in the program through color management. In these situations, the printed color may not be an exact match of the **Color Samples** pages.

The print appears tinted

Try one or more of the following:

- From the control panel, navigate to **Settings > Print > Quality > Advanced Imaging**, and then select **Color Adjust**.
- From the control panel, navigate to **Settings > Print > Quality > Advanced Imaging**, select **Color Balance** and adjust the settings.

If the problem persists, then contact [customer support](#).

Contacting customer support

Before contacting customer support, make sure to have the following information:

- Printer problem
- Error message
- Printer model type and serial number

Go to <https://support.lexmark.com> to receive email or chat support, or browse through the library of manuals, support documentation, drivers, and other downloads.

Technical support via telephone is also available. In the U.S. or Canada, call 1-800-539-6275. For other countries or regions, go to [the international support contact directory](#).

Recycle and dispose

Recycling Lexmark products

- 1 Go to www.lexmark.com/recycle.
- 2 Select your country or region.
- 3 Select a recycling program.

Recycling Lexmark packaging

Lexmark continually strives to minimize packaging. Less packaging helps to ensure that Lexmark printers are transported in the most efficient and environmentally sensitive manner and that there is less packaging to dispose of. These efficiencies result in fewer greenhouse emissions, energy savings, and natural resource savings. Lexmark also offers recycling of packaging components in some countries or regions. For more information, go to www.lexmark.com/recycle.

Lexmark cartons are 100% recyclable where corrugated recycling facilities exist. Facilities may not exist in your area.

The foam used in Lexmark packaging is recyclable where foam recycling facilities exist. Facilities may not exist in your area.

When you return a cartridge to Lexmark, you can reuse the box that the cartridge came in. Lexmark recycles the box.

GOVERNMENT END USERS

The Software Program and any related documentation are "Commercial Items," as that term is defined in 48 C.F.R. 2.101, "Computer Software" and "Commercial Computer Software Documentation," as such terms are used in 48 C.F.R. 12.212 or 48 C.F.R. 227.7202, as applicable. Consistent with 48 C.F.R. 12.212 or 48 C.F.R. 227.7202-1 through 227.7207-4, as applicable, the Commercial Computer Software and Commercial Software

Documentation are licensed to the U.S. Government end users (a) only as Commercial Items and (b) with only those rights as are granted to all other end users pursuant to the terms and conditions herein.

Trademarks

Lexmark, the Lexmark logo, and MarkNet are trademarks or registered trademarks of Lexmark International, Inc. in the United States and/or other countries.

Android, Google Play, and Google Chrome are trademarks of Google LLC.

Macintosh, macOS, Safari, and AirPrint are trademarks of Apple Inc., registered in the U.S. and other countries. Use of the Works with Apple badge means that an accessory has been designed to work specifically with the technology identified in the badge and has been certified by the developer to meet Apple performance standards.

Microsoft, Internet Explorer, Microsoft Edge, and Windows are trademarks of the Microsoft group of companies.

The Mopria™ word mark is a registered and/or unregistered trademark of Mopria Alliance, Inc. in the United States and other countries. Unauthorized use is strictly prohibited.

PCL® is a registered trademark of the Hewlett-Packard Company. PCL is Hewlett-Packard Company's designation of a set of printer commands (language) and functions included in its printer products. This printer is intended to be compatible with the PCL language. This means the printer recognizes PCL commands used in various application programs, and that the printer emulates the functions corresponding to the commands.

PostScript is a registered trademark of Adobe Systems Incorporated in the United States and/or other countries.

Wi-Fi® and Wi-Fi Direct® are registered trademarks of Wi-Fi Alliance®.

All other trademarks are the property of their respective owners.

Licensing notices

All licensing notices associated with this product can be viewed from the CD:\NOTICES directory of the installation software CD.

Noise emission levels

The following measurements were made in accordance with ISO 7779 and reported in conformance with ISO 9296.

Note: Some modes may not apply to your product.

1-meter average sound pressure, dBA	
Printing	One-sided mono: 51 One-sided color: 52 Two-sided mono: 54 Two-sided color: 55
Ready	14

Values are subject to change. See www.lexmark.com for current values.

Waste from Electrical and Electronic Equipment (WEEE) directive

The WEEE logo signifies specific recycling programs and procedures for electronic products in countries of the European Union. We encourage the recycling of our products.

If you have further questions about recycling options, visit the Lexmark Web site at www.lexmark.com for your local sales office phone number.

India E-Waste notice

This product including components, consumables, parts and spares complies with the “India E-Waste Rules” and prohibits use of lead, mercury, hexavalent chromium, polybrominated biphenyls or polybrominated diphenyl ethers in concentrations exceeding 0.1% by weight and 0.01% by weight for cadmium, except for the exemption set in the Rule.

Lithium-ion rechargeable battery

This product may contain a coin-cell, lithium-ion rechargeable battery, which should only be removed by a trained technician. Crossed-out wheeled bin means the product should not be discarded as unsorted waste but must be sent to separate collection facilities for recovery and recycling. In the event the battery is removed, do not dispose of the battery in your household waste. There may be separate collection systems for batteries in your local community, such as a battery-recycling drop-off location. The separate collection of waste batteries

assures appropriate treatment of waste including reuse and recycling and prevents any potential negative effects on human health and environment. Please responsibly dispose of the batteries.

Regulation (EU) 2023/1542

This product may contain a coin-cell lithium rechargeable battery. This battery complies with Regulation (EU) 2023/1542. Compliance is indicated by the CE marking:

This product may contain one of the following coin-cell batteries:

- Battery identification: Seiko Model Number MS621FE
Manufacturer: Seiko Instruments Inc.
Manufacturer address: 8, Nakase 1-chome, Mihama-ku, Chiba-shi, Chiba 261-8507, Japan
- Battery identification: Panasonic Model Number ML621
Manufacturer: Panasonic Energy Co., Ltd.
Manufacturer address: 1-1 Matsushita-cho, Moriguchi City, Osaka 570-8511, Japan
- Battery identification: FDK Model Number ML621
Manufacturer: FDK Corporation
Manufacturer address: Shibaura Crystal Shinagawa, 1-6-41 Konan, Minato-ku, Tokyo 108-8212 Japan

Environmental labeling for packaging

Per Commission Regulation Decision 97/129/EC Legislative Decree 152/2006, the product packaging may contain one or more of the following symbols.

A recycling symbol consisting of three arrows forming a triangle, with the number '20' in the center and 'PAP' below it.	This symbol indicates that the packaging may contain corrugated fiberboard.
A recycling symbol consisting of three arrows forming a triangle, with the number '21' in the center and 'PAP' below it.	This symbol indicates that the packaging may contain non-corrugated fiberboard.
A recycling symbol consisting of three arrows forming a triangle, with the number '22' in the center and 'PAP' below it.	This symbol indicates that the packaging may contain paper.

For more information, go to www.lexmark.com/recycle, and then choose your country or region. Information on available packaging recycling programs is included with the information on product recycling.

Product disposal

Do not dispose of the printer or supplies in the same manner as normal household waste. Consult your local authorities for disposal and recycling options.

Returning Lexmark cartridges for reuse or recycling

The Lexmark Cartridge Collection Program allows you to return used cartridges for free to Lexmark for reuse or recycling. One hundred percent of the empty cartridges returned to Lexmark are either reused or demanufactured for recycling. The boxes used to return the cartridges are also recycled.

To return Lexmark cartridges for reuse or recycling, do the following:

- 1 Go to www.lexmark.com/recycle.
- 2 Select your country or region.
- 3 Select **Lexmark Cartridge Collection Program**.
- 4 Follow the instructions on the screen.

Static sensitivity notice

This symbol identifies static-sensitive parts. Do not touch the areas near these symbols without first touching a metal surface in an area away from the symbol.

To prevent damage from electrostatic discharge when performing maintenance tasks such as clearing paper jams or replacing supplies, touch any exposed metal frame of the printer before accessing or touching interior areas of the printer even if the symbol is not present.

ENERGY STAR

Any Lexmark product bearing the ENERGY STAR® emblem on the product or on a start-up screen is certified to comply with Environmental Protection Agency (EPA) ENERGY STAR requirements as of the date of manufacture.

Temperature information

Operating temperature and relative humidity (RH) ¹	10 to 32.2°C (50 to 90°F) and 15 to 80% RH 15.6 to 32.2°C (60 to 90°F) and 8 to 80% RH Maximum wet-bulb temperature ² : 22.8°C (73°F) Non-condensing environment
Printer / cartridge / imaging unit long-term storage ²	15.6 to 32.2°C (60 to 90°F) and 8 to 80% RH Maximum wet-bulb temperature ² : 22.8°C (73°F)
Printer / cartridge / imaging unit short-term shipping ³	-40 to 40°C (-40 to 104°F)
¹ In some cases, performance specifications (such as cartridge usage and first-page-out speed) must be measured at a standard office environment of approximately 22.2°C (72°F) and 45% RH. ² Supplies shelf life is approximately 2 years. This is based on storage in a standard office environment at 22°C (72°F) and 45% humidity. ³ Wet-bulb temperature is determined by the air temperature and the relative humidity.	

Laser notice

The printer is certified in the U.S. to conform to the requirements of DHHS 21 CFR, Chapter I, Subchapter J for Class I (1) laser products, and elsewhere is certified as a Class 1 consumer laser product conforming to the requirements of IEC 60825-1:2014, EN 60825-1:2014+A11:2021, and EN 50689:2021.

Class I laser products are not considered to be hazardous. The laser system and printer are designed so there is never any human access to laser radiation above a Class I level during normal operation, user maintenance, or prescribed service conditions. The printer has a non-serviceable printhead assembly that contains a laser with the following specifications:

Class: IIIb (3b) AlGaAs

Nominal output power (milliwatts): 25

Wavelength (nanometers): 770–800

Power consumption

Product power consumption

The following table documents the power consumption characteristics of the product.

Note: Some modes may not apply to your product.

Mode	Description	Power consumption (Watts)
Printing	The product is generating hard-copy output from electronic inputs.	One-sided: 811 Two-sided: 776
Copy	The product is generating hard-copy output from hard-copy original documents.	N/A

Mode	Description	Power consumption (Watts)
Scan	The product is scanning hard-copy documents.	N/A
Ready	The product is waiting for a print job.	45.5
Sleep Mode	The product is in a high-level energy-saving mode.	1.1
Hibernate	The product is in a low-level energy-saving mode.	0.2
Off	The product is plugged into an electrical outlet, but the power switch is turned off.	0.2

The power consumption levels listed in the previous table represent time-averaged measurements. Instantaneous power draws may be substantially higher than the average.

Values are subject to change. See www.lexmark.com for current values.

Sleep Mode

This product is designed with an energy-saving mode called *Sleep Mode*. The Sleep Mode saves energy by lowering power consumption during extended periods of inactivity. The Sleep Mode is automatically engaged after this product is not used for a specified period of time, called the *Sleep Mode Timeout*.

Factory default Sleep Mode Timeout for this product (in minutes):	15
---	----

By using the configuration menus, the Sleep Mode Timeout can be modified between 1 minute and 120 minutes, or between 1 minute and 114 minutes, depending on the printer model. If the printer speed is less than or equal to 30 pages per minute, then you can set the timeout only up to 60 minutes or 54 minutes, depending on the printer model. Setting the Sleep Mode Timeout to a low value reduces energy consumption, but may increase the response time of the product. Setting the Sleep Mode Timeout to a high value maintains a fast response, but uses more energy.

Some models support a *Deep Sleep Mode*, which further reduces power consumption after longer periods of inactivity.

Hibernate Mode

This product is designed with an ultra-low power operating mode called *Hibernate mode*. When operating in Hibernate Mode, all other systems and devices are powered down safely.

The Hibernate mode can be entered in any of the following methods:

- Using the Hibernate Timeout
- Using the Schedule Power modes

Factory default Hibernate Timeout for this product in all countries or regions	3 days
--	--------

The amount of time the printer waits after a job is printed before it enters Hibernate mode can be modified between one hour and one month.

Notes on EPEAT-registered imaging equipment products:

- Standby power level occurs in Hibernate or Off mode.
- The product shall automatically power down to a standby power level of ≤ 1 W. The auto standby function (Hibernate or Off) shall be enabled at product shipment.

Off mode

If this product has an off mode which still consumes a small amount of power, then to completely stop product power consumption, disconnect the power supply cord from the electrical outlet.

Total energy usage

It is sometimes helpful to estimate the total product energy usage. Since power consumption claims are provided in power units of Watts, the power consumption should be multiplied by the time the product spends in each mode in order to calculate energy usage. The total product energy usage is the sum of each mode's energy usage.

Applicability of Regulation (EU) 2019/2015 and (EU) 2019/2020

Per Commission Regulation (EU) 2019/2015 and (EU) 2019/2020, the light source contained within this product or its component is intended to be used for Image Capture or Image Projection only, and is not intended for use in other applications.

The UK Product Security and Telecommunications Infrastructure Act 2022 (PSTI Act)—Summary Statement of Compliance

Lexmark International Inc., 740 West New Circle Road, Lexington, KY 40550 USA, declares that this product complies with the applicable security requirements in Schedule 1 of The Product Security and Telecommunications Infrastructure (Security Requirements for Relevant Connectable Products) Regulations 2023. The defined support period for this product can be found at the following web page:

<https://www.lexmark.com/firmware-eos>.

A copy of the Statement of Compliance is available for download at the following web page:

https://www.lexmark.com/en_us/about/regulatory-compliance/all-regulatory-docs.html.

Thailand NBTC technical standards conformity statement

คำประกาศเรื่องการเป็นไปตามมาตรฐานทางเทคนิคของ กสทช. ประเทศไทย

This telecommunication equipment conforms to the technical standards or requirements of NBTC.

เครื่องโทรคมนาคมและอุปกรณ์นี้มีความสอดคล้องตามมาตรฐานหรือข้อกำหนดทางเทคนิคของ กสทช.

Regulatory notices for wireless products

This section contains regulatory information that applies only to wireless models.

If in doubt as to whether your model is a wireless model, go to <http://support.lexmark.com>.

Modular component notice

Wireless models contain the following modular component:

Lexmark MarkNet N8450 / AzureWave AW-CM467-SUR; FCC ID:TLZ-CM467; IC:6100A-CM467

To determine which modular components are installed in your particular product, refer to the labeling on your actual product.

Exposure to radio frequency radiation

The radiated output power of this device is far below the radio frequency exposure limits of the FCC and other regulatory agencies. A minimum separation of 20 cm (8 inches) must be maintained between the antenna and any persons for this device to satisfy the RF exposure requirements of the FCC and other regulatory agencies.

Innovation, Science and Economic Development Canada

This device complies with Innovation, Science and Economic Development Canada license-exempt RSS standards. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Innovation, Sciences et Développement économique Canada

Cet appareil est conforme aux normes RSS exemptes de licence d'Innovation, Sciences et Développement économique Canada. Son fonctionnement est soumis aux deux conditions suivantes : (1) cet appareil ne doit pas causer d'interférences et (2) il doit accepter toutes les interférences, y compris les celles qui peuvent entraîner un fonctionnement indésirable.

European Community (EC) directives conformity

This product is in conformity with the protection requirements of EC Council directive 2014/53/EU on the approximation and harmonization of the laws of the Member States relating to radio equipment.

The manufacturer of this product is: Lexmark International, Inc., 740 West New Circle Road, Lexington, KY, 40550 USA. The EEA/EU authorized representative is: Lexmark International Technology Hungária Kft., 8 Lechner Ödön fasor, Millennium Tower III, 1095 Budapest HUNGARY. The EEA/EU Importer is: Lexmark International Technology S.à.r.l. 20, Route de Pré-Bois, ICC Building, Bloc A, CH-1215 Genève, Switzerland. A declaration of conformity to the requirements of the Directives is available upon request from the Authorized Representative or may be obtained at www.lexmark.com/en_us/about/regulatory-compliance/european-union-declaration-of-conformity.html.

Compliance is indicated by the CE marking:

Restrictions

This radio equipment is restricted to indoor use only. Outdoor use is prohibited. This restriction applies to all the countries listed in the table below:

AT	BE	BG	CH	CY	CZ	DE	DK	EE
EL	ES	FI	FR	HR	HU	IE	IS	IT
LI	LT	LU	LV	MT	NL	NO	PL	PT
RO	SE	SI	SK	TR	UK (NI)			

EU and other countries statement of radio transmitter operational frequency bands and maximum RF power

This radio product transmits in either the 2.4GHz (2.412–2.472 GHz in the EU) or 5GHz (5.15–5.35, 5.47–5.725 in the EU) bands. The maximum transmitter EIRP power output, including antenna gain, is $\leq 20\text{dBm}$ for both bands.

United Kingdom (UK) conformity

This product is in conformity with the protection requirements of the Radio Equipment Regulations 2017.

The manufacturer of this product is: Lexmark International, Inc., 740 West New Circle Road, Lexington, KY, 40550 USA. The UK Importer is: Lexmark International Ltd, Quantum House, 60 Norden Road, Maidenhead SL6 4AY, United Kingdom. A declaration of conformity is available upon request from the UK Importer or may be obtained at www.lexmark.com/en_us/about/regulatory-compliance/uk-declaration-of-conformity.html.

Compliance is indicated by the UKCA marking:

Restrictions or requirements in the UK

This radio equipment is restricted to indoor use only. Outdoor use is prohibited.

UK statement of radio transmitter operational frequency bands and maximum RF power

This radio product transmits in either the 2.4GHz (2.412–2.472 GHz in the UK) or 5GHz (5.15–5.35, 5.47–5.725 in the UK) bands. The maximum transmitter EIRP power output, including antenna gain, is $\leq 20\text{dBm}$ for both bands.

Notice to users in Thailand

ประกาศถึงผู้ใช้ในประเทศไทย

This radiocommunication equipment has the electromagnetic field strength in compliance with the Safety Standard for the Use of Radiocommunication Equipment on Human Health announced by the National Telecommunications Commission.

เครื่องวิทยุคมนาคมนี้มีระดับการแผ่คลื่นแม่เหล็กไฟฟ้าสอดคล้องตามมาตรฐาน ความปลอดภัยต่อสุขภาพของมนุษย์จากการใช้เครื่องวิทยุคมนาคมที่คณะกรรมการกิจการโทรคมนาคมแห่งชาติประกาศกำหนด

เครื่องวิทยุคมนาคมนี้ ได้รับยกเว้น ไม่ต้องได้รับใบอนุญาตให้มี ใช้ซึ่งเครื่องวิทยุคมนาคม หรือตั้งสถานีวิทยุคมนาคมตามประกาศ กสทช. เรื่อง เครื่องวิทยุคมนาคม และสถานีวิทยุคมนาคมที่ได้รับยกเว้นไม่ต้องได้รับใบอนุญาต วิทยุคมนาคมตามพระราชบัญญัติวิทยุคมนาคม พ.ศ. 2498

Federal Communications Commission (FCC) compliance information statement

This product has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The FCC Class A limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case the user will be required to correct the interference at his own expense.

The manufacturer is not responsible for any radio or television interference caused by using other than recommended cables or by unauthorized changes or modifications to this equipment. Unauthorized changes or modifications could void the user's authority to operate this equipment.

Note: To assure compliance with FCC regulations on electromagnetic interference for a Class A computing device, use a properly shielded and grounded cable such as Lexmark part number 1021231 for parallel attach or 1021294 for USB attach. Use of a substitute cable not properly shielded and grounded may result in a violation of FCC regulations.

Any questions regarding this compliance information statement should be directed to:

Director of Lexmark Technology & Services
Lexmark International, Inc.
740 West New Circle Road
Lexington, KY 40550
Telephone: (859) 232-2000
E-mail: regulatory@lexmark.com

Innovation, Science and Economic Development Canada compliance statement

This Class A digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Standard ICES-003.

Avis de conformité aux normes de l'Innovation, Sciences et Développement économique Canada

Cet appareil numérique de classe A est conforme aux exigences de la norme canadienne relative aux équipements pouvant causer des interférences NMB-003.

European Community (EC) directives conformity

This product is in conformity with the protection requirements of EC Council directives 2014/30/EU, 2014/35/EU, and 2011/65/EU as amended by (EU) 2015/863 on the approximation and harmonization of the laws of the Member States relating to electromagnetic compatibility, safety of electrical equipment designed for use within certain voltage limits, and on the restrictions of use of certain hazardous substances in electrical and electronic equipment.

The manufacturer of this product is: Lexmark International, Inc., 740 West New Circle Road, Lexington, KY, 40550 USA. The EEA/EU authorized representative is: Lexmark International Technology Hungária Kft., 8 Lechner Ödön fasor, Millennium Tower III, 1095 Budapest HUNGARY. The EEA/EU Importer is: Lexmark International Technology S.à.r.l. 20, Route de Pré-Bois, ICC Building, Bloc A, CH-1215 Genève, Switzerland. A declaration of conformity to the requirements of the Directives is available upon request from the Authorized Representative or may be obtained at

www.lexmark.com/en_us/about/regulatory-compliance/european-union-declaration-of-conformity.html.

This product satisfies the Class A limits of EN 55032 and safety requirements of EN 62368-1.

United Kingdom (UK) conformity

This product is in conformity with the protection requirements of the Electromagnetic Compatibility Regulations 2016, the Electrical Equipment (Safety) Regulations 2016, and the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment Regulations 2012.

The manufacturer of this product is: Lexmark International, Inc., 740 West New Circle Road, Lexington, KY, 40550 USA. The UK Importer is: Lexmark International Ltd, Quantum House, 60 Norden Road, Maidenhead SL6 4AY, United Kingdom. A declaration of conformity is available upon request from the UK Importer or may be obtained at www.lexmark.com/en_us/about/regulatory-compliance/uk-declaration-of-conformity.html.

This product satisfies the Class A limits of BS EN 55032 and safety requirements of BS EN 62368-1.

Radio interference notice

Warning

This is a product that complies with the emission requirements of EN 55032 Class A limits and immunity requirements of EN 55035. This product is not intended to be used in residential/domestic environments.

This is a Class A product. In a domestic environment, this product may cause radio interference, in which case the user may be required to take adequate measures.

STATEMENT OF LIMITED WARRANTY FOR LEXMARK LASER PRINTERS, LEXMARK LED PRINTERS, AND LEXMARK MULTIFUNCTION LASER PRINTERS

Lexmark International, Inc., Lexington, KY

This limited warranty applies to the United States and Canada. For customers outside the U.S., refer to the country-specific warranty information that came with your product.

This limited warranty applies to this product only if it was originally purchased for your use, and not for resale, from Lexmark or a Lexmark Remarketer, referred to in this statement as “Remarketer.”

Limited warranty

Lexmark warrants that this product:

- Is manufactured from new parts, or new and serviceable used parts, which perform like new parts
- Is, during normal use, free from defects in material and workmanship

If this product does not function as warranted during the warranty period, contact a Remarketer or Lexmark for repair or replacement (at Lexmark's option).

If this product is a feature or option, this statement applies only when that feature or option is used with the product for which it was intended. To obtain warranty service, you may be required to present the feature or option with the product.

If you transfer this product to another user, warranty service under the terms of this statement is available to that user for the remainder of the warranty period. You should transfer proof of original purchase and this statement to that user.

Limited warranty service

The warranty period starts on the date of original purchase as shown on the purchase receipt and ends 12 months later provided that the warranty period for any supplies and for any maintenance items included with

the printer shall end earlier if it, or its original contents, are substantially used up, depleted, or consumed. Fuser Units, Transfer/Transport Units, Paper Feed items, if any, and any other items for which a Maintenance Kit is available are substantially consumed when the printer displays a “Life Warning” or “Scheduled Maintenance” message for such item.

To obtain warranty service you may be required to present proof of original purchase. You may be required to deliver your product to the Remarketer or Lexmark, or ship it prepaid and suitably packaged to a Lexmark designated location. You are responsible for loss of, or damage to, a product in transit to the Remarketer or the Lexmark designated location.

When warranty service involves the exchange of a product or part, the item replaced becomes the property of the Remarketer or Lexmark. The replacement may be a new or repaired item.

The replacement item assumes the remaining warranty period of the original product.

Replacement is not available to you if the product you present for exchange is defaced, altered, in need of a repair not included in warranty service, damaged beyond repair, or if the product is not free of all legal obligations, restrictions, liens, and encumbrances.

As part of your warranty service and/or replacement, Lexmark may update the firmware in your printer to the latest version. Firmware updates may modify printer settings and cause counterfeit and/or unauthorized products, supplies, parts, materials (such as toners and inks), software, or interfaces to stop working. Authorized use of genuine Lexmark products will not be impacted.

Before you present this product for warranty service, remove all print cartridges, programs, data, and removable storage media (unless directed otherwise by Lexmark).

For further explanation of your warranty alternatives and the nearest Lexmark authorized servicer in your area contact Lexmark on the World Wide Web.

Remote technical support is provided for this product throughout its warranty period. For products no longer covered by a Lexmark warranty, technical support may not be available or only be available for a fee.

Extent of limited warranty

Lexmark does not warrant uninterrupted or error-free operation of any product or the durability or longevity of prints produced by any product.

Warranty service does not include repair of failures caused by:

- Modification or unauthorized attachments
- Accidents, misuse, abuse or use inconsistent with Lexmark user’s guides, manuals, instructions or guidance
- Unsuitable physical or operating environment
- Maintenance by anyone other than Lexmark or a Lexmark authorized servicer
- Operation of a product beyond the limit of its duty cycle
- Use of printing media outside of Lexmark specifications
- Refurbishment, repair, refilling or remanufacture by a third party of products, supplies or parts
- Products, supplies, parts, materials (such as toners and inks), software, or interfaces not furnished by Lexmark

TO THE EXTENT PERMITTED BY APPLICABLE LAW, NEITHER LEXMARK NOR ITS THIRD PARTY SUPPLIERS OR REMARKETERS MAKE ANY OTHER WARRANTY OR CONDITION OF ANY KIND, WHETHER EXPRESS OR IMPLIED, WITH RESPECT TO THIS PRODUCT, AND SPECIFICALLY DISCLAIM THE IMPLIED WARRANTIES OR CONDITIONS OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND SATISFACTORY QUALITY. ANY WARRANTIES THAT MAY NOT BE DISCLAIMED UNDER APPLICABLE LAW

ARE LIMITED IN DURATION TO THE WARRANTY PERIOD. NO WARRANTIES, EXPRESS OR IMPLIED, WILL APPLY AFTER THIS PERIOD. ALL INFORMATION, SPECIFICATIONS, PRICES, AND SERVICES ARE SUBJECT TO CHANGE AT ANY TIME WITHOUT NOTICE.

Limitation of liability

Your sole remedy under this limited warranty is set forth in this document. For any claim concerning performance or nonperformance of Lexmark or a Remarketer for this product under this limited warranty, you may recover actual damages up to the limit set forth in the following paragraph.

Lexmark's liability for actual damages from any cause whatsoever will be limited to the amount you paid for the product that caused the damages. This limitation of liability will not apply to claims by you for bodily injury or damage to real property or tangible personal property for which Lexmark is legally liable. **IN NO EVENT WILL LEXMARK BE LIABLE FOR ANY LOST PROFITS, LOST SAVINGS, INCIDENTAL DAMAGE, OR OTHER ECONOMIC OR CONSEQUENTIAL DAMAGES.** This is true even if you advise Lexmark or a Remarketer of the possibility of such damages. Lexmark is not liable for any claim by you based on a third party claim.

This limitation of remedies also applies to claims against any Suppliers and Remarketers of Lexmark. Lexmark's and its Suppliers' and Remarketers' limitations of remedies are not cumulative. Such Suppliers and Remarketers are intended beneficiaries of this limitation.

Additional rights

Some states do not allow limitations on how long an implied warranty lasts, or do not allow the exclusion or limitation of incidental or consequential damages, so the limitations or exclusions contained above may not apply to you.

This limited warranty gives you specific legal rights. You may also have other rights that vary from state to state.
